Barney: Thank you. This note confirms our conversation earlier in the week in which Nestle requested a 10:00 am meeting time on July 31, 2007, (rather than 9:30) to allow for travel schedules.

Nestle will be sending Binayak Acharya and Brent Searcy of Environmental Cost Management with a power point presentation that covers the following agenda items:

- 1 - Review of Site History
- 2 - Review of past remediation efforts
- 3 - Discussion of post-remediation monitoring and results
- 4 - Review of basis of past closure requests.

I will forward the presentation to you as soon as possible.

I understand that Hall Equities will also be sending approximately 2 representatives to participate in the presentation.

With regard to payment of the oversight deposit, as I explained, the Nestle usual check cutting process normally takes about two weeks. We are doing all that we can to expedite the check. Alameda County Health should have already received a deposit of \$6,000 from Hall Equities. Nestle is committed to getting the remaining half to the agency as soon as possible. You indicated a willingness to proceed with the presentation on this representation.

Thank you for your cooperation in this matter.

Ms. Costanza:

Sorry it took this long to get back to you. I spoke with Donna to confirm the potential dates. July 31 would be best for your presentation. Preferably in the morning at 9:30 am. We would like to limit the meeting to approx 1 hour. Please submit an agenda and a list of attendees. This meeting is contingent on the County receiving the requested \$12k deposit.

Thank you,

Barney M. Chan
