Hi Simon:

I have taken over case management as the primary caseworker for Alameda County Environmental Health (ACEH) for the subject site. However, since this case has previously been reviewed by the Underground Storage Tank Cleanup Fund (USTCF) staff through the Five-Year Review process and recommended for closure consideration, the State Water Board staff is tasked to review this case for case closure consideration in accordance with the Board's document entitled "Implementation of Low-Threat Underground Storage Tank Case Closure Policy and Additional Program". According to the Implementation Plan the State Water Board anticipates that this review will be completed no later than August 16, 2013. Upon review the Fund Manager will recommend case closure if the site meets the eight General Criteria and the three Media-Specific Criteria of the Policy.

Please call me if you would like to discuss further.

Regards,

**Dilan Roe, P.E.**

Hello Teena,

Simon has been inquiring regarding the status of his most recent request for closure for RO4. I have prepared a closure for this site in the past, which resulted in requesting additional groundwater monitoring. The monitoring has concluded and a report with a request for closure has been submitted.

Is this something that I should follow up on (i.e. review report and update closure) or is someone else working on this?

I look forward to your response.

Sincerely,

Paresh C. Khatri

Paresh,

Thanks for returning my phone call. I know that you are very busy and I appreciate the time you spend reviewing our two remaining sites (TOC 049 and 063). We submitted the *Well Destruction and Remediation System Removal Report* for TOC 063 on October 24, 2012 and as far as I know we should be getting a closure letter from your agency, do you know when we can expect to see this letter.

On September 24, 2012, we submitted the 3<sup>th</sup> quarter 2012 Report and Request for Closure for TOC 049 and we have not received any reply regarding our request.

Can you please provide me with a brief update for both of these sites, especially TOC 063 and the expected closure letter.

Regards,
