Discuss her questions,

More correctly site would be placed in the Dep/Ref system which is also where SLIC cases are, regs don't change, would still be a LUFT site. Put in dep/ref as an accomodation to them for expidited oversight for development.

Discussed priorites, human health risk as opposed to accomodation for development

Send deposit request addressed to all RPs for case, not access & followup separetely with multiple payors. RPs responsibility to pay deposit.

Re: oversight, commitment of time, amount of time & if they have disputes.

Case is not immediately closable, addt work will be requested, CW needs to review (substantial file) to see what next steps are to progress ro closure. After that review will have an idea of where case stands. Large file, so anticipate significant quantiy of review time initially hence request for double the initial deposit.
