Good afternoon Paresh,

Thanks for the return call the other evening.
Quick recap for the reasoning of my call:

Was calling to get an update of our No Further Action request and proposed sampling frequency schedule, and wanting to make sure we stay in compliance until a decision on our NFA request is considered.

In response to your August 13, 2009 Letter, asking for a sampling plan to be proposed, we recommended after sampling the Fourth Quarter 2009, if results were non-detect, the Site be consider for no further action; as the site has been non-detect for four consecutive quarters.

I have attached the historical analytical table from the report.

If you need me to send you a copy of the request, feel free to ask.

Thanks again,

Simon
