Carryl and Travis,

Please use this email to document ACEH concurrence with the requested 2 week extension for report submittal; it appears appropriate given the anomalous data. I will update Geotracker shortly.

Hi Mark,

As requested, a copy of the extension request for RO0007 is attached. This request is a 2 week extension to allow additional time to further evaluate the lab data.

Regards,

Travis L. Flora

Reference: Request for Extension of Second Quarter 2014 Semi-Annual Groundwater Monitoring and LNAPL Recovery Status Report

Chevron-branded Service Station 90504, 15900 Hesperian Boulevard, San Lorenzo, CA
(Case #: RO0000007)

Dear Mr. Detterman,

On behalf of Chevron Environmental Management Company (Chevron), Stantec Consulting Services Inc. (Stantec) respectfully requests an extension to complete the Second Quarter 2014 Semi-Annual Groundwater Monitoring and LNAPL Recovery Status Report for former Chevron-branded service station 90504, which was located at 15900 Hesperian Boulevard, San Lorenzo, Alameda County, California (the Site). Groundwater monitoring reports are typically submitted within 60 days of the date of sampling. Based on the date sampling for the Second Quarter 2014 event, the due date for this report would be August 22, 2014.

Lab results from the Second Quarter 2014 sampling event are seemingly anomalous. Stantec would like additional time to investigate and interpret the results and develop appropriate recommendations; therefore, Stantec respectfully requests an extension to submit the Second Quarter 2014 Semi-Annual Groundwater Monitoring and LNAPL Recovery Status Report by September 12, 2014.

Regards,

Stantec Consulting Services Inc.

A blue ink handwritten signature, appearing to read "Travis L. Flora", is written over a faint circular stamp.
