Hi Michelle,

Thanks for the site update and extension request. I'd agree the sub-slab sampling timing is appropriate and that the extension would be appropriate as well. Please use this email as confirmation of your request. I'll update Geotracker shortly.

Best,

Subject: Update for 6601/6603 Shellmound (RO42 and RO43)

Mark-

EKI is writing this email on behalf of Sybase. We would like to request an extension to submit the report of groundwater and soil gas sampling results. We obtained access to sample the monitoring wells in early December. That work has been completed. The subslab soil gas sampling is scheduled for this coming Friday, 12/23 to coincide with the Ex'pression winter break (easier access to perform the sampling). Given the holidays, we will not receive the subslab soil gas sampling results until 1/11 or so. Therefore, we would like to propose Fri, 2/10/2012 as the date to submit the report to you.

Also, we did not detect any chlorinated solvents in the groundwater samples. Therefore, the subslab soil gas samples will only be analyzed for petroleum related constituents and the gases (Nitrogen, oxygen, methane, carbon dioxide), as requested in your letter.

Feel free to call me with any questions.

Thanks,
Michelle
