Subject: RO0000039 Upcoming sampling

Friday September 19th I am planning on sampling the new shallow groundwater monitoring wells that were installed at the site in the first quarter 2009. This will be outside of the new semi-annual monitoring for the site since these well have not been sampled quarterly for one full hydrologic cycle.

Semi-annual monitoring will be performed on all site monitoring wells in the second and fourth quarters.

Patrick Bratton
