Oakland)

NOTIFICATION FOR ACCESS

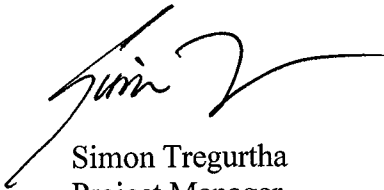

Dear Ms. Coleman:

Thank you once again for providing Thrifty Oil Co. (Thrifty) with permission to access your property at 3431 San Pablo Avenue, Oakland, California. This letter is to inform you that on November 30, 2010, Thrifty will be at your property to install one soil boring (SB-4) (**Figure 1**). The proposed soil boring will be installed as close as possible to the southeast corner of your property. During the installation of the soil boring, groundwater and soil samples will be collected and then the soil boring will be backfilled with bentonite grout to near surface and sealed to match existing surface conditions. Thrifty will make every effort to minimize disruption to retail operations at your property.

A Thrifty representative would be glad to meet you at your property and explain the proposed scope of work.

If you have any questions regarding the soil boring installation, please do not hesitate to contact me at (562) 921-3581, Ext. 260.

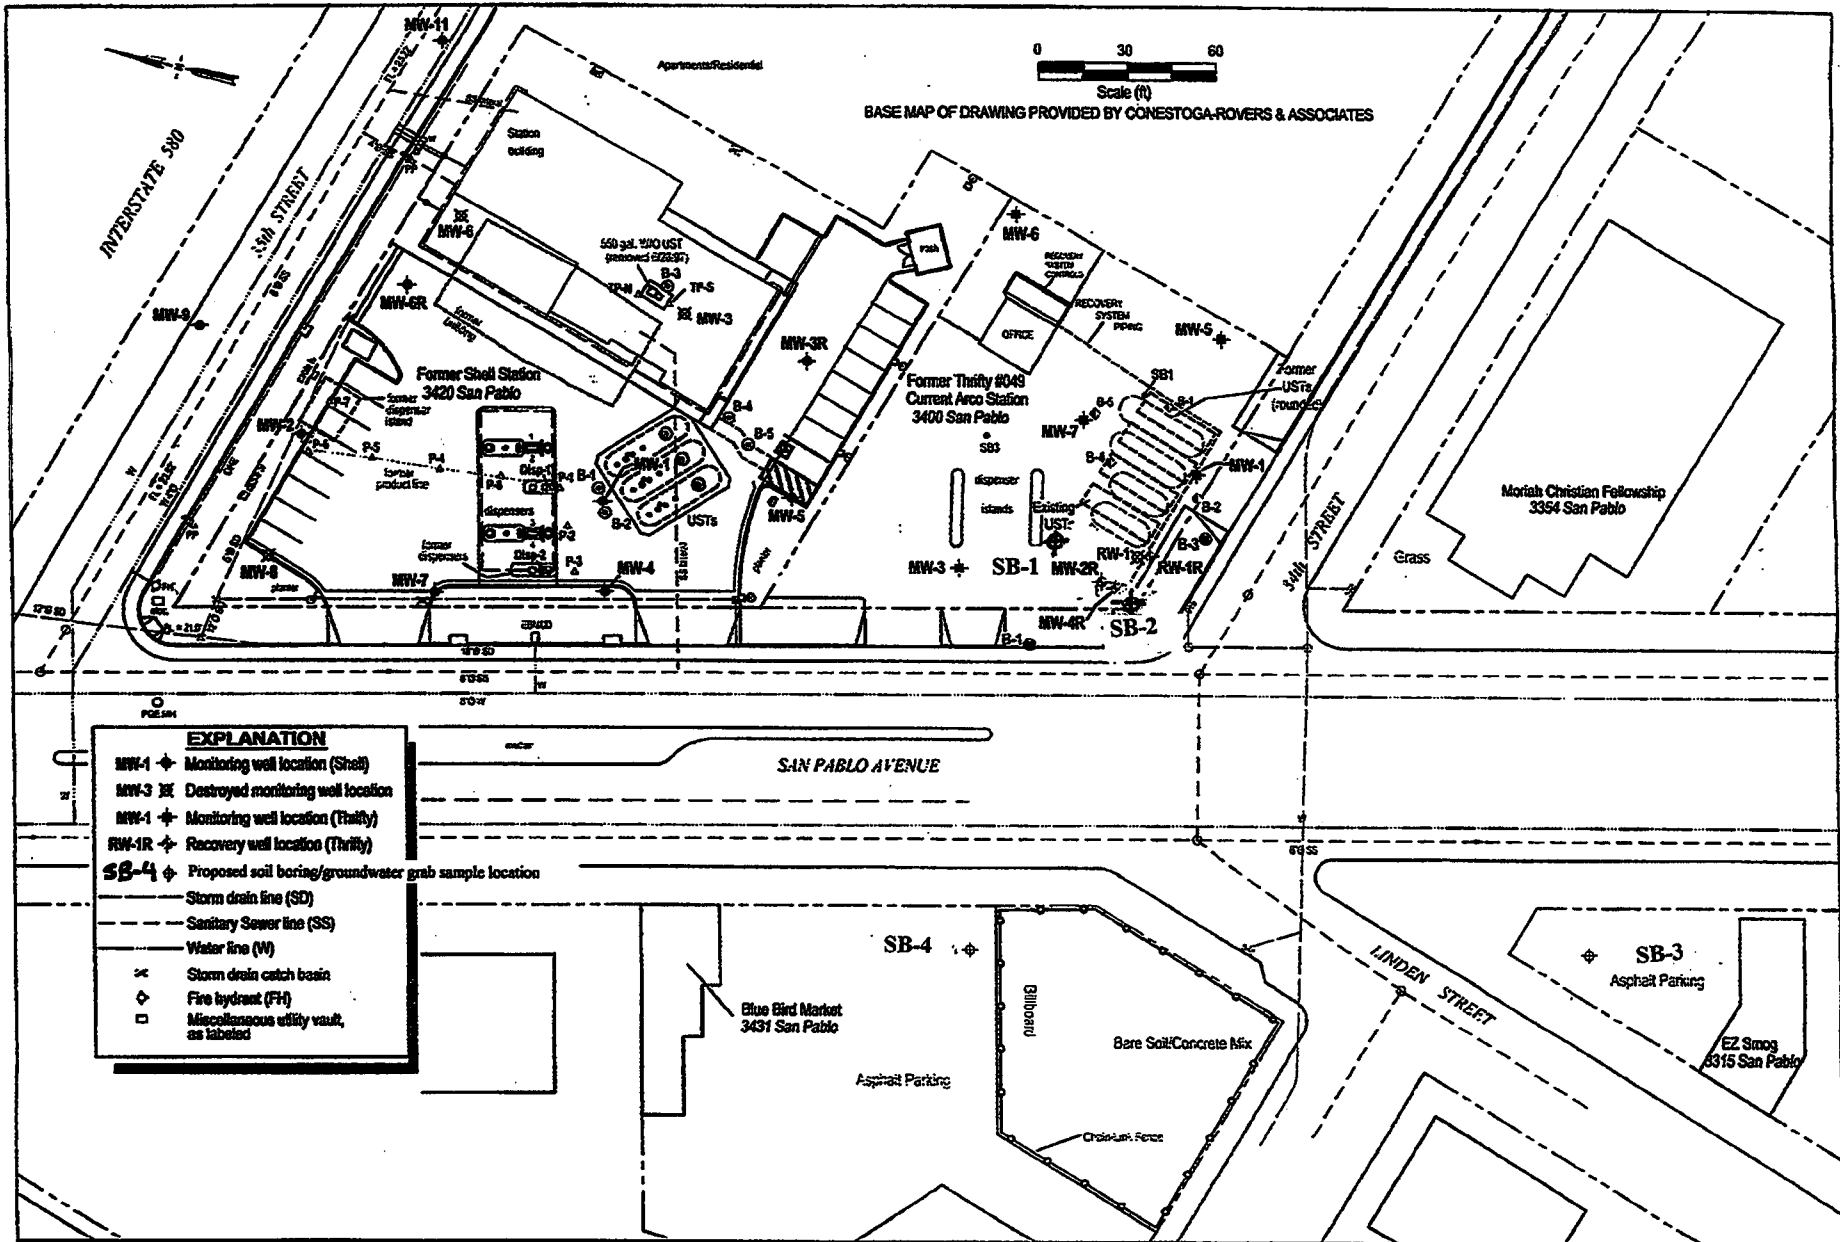

Sincerely,

Simon Tregurtha
Project Manager
