Xinggang and Nancy,
Please use this email to document an extension of the due dates to March 4, 2016. I have updated Geotracker already.

Thank you Mark, I very much appreciate you to bring the case to compliance!

The samples will be collected and delivered to C&T lab on January 29. The lab has two-week standard turnaround time. I would like to have three weeks for report preparation and internal review process after receiving lab reports. Could you please extend the due date to March 4, 2016?

Thank you very much,

--

Thanks Xinggang; it's appreciated.

Since the City is out of compliance at the site in regards to the deliverables schedule, and the lack of extension requests, I wanted to check to get an estimated date when you think a report would be submitted by. I can use that to extend the due dates and take the site back into compliance.

Let me know.

Thanks,

Mark Detterman

Hello Mark,

We have scheduled PeneCore Drilling to drill three (3) boreholes (direct push method) for soil and grab groundwater sample collection at the City of Emeryville Fire Station #2 (RO#61). The field work is scheduled for January 29 (Friday), starting around 8:30 am.

Drilling locations and drilling permit are attached to this email.

Thanks,
