**RE: Wastewater Monthly Report/Sample Data for the Groundwater
Treatment System at the Carnation Dairy Facility in Oakland**

AGE Project Numbers: 004-88-059, 004-89-093, 004-89-096

Account No. 033-00572

Dear Mrs. Hagen:

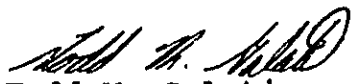

Enclosed are the laboratory analyses for the groundwater treatment system for the period of March 19, 1990 through April 19, 1990. The analyses were performed by Curtis and Tompkins, Ltd., Analytical Laboratories. The sample number 5773 refers to the influent wastewater stream, sample number 5771 refers to the effluent stream from carbon column 1, and sample number 5772 refers to the effluent stream from carbon column 2. The samples were analyzed for aromatic volatile organics (EPA 8020) as per the permit requirements. The samples were also analyzed for volatile organics (EPA 8240), semivolatile organics (EPA 8270), and PCB's (EPA 8080).

The total amount discharged to the sewer is 456,579 gallons.
The monthly discharge total is 232,157 gallons.

If you have any questions concerning this information, please feel free to contact Jim Wallace or myself at (916) 631-0154.

Sincerely,

ANANIA GEOLOGIC ENGINEERING

Todd M. Galati
Project Manager

Jim Wallace
Senior Project Manager
