Dear Ms. Rice,

Attached is our most recent correspondence dated September 26, 2008 sent to the Responsible Parties regarding the ongoing cleanup at the subject site. At this time, it is difficult to determine concentrations of residual contaminants since no documentation regarding the excavation conducted at the subject site has been submitted to ACEH.

Please contact me should you have any questions or concerns regarding the attached correspondence.

Sincerely,

Paresh C. Khatri

Good afternoon Ms. Rice,  
I am responsible for compliance of the current operating tank system at the site.

My colleague, Paresh Khatri, is responsible for overseeing the site remediation. He and I have had conversations of late regarding the site status since the retail station will be commencing operation shortly.

I am sending your request to him so that he may provide guidance in a timely manner.

Please feel free to use me as your point of contact for the operating station issues.  
Sincerely,

Robert Weston  
Alameda County Department of Environmental Health

Dear Mr. Weston:

As you may recall, I represent Aziz and Shakila Kandahari, current owners of the above-referenced site. I have been asked to provide a letter to a third party explaining the current status of the clean-up, and so need your help. When last we spoke about the site, it was subject to natural attenuation monitoring only. I understand that an additional quantity of contaminated soil was removed earlier this year, which I hope accelerated the remediation process. Could you please inform me of the current levels of contaminants, and perhaps provide an estimate of how much more time might be required before an application for closure might be considered? Any other information you think might be helpful would be greatly appreciated.

Yours truly,

Jennifer Rice
