**Subject:** RE: RO #1 2801 MacArthur Request for Extension/SCM

Dear Aniko,

I have already given you a two month extension for SCM submittal as well as one for the groundwater monitoring event. The submittal date of June 3, 2012 remains the same.

ACEH would prefer to have your consultant spend time preparing the requested SCM and performing the required Geotracker updates rather than spending CUF monies for the year meeting with ACEH. Also, there does not seem to be any additional information to present at a meeting until groundwater monitoring is performed, the SCM is prepared and both are uploaded to Geotracker and the ACEH ftp site. Your consultant should make appropriate recommendations to address any identified data gaps, as detailed in ACEH's February 3, 2012 letter. Please submit the SCM and upload the required items to Geotracker. The SCM will be reviewed after it is submitted.

Regards,  
Barb Jakub

Barbara,

We have just hired a new consultant, Sierra West, for this project. Based on their need to review the historical files (1989 to present) and familiarize themselves with the site, we are requesting an extension for the SCM submittal to July 31, 2012. This will also enable us to be reimbursed by the UST Fund for this work since we have requested a budget for the SCM for the 2012-2013 fiscal year which commences July 1. The UST Fund budget for this fiscal year (2011-2012) does not cover the SCM and is enough only to cover the current work (groundwater monitoring event and reporting, Geotracker upload compliance, well survey).

I would also like to schedule a meeting with you to introduce our new consultant (Sierra West) and to discuss project scope, deliverables, and schedule.

If you have any questions please do not hesitate to call. We look forward to meeting with you at your earliest convenience.

Thank you.

Aniko Molnar

**Subject:** RO #1 2801 MacArthur Request for Extension/SCM

Barbara,

I am writing in reference to your letter to Nicholas Molnar and Raymond & Grace Yu dated February 3, 2012 regarding the above referenced site. We would like to request a several month extension to the due date for the Site Conceptual Model as we are still in the process of selecting a new consultant to do this work. We hope to contract with a new consultant within the next several weeks. As we will be working with a new consultant (due to reimbursement constraints with the UST Fund) it will take some time for them to review historical site information and data as well as develop an SCM. We plan to collect a round of groundwater monitoring data during the month of April in accordance with the letter and your previous extension grant (email dated 3/1/12).

We have been actively working on obtaining reimbursement for previous work in 2006 and 2008. This has required a significant effort and we have finally successfully obtained EDFs from the laboratories in acceptable format for uploading to Geotracker (all but one as of today). Subsequently we will try to upload any outstanding documents to the Alameda site as well per your request.

If you have any questions please do not hesitate to contact me.

Thank you.

Aniko Molnar
