Robert,

My workload has been very heavy the last few months. Given the current load, I expect to review your report by April 28. Included in that backlog is two work plans submitted for this case earlier in March by Nestle.

Regards,

Jerry,

Sorry to bother you, but they are bugging me about when to expect some feed back.

Can you give me a sense of the time frame of a response?

I've told them that until they make it possible to sample the water well they can't expect a final response. Some minor hang ups have prevented my getting to the well so I can sample it and they demanded the report go out.
