Gentlemen,

ACEH has reviewed and approved the well destruction report dated March 26, 2014 for the subject site. The wells were ordered closed by the SWRCB on March 26, 2013. The wells were destroyed and waste removal documentation initiated on March 17, 2014. Final signoff for waste removal has not been provided, nor has final surface repaving occurred due to inclement weather; however, ACEH is satisfied the wells have been sufficiently destroyed for the purpose of closure of the site by the SWRCB.

Should you have questions, please let me know.
