# PORT OF OAKLAND

APR 13 PM 3:11

April 04, 1994

Jennifer Eberle  
Alameda County Health Care Services Agency  
Hazardous Materials Specialist  
Department of Environmental Health  
UST Local Oversight Program  
80 Swan Way, Rm 200  
Oakland, CA 94621

Subject: Underground Storage Tank Removal and Soil Excavation at  
Building C-401, 2277 7th Street, Oakland, CA

Dear Ms. Eberle,

The purpose of this letter is to respond to your letter of March 17, 1994 requesting information regarding UST removal and soil excavation project at 2277 7th street. No excavated soils remain on-site and no soils were sent to the Port's bioremediation facility. Section 4.5 of our tank report closure report states that "approximately 450 cubic yards of stockpiled soils were sent to Port Costa Materials in Martinez, California on November 22, 1993. Since writing the report the actual amount of soils sent to Port Costa Marterial has been determined to be 578.92 cubic yards. ✓ ok

Enclosed you will find copies of the receipts from Port Costa Materials and copies of the Non-Hazardous manifests from PTS Environmental Service. The stockpiled soils were recycled as non-hazardous petroleum soils.

The soil sample collected on November 11, 1993, from the adjacent Dongary Investments tank removal excavation pit (ANR site S-1) was analyzed for TPH-gasoline and TPH-diesel only; BTEX was not analyzed. The sample was collected to determine whether gasoline, and diesel were present, not to characterize the site.

If you any questions, please contact Michaeaux James at 272-1178.

Sincerely,

Neil Werner  
Compliance Supervisor
