RE: StID # 3920 - Overexcavation and sampling report, Cereske
Electric Cable Co., 1688 - 24th Street, Oakland, California.

Dear Ms. Eberle;

Pursuant to your letter of December 19, 1996 addressed to Ms. Bette Jean Cereske of Cereske Electric Cable Co. this letter report is provided to fulfill the requirement that CEC "submit a report documenting the overexcavation and various rounds of sampling activities that have taken place since tank removal." The location of Cereske Electric Cable Co. (CEC) is shown in Figure 1.

The information contained in this letter report was assembled from the files of H₂OGEOL; Alameda County Department of Environmental Health (ACDEH), Hazardous Materials Inspection Forms; and from file information provided by DECON Environmental Services, Inc. (DECON).

H₂OGEOL provided third party sampling services utilizing Chromalab, Inc. as the State certified analytical laboratory. H₂OGEOL's services were previously documented in three telefaxed reports to your office:

Telefax dated 06/18/96 transmitting sample location information and sample analytical information for samples collected 05/31/96;

Telefax dated 07/09/96 transmitting sample location information and sample analytical information for samples collected 06/24/96;

Telefax dated 08/19/96 transmitting sample location information and sample analytical information for samples collected 08/02/96.

The previously provided remedial excavation confirmation soil samples and sample analytical results are summarized in Figure 2. The previously provided remedial excavation groundwater samples and sample analytical results are summarized in Figure 3, along with a sample representing water pumped from the excavation and temporarily stored in an above ground tank. The previously provided remedial excavation soil stockpile samples and sample analytical results are summarized in Figure 4. Laboratory analytical reports and sample chain-of-custody documentation is provided in Attachment A.

DECON served as the remedial overexcavation contractor. DECON utilized Denbeste Transportation, Inc. for soil off haul and Altamont Landfill/Resource Recovery for soil disposal. The non-hazardous waste manifests and the disposal invoice for 118.15 tons of soil are contained in Attachment B. DECON utilized Evergreen Environmental Services for transportation and disposal of water that was pumped from the excavation. The non-hazardous waste manifests and the disposal invoice for 2,825 gallons of water are contained in Attachment C.

The following chronology was prepared from DECON's Daily Work Ticket's, H₂OGEOL files, and from (ACDEH) Haz. Mat. Inspection forms:

May 23, 1996

DECON mobilized to site, cut the edges of the asphalt and excavated approximately 80 cubic yards of soil, placing the soil on Visqueen and covering with same. Noted odor and arranged for sampling and inspection at a later time.

May 31, 1996

DECON cut the edges of the asphalt and excavated four sampling trenches that were sampled by H₂OGEOL. These were CEC/0531-2 (4.7 Ft.), -3 (4.8 Ft.), -4 (4.5 Ft.), and -5 (3 Ft.). A fifth sample location, CEC/0531-1 (4.55 Ft.), was accessed by hand augering. ACDEH present during majority of activities.

Sample locations CEC/0531-1, through -4, based on maximum excavatable extent. Location 0531-4 based on presence of two adjacent pipes (1.5-in. and 1-in.) in excavation 'south' wall: found both pipelines at locality. Location 0531-5 placed along extension of pipeline orientation, none found.

June 24, 1996

H₂OGEOL sampled three excavation sidewall verification samples (CEC/0624-CS1 through -CS3), one each to the 'south', 'east', and 'west' of the excavation. All three at 3.7 feet below grade. Sample location 0624-CS1 deepened to 4.75 feet and a groundwater sample was collected (CEC/0624-GW1). Three soil stockpile samples (CEC/0624-SP1 to -SP3) were collected from a depth of two feet below pile surface. ACDEH present during majority of activities.

August 02, 1996

DECON loaded soil into a total of five trucks bound for Altamont Landfill and had Evergreen load 2,200 gallons of pit water into a vacuum truck and off-haul. DECON extended excavation (about 30

Ms. Jennifer Eberle
January 15, 1997
Page 3

cubic yards) toward site fence to earlier sample location CEC/0531-3 (ACEHD agreed 'clean line') and along the two pipelines. H₂OGEOL sampled the two newly exposed sidewall locations (CEC/0802-CS1 & -CS2, both at 4.8 feet below grade, and one newly exposed pit floor groundwater inflow stream (CEC/0802-GW1). DECON continued pit excavation along the two pipelines to where they ended at an old cut/broken end just inside the site fence. ACDEH present during majority of activities. DECON backfilled two loads drain rock into excavation.

September 11, 1996

DECON exposed groundwater by removing two to three cubic yards of compacted backfilled drain rock. Had Evergreen load 625 gallons of pit water into a vacuum truck and off-haul.

October 18, 1996

DECON mobilized a 6,500 gallon above ground polytank and sump pump to site.

October 18 to November 18, 1996

Cereske Electric Cable Co. pumped approximately 6,000 gallons of water from pit into polytank.

November 22, 1996

H₂OGEOL sampled the water contained in the polytank.

December 16, 1996

DECON placed and compacted one 'load' drain rock into the excavation. DECON then placed and compacted approximately 80 tons Class II baserock into the excavation to a depth of 6-inches below grade (existing asphalt surface).

December 18, 1996

H₂OGEOL prepared transmittal letter for sample from water in polytank to Kevin Graves of Regional Water Quality Control Board at request of DECON.

Ms. Jennifer Eberle
January 15, 1997
Page 4

This concludes the overexcavation and sampling report for Cereske Electric Cable Co., 1688 - 24th Street, Oakland, California for activities conducted through the end of 1996.

Please do not hesitate to call me at (510) 373-9211 should you have any questions.

Sincerely,

Gary D. Lowe, R.G., C.E.G., C.H.
Principal, Hydrogeologist

xc: Ms. Bette Jean (Buffy) Cereske of Cereske Electric Cable Co.

CEC/-----

- G = TPH-Gasoline
 - B = Benzene
 - T = Toluene
 - E = Ethylbenzene
 - X = Total Xylene Isomers
- All concentrations in mg/Kg

NOTE:

Sample location CEC/0624-CS1 was totally removed during remedial excavation on 08/02/96. Results were G = 510, B = 1.5, T = 17, E = 8.2, and X = 56.

Sample CEC/0531-3 defined "clean" boundary during 08/02/96 remedial excavation. Soil removal southwesterly from this location was to track 1.5-in. and 1-in pipelines previously encountered. Pipes ended roughly at fence line.

I hereby certify that all information submitted in this and all attached documents contains true and accurate descriptions of the waste. All relevant information regarding known or suspected hazards associated with the waste has been disclosed. This further serves as notification that the above liquid wastes are banned from land disposal pursuant to Title 22 Section 66268.7 (a)(10). I also acknowledge that I have read and agree to the terms on the reverse side of this form.
