SITE NAME & ADDRESS: Wareham Property Development; 2855 Mandela Pkwy, Oakland

TOPIC: Soil Vapor Investigation

SUMMARY: Met with Greg Johnson and Louie with Treadwell & Rollo. Currently Setting up soil vapor sampling system at soil vapor well D located inside the building currently occupied by Flatrate.

Completed assembly, now beginning leak check. (pressure gauge reads -24 mm Hg at 10:22 AM).

Using isopropyl alcohol in a dish to create a tracer gas atmosphere under plastic shroud. Currently a 4 ppm concentration has been measured with a PID.

10:32 AM: began purge of vapor well.

Water appears to be in well since gauges are not moving.

Will reschedule next week sometime to resample.

Left site at 10:55 AM
