Doug,

I am the caseworker for this site. This site as well as others have been added to my case load.

I reviewed the April 20, 2010 Groundwater Monitoring Report. We concur with the preparation of a Work Plan for soil vapor sampling. Please submit the Work Plan no later than September 22, 2010. In proposing soil vapor sampling locations, the Work Plan should consider the potential receptors for the current building configuration and vadose zone contamination in the source area.

Terminating sampling of MW-4 is acceptable.

Regards,  
Jerry Wickham  
Senior Hazardous Materials Specialist  
Alameda County Environmental Health

Hello Jerry

Steve Plunkett indicates you are the caseworker for this site - if not, can you let us know who is?

I wanted to call you attention to recommendations we made in our last groundwater monitoring report (attached):

- we recommended a soilgas investigation
- upon your approval, we will prepare a workplan

I did not know how busy you are - I just wanted to make sure this didn't fall through the cracks.

Let me know of any questions or comments you may have.

Regards

Doug
