RE: **Former Thrifty Oil Co. Station #049**
3400 San Pablo Avenue
Oakland, CA 94612
Fourth Quarter 2008, Status Report

Dear Mr. Plunkett:

Presented herein is the Fourth Quarter 2008, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #049 located at 3400 San Pablo Avenue, Oakland, California **(Figure 1)**. Presented in this report are the results of the quarterly groundwater-monitoring program and ongoing remediation conducted during the Fourth Quarter 2008. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly monitoring and sampling, and remediation system operation activities at this site.

On September 19, 2008, Mr. Simon Tregurtha of Thrifty contacted you via the telephone. During the conversation, Mr. Tregurtha expressed his concern that the hydrocarbon plume associated with the adjacent Shell station has migrated into the subsurface soils and groundwater of Thrifty Station #049 property. This same concern was expressed in the Second and Third Quarter 2008 Groundwater Reports. Fourth Quarter 2008 groundwater analytical data from Shell well MW-10 indicates that Shell's hydrocarbon plume has significantly impacted the groundwater west of their site (and extending across San Pablo Avenue). Groundwater data also indicates the presence of free product in Shell well MW-6R and significant impact to the groundwater in Shell well MW-5 which is located immediately adjacent to the Thrifty site. **Thrifty respectfully requests that the ACHCS direct Shell to take measures to mitigate the southern and southwestern migration of their hydrocarbon plume.**

On September 25, 2008, Thrifty submitted a *Feasibility Study and Corrective Action Plan* (FS/CAP), prepared by GeoHydrologic Consultants, Inc, to the ACHCS. The FS/CAP recommended a 5 consecutive day (24 hour/day) MPE event extracting from wells MW-2R, MW-4R, and RW-1R. Since more than 60-days have elapsed since the FS/CAP was submitted it is approved by default, therefore, Thrifty will proceed with the implementation of the FS/CAP under the "60-day rule". **Pursuant to authority granted in California Code of Regulations, Title 23, Division 3, Chapter 16, Section 2722 (e), Thrifty will proceed with implementation of the above mentioned scope of work as previously proposed.** This letter constitutes Thrifty's notification of its intent to initiate the proposed actions as stipulated in Section 2722 (e) (i). Unless you direct otherwise, Thrifty will initiate the bidding process on **January 30, 2009.**

Groundwater Monitoring

Depth to groundwater is measured in each monitoring well on a quarterly basis. Groundwater monitoring well locations for former Thrifty Station #049 at 3400 San Pablo Avenue and the former Shell Station at 3420 San Pablo Avenue are presented on **Figure 1**. During the Fourth Quarter monitoring event, Thrifty's and Shell's wells were jointly gauged and sampled on October 15, 2008. A groundwater elevation contour map based on the Fourth Quarter 2008 monitoring data is presented in **Figure 2**; this map incorporates groundwater elevation data from both the Thrifty and Shell sites. Groundwater elevation data indicates a variable groundwater flow pattern, with both easterly and westerly flow directions.

The current groundwater elevation map shows the Thrifty and Shell sites to be essentially cross-gradient of each other. Historical groundwater flow directions reported in groundwater contour maps have consistently shown the Thrifty Station to be downgradient or cross-gradient of the Shell Station.

Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, Earth Management Company (EMC) obtained groundwater samples from monitoring wells MW-1, MW-2R, MW-3, MW-4R, MW-5, MW-6, MW-7, and RW-1R on October 15, 2008. Groundwater samples were delivered by EMC in a chilled state following strict Chain-of-Custody procedures to a state-certified laboratory and analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015B. Volatile organic compounds of benzene, toluene, ethylbenzene, xylenes (BTEX), methyl tert butyl ether (MTBE), and other oxygenates were analyzed by EPA Method 8260B. A summary of historical analytical

sampling results for TPHg, BTEX, and MTBE is provided in **Table 1** and additional oxygenates in **Table 2**. Current Thrifty groundwater sampling results are included in the **Summary Table**. Copies of the EMC Field Data Groundwater Sampling Forms are provided in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**. **Appendix C** contains Shell's historic and current well concentration data tables.

TPHg, benzene, MTBE, and tertiary butyl alcohol (TBA) isoconcentration maps were prepared using both Thrifty's and Shell's data from the October 15, 2008 sampling event, and results are presented in **Figures 3, 4, 5,** and **6**, respectively. Laboratory results of Thrifty wells indicate that the maximum concentrations of TPHg and benzene were detected in well RW-1R at 2,430 micrograms per liter (ug/L) and 71 µg/L, respectively. The maximum concentrations of MTBE and TBA were detected in well MW-2R at 263 µg/L and 151 µg/L, respectively. All other oxygenated compounds were not detected at or above laboratory detection limits in any of the wells

Fourth Quarter 2008 monitoring and sampling results of the Shell service station wells indicate the presence of free product in well MW-6R, and the following maximum concentrations in dissolved phase:

- 17,000 ug/L TPHg and 1,300 µg/L benzene in well MW-2; and
- 120 µg/L MTBE in Shell well MW-4, which is located directly north and adjacent to the Thrifty Station #049.

TBA was not analyzed in any of the groundwater samples collected from the Shell groundwater monitoring wells

As shown in **Figures 3 through 6**, Shells dissolved hydrocarbon plume is much larger in areal extent and contain higher constituents concentrations than Thrifty's plume. The Shell plume is encroaching on the northern portion of Thrifty's site and has significantly impacted groundwater to the west of the Shell site in Shell well MW-10.

Remediation Status

Site remedial activities were initiated in April 1991. Originally, the remediation equipment consisted of a Groundwater Treatment System using activated carbon, with groundwater extraction from recovery well RW-1. System operational data is included in **Table 3**. On April 4, 2003, the system was shut off for upgrading activities. As of April 4, 2003, the system treated approximately 1,445,088 gallons of groundwater since start up (April 1991).

In 2004 Thrifty selected Advanced GeoEnvironmental (AGE) to conduct remedial system upgrade activities including installation of a new treatment compound, installation of new piping, connection of piping to the replacement well network, and the operation and maintenance of the upgraded groundwater pump and treat system. In January 2004, AGE abandoned wells MW-2, MW-4, and RW-1 and replaced them with wells MW-2R, MW-4R, and RW-1R.

The upgraded remediation system was restarted by AGE for continuous operation on June 21, 2004. The primary components of the upgraded system within the treatment compound consist of an air

compressor, 500 gallon Poly settling tank, control panel, and three 200-pound granular activated carbon canisters. The upgraded system is extracting groundwater from extraction wells MW-2R, MW-4R, and RW-1R that are each equipped with downhole submersible pumps.
On November 2, 2004, AGE reported that the pump had been stolen from well MW-4R. Because well MW-4R was producing more water than well MW-2R, the pump from well MW-2R was removed and installed in well MW-4R. On February 25, 2005, a new pump was installed in well MW-4R and the existing pump was replaced in well MW-2R.

On January 12, 2005, system operations and maintenance duties were assumed by EMC from AGE. During the current reporting period, (from September 9, 2008 to December 30, 2008) the upgraded system produced and treated 119,090 gallons of water for a cumulative system total of 2,019,606 gallons as of December 30, 2008 (**Table 3**).

On December 9, 2008, EMC conducted an outlet compliance sampling event, collecting an effluent water sample from the outlet sampling port. The sample was submitted for analyses for BTEX by EPA Method 8021B and for TPHg by EPA Method 8015B. Laboratory results indicated no detectable concentrations for all constituents analyzed. Copies of the Field Reports prepared by EMC are provided in **Appendix D** and the system effluent analytical results from the sample collected by EMC on December 9, 2008 are provided in **Appendix E**.

Recent Site Investigation

In a transmittal letter dated March 11, 2004, Thrifty submitted preliminary soil and groundwater data from the four offsite soil borings and onsite well replacement activities performed by AGE. On March 18, 2004, Thrifty, AGE, and the Alameda County Health Care Services (ACHCS) met at the site to discuss the location of offsite well MW-8 and the soil and groundwater data provided by Thrifty. In a letter dated March 19, 2004, the ACHCS requested that Thrifty prepare a workplan to address the offsite contamination detected during the January 2004 site assessment conducted by AGE. After further discussing the scope of work with the ACHCS in an e-mail dated April 27, 2004, Thrifty submitted a workplan to install one onsite and two offsite wells downgradient of the site. The ACHCS responded in an e-mail dated May 4, 2004, requesting additional borings to delineate the plume to the west and southwest of the site. Thrifty submitted a revised Workplan for Additional Offsite Assessment dated May 7, 2004 that included two additional borings to the southwest of the site.

In a letter dated May 17, 2004, the ACHCS approved the May 7, 2004, workplan with the request that additional borings be considered if soil and groundwater samples indicate significant hydrocarbon contamination. The ACHCS also suggested moving the location of onsite well MW-10 slightly to the west to be more downgradient of the Shell Station. Thrifty previously selected GeoHydrologic Consultants, Inc. (GHC) to conduct site assessment activities. Thrifty has not been able to obtain an encroachment permit or access agreements from the City of Oakland Public Works Department (COPWD).

On May 18, 2007, ACHCS sent a letter to Thrifty with technical comments regarding: the dissolved hydrocarbon plume characterization; proposed soil boring installation and soil sampling; well installation and development; preferential pathway study; soil and groundwater chemical analysis;

and site conceptual model development. ACHCS has requested the preparation of a Revised Workplan for Soil and Groundwater Investigation with Revised Site Conceptual Model and Updated Preferential Pathway Study and a Soil and Groundwater Investigation Report.

On July 18, 2007, Thrifty submitted a *Revised Workplan for Additional Off-Site Assessment* (Workplan). The Workplan proposed three offsite soil borings, three offsite groundwater wells and one onsite groundwater well. The Workplan also proposed completing a revised preferential pathway study and revised site conceptual model. On August 7, 2007 the Alameda County Health Care Services Agency (ACHCS) provided approval for the Workplan.

In a letter dated August 7, 2007, ACHCS requested that Thrifty Oil Co. (Thrifty) provide an explanation for the inconsistent groundwater monitoring data observed in the analytical results of groundwater samples collected during the first and second quarter of 2007. On August 21, 2007 Thrifty submitted an Explanation *of Fluctuating Dissolved-Phase Hydrocarbon Concentrations* in response to the August 7, 2007 ACHCS letter.

The "*Revised Workplan, Additional Off-Site Assessment, Thrifty Oil Co. Station No. 049, ARCO Products Company Station # 9535, 3400 San Pablo Avenue, Oakland, California*" (Revised Workplan) dated July 18, 2007 prepared by EQC was submitted to the ACHCS to address the ACHCS request. On August 7, 2007 the ACHCS conditionally-approved the Revised Workplan.

On August 8, 2007 Thrifty contacted the City of Oakland and requested an encroachment permit application package for the proposed offsite groundwater well locations on San Pablo Avenue, Oakland.

Thrifty's legal representatives have had numerous communications City of Oakland Attorneys office regarding encroachment permit requirements but to date no agreement has been reached.

On September 13, 2007 Equipoise (EQC) on behalf of Thrifty submitted a *Request for Extension* letter to the ACHCS. EQC had submitted requests to both the DWR and ACPW for production well information needed for the Revised Preferential Pathway Study. As of September 13, 2007 EQC had not received a response from either agency, and therefore requested that the ACHCS provide an extension of the due date of the requested report.

On September 27, 2007, Thrifty submitted an "Encroachment Permit Delays and Request for Revised Well and Soil Borings Locations" letter to the ACHCS. The letter indicated that Thrifty was still negotiating with the City of Oakland regarding the encroachment permits for the wells proposed in San Pablo Avenue, Oakland, but requested that the ACHCS consider revised well locations (which were proposed on private property).

On November 6, 2007, ACHCS sent a letter to Thrifty responding to Thrifty's September 27, 2007 letter and indicated that moving the monitoring wells MW-8, MW-9, and MW-11 to adjacent private properties was acceptable provided the new locations of the monitoring wells are as close as practicable to the sidewalk at each location.

On November 13, 2007, EQC submitted the Revised Preferential Pathway Study (PPS) which

discussed the results of the nearby well survey.

Thrifty and EQC identified and contacted the property owners for the three proposed offsite well locations (MW-8, MW-9 and MW-11). Site access agreements were sent via certified mail to each property owner on December 7, 2007.

In concurrently sent letters dated January 31, 2008, Steven Plunkett of the ACHED informed the adjacent property owners that they were required to execute the access agreements sent by Thrifty otherwise they could potentially be responsible for the cost of environmental assessments on their properties.

On February 12, 2008, Thrifty received an executed access agreement from the Vern Lenberg LLC (executed by Mr. Vernon Coleman) for the property located at 3431 San Pablo Avenue, Oakland, California.

On March 5, 2008, Thrifty spoke to Mr. Kelvin Tse (the owner of the property located at 3315 San Pablo Avenue, Oakland, California). During the telephone conversation Mr. Tse requested that Thrifty Oil Co. (Thrifty) supply: (1) an assurance that the proposed groundwater well be installed as close as possible to the northern corner of your property; (2) an explanation of why Thrifty has proposed to install a groundwater well on your property and the details of the sampling and chemical analysis Thrifty will conduct during the installation and during quarterly groundwater sampling events, and (3) a guarantee that Thrifty will mitigate contamination encountered during our investigation at the above mentioned property. Mr. Tse indicated that his brother was also a legal owner of the property. On March 5, 2008 Thrifty sent an email summarizing the telephone conversation to Mr. Tse with an attached copy of the Third Quarter 2007, Status Report for Thrifty Station No. 049. On March 12, 2008 Thrifty sent a letter to Mr. Tse in response to his request on March 5, 2008 for information and guarantees. Included in Thrifty's letter were documents that Thrifty acquired from online databases that indicated Mr. Kelvin Tse and Ms. Linda Tse are the only legal owners of the above mentioned property.

The access agreement Thrifty sent to the Moriah Christian Fellowship Baptist Church, Inc located at 3354 San Pablo Avenue Oakland, CA 94608, was returned to Thrifty on March 14, 2008. It appears that the post office attempted delivery the package on December 13, 2007 and March 8, 2008, and finally returned it to Thrifty with a "final notice" and "unable to forward" stamps on the front of the package. Thrifty called the United States Postal Service (USPS) at 800 275-8777 and they confirmed that the stamps on the front of the envelope indicated that the package not been received by the addressee and the package had probably been classified as abandoned, and therefore return to Thrifty. A short examination of the returned envelope showed that the seals applied on the envelope as part of the certified mail features were broken which suggests that somewhere, someone searched the contents of the envelope. Thrifty conducted a search on the United States Postal Service website to track the package (tracking number 7007 0710 0005 2435 5749) and discovered that the only recorded delivery of the package was its return to Thrifty on March 14, 2008 at 8:49 AM.

On April 21, 2008, a Thrifty representative contacted Mr. Kelvin Tse to request that he return an executed copy of the access agreement that had been mailed to him on March 12, 2008. During the conversation with Mr. Kelvin Tse once again insisted that his brother, Mr. Jack Chi Tse, was an

owner of the property located at 3315 San Pablo Avenue, Oakland, California. On April 21, 2008, Thrifty completed an additional property title database search, results of the search identified Mr. Jack Chi Tse as an owner of the property located at 3315 San Pablo Avenue, Oakland, California. On April 22, 2008, Thrifty mailed a revised access agreement (which include Mr. Jack Chi Tse) to Mr. Kelvin Tse and Mr. Jack Chi Tse. In early May 2008, executed access agreements were received by Thrifty from Mr. Jack Tse and Mr. and Mrs. Kelvin Tse and on May19, 2008 Thrifty executed the agreements and mailed copies back to the respective parties.

On June 25, 2008, Steven Plunkett of the ACHED contacted Simon Tregurtha (a Thrifty representative) via the telephone and stated he had recently been in contact with a representative of the Moriah Christian Fellowship Baptist Church (the Church) regarding the placement of a groundwater monitoring well on their property. Steven Plunkett said that the Church representative had indicated they would be reviewing the access agreement and would return a signed copy to Thrifty in the near future.

On September 19, 2008, Simon Tregurtha contacted Steven Plunkett via the telephone and stated that Thrifty has not received an executed access agreement from the Church. Mr. Plunkett stated that he was gong to enlist the help of the local fire department to convince the Church of the need to sign the access agreement. During the conversation Mr. Tregurtha expressed his concern that the hydrocarbon plume associated with the adjacent Shell station has migrated into the subsurface soils and groundwater of Thrifty Station #049 property. This same concern was expressed in the Second and Third Quarter 2008 Groundwater Reports. **Thrifty respectively requests that the ACHCS direct Shell to take measures to mitigate the southern migration of their hydrocarbon plume.**

Proposed Interim Remedial Action

On April 22, 2008 Thrifty submitted the *Workplan for Five Bi-Weekly 24-Hour Mobile Dual Phase Extraction Events* (Workplan). The Workplan proposed conducting five bi-weekly 24 hour mobile DPE events as an interim remedial action in order to supplement current groundwater pump-and–treat operations and accelerate the remediation of the groundwater and soil contamination at the site and expedite case closure. Historical groundwater analytical data indicates a decreasing trend in dissolved-phase hydrocarbon concentrations at the site with the plume currently being limited to the area of wells MW-2R, MW-4R, and RW-1R.

Thrifty proposed using onsite wells MW-2R, MW-4R, and RW-1R as simultaneous extraction points, and wells MW-1, MW-3, and MW-7 as observation wells. Field data collection activities, laboratory analysis and reporting will be performed in association with the DPE events.

In a letter dated July 29, 2008 the ACEHD stated that they did not agree with the scope of work proposed in Thrifty's Workplan and directed Thrifty to submit a Feasibility Study and Corrective Action Plan (FS/CAP).

On September 25, 2008, Thrifty submitted a *Feasibility Study and Corrective Action Plan* (FS/CAP), prepared by GeoHydrologic Consultants, Inc, to the ACHCS. The FS/CAP recommended a 5 consecutive day (24 hour/day) MPE event extracting from wells MW-2R, MW-4R, and RW-1R. Since more than 60-days have elapsed since the FS/CAP was submitted it is approved by default,

therefore, Thrifty will proceed with the implementation of the FS/CAP under the "60-day rule". **Pursuant to authority granted in California Code of Regulations, Title 23, Division 3, Chapter 16, Section 2722 (e), Thrifty will proceed with implementation of the above mentioned scope of work as previously proposed.** This letter constitutes Thrifty's notification of its intent to initiate the proposed actions as stipulated in Section 2722 (e) (i). Unless you direct otherwise, Thrifty will initiate the bidding process on **January 30, 2009.**

Planned Activities

- ACEHD has indicated they are going to enlist the help of the local fire department to convince the Church of the need to sign the access agreement. Thrifty will await ACEHD direction regarding the implementation of the three proposed offsite wells;
- Unless the ACHCS directs otherwise, Thrifty will begin the bidding process and implement the September 25, 2008 FS/CAP under the "60-day rule";
- Continue the operation of the groundwater remediation system; and
- The groundwater monitoring wells will be monitored and sampled during the First Quarter 2009. All site monitoring/sampling data generated during the next quarter will be reported in the First Quarter 2009 monitoring report.

WD PERMIT LIMITS:	*NE*	*5.0*	*5.0*	*5.0*	*5.0*

Note:

< = less than laboratory detection level indicated
- = no sample / not analyzed
NE = Permit Limit not established
TPH is analyzed by EPA Method 8015 M
BTEX is analyzed by EPA Method 8021 or 8260
*MTBE by 8021/8260
Total Hydrocarbons Removed = From 4/8/91 to 2/10/92, the influent TPHg is assumed to be 47,000 (3/9/92)
In February 2000, the total cumulative discharge amount was corrected to reflect all system maintenance and flowmeter changeouts since the startup of the system.
The total number may be different from previous versions of this table.

Groundwater Monitoring Report **081015-EC-1**

This report covers the routine monitoring of groundwater wells at this former Shell-branded facility. In accordance with standard procedures that conform to Regional Water Quality Control Board requirements, routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated purge volume (if applicable), elapsed evacuation time (if applicable), total volume of water removed (if applicable), and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater (if applicable) is, likewise, collected and transported to the Shell Martinez Manufacturing Complex.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL CONCENTRATIONS**. The full analytical report for the most recent samples and the field data sheets are attached to this report.

At a minimum, Blaine Tech Services, Inc. field personnel are certified on completion of a forty hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. Our activities at this site consisted of objective data and sample collection only. No interpretation of analytical results, defining of hydrological conditions or formulation of recommendations was performed.

Please call if you have any questions.

Yours truly,

Mike Ninokata
Project Manager

Abbreviations:
TPPH = Total petroleum hydrocarbons as gasoline by modified EPA Method 8260B; prior to April 27, 2001, analyzed by EPA Method 8015.
BTEX = Benzene, toluene, ethylbenzene, xylenes by EPA Method 8260B; prior to April 27, 2001, analyzed by EPA Method 8020.
MTBE = Methyl tertiary butyl ether
DIPE = Di-isopropyl ether, analyzed by EPA Method 8260B
ETBE = Ethyl tertiary butyl ether, analyzed by EPA Method 8260B
TAME = Tertiary butyl methyl ether, analyzed by EPA Method 8260B
TBA = Tertiary butyl alcohol, analyzed by EPA Method 8260B
TOC = Top of Casing Elevation
SPH = Separate-Phase Hydrocarbons
GW = Groundwater
DO = Dissolved Oxygen
ug/L = Parts per billion
ppm = Parts per million
MSL = Mean sea level
ft. = Feet
<n = Below detection limit
(D) = Duplicate sample
NA = Not applicable

Notes:

a = Chromatogram pattern indicates an unidentified hydrocarbon.

b = MTBE could not be quantified due to co-eluting compounds.

c = The highest recovery value for TPH has been reported, but this should be considered an estimate. Repeated analysis yielded inconsistent results.

d = Hydrocarbon does not match pattern of laboratory's standard.

e = SPH present in well measured at less than 0.01 feet. Visual inspection revealed the presence of distinct phases within the sample, indicating the possible presence of undissolved hydrocarbons.

f = The concentration reported reflects individual or discrete unidentified peaks not matching a typical fuel pattern.

g = Secondary ion abundances were outside method requirements. Identification based on analytical judgement.

h = Analyzed by EPA Method 8015B (M).

i = Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.

* = This sample was analyzed outside the EPA recommended holding time.

When separate-phase hydrocarbons are present, groundwater elevations is adjusted using the equation:

Corrected Groundwater Elevation = Top of Casing Elevation - Depth to water + (0.8 x Hydrocarbon Thickness).

Resurvey of wells was performed on August 28, 1998 by Virgil Chavez Land Surveying of Vallejo, CA..

All wells except MW-11 surveyed February 26, 2001 by Virgil Chavez Land Surveying of Vallejo, CA.
