conference call btwn: Joe Morgan, Jeff Pack, Donna Drogos, myself

according to URS:
closure plan
draft deed restriction
closure summary
are missing

they are not certain but note a lawsuit in the background that may have contributed to stopping the site's process

URS contacted Cambria to look for missing reports, also, tried city of emeryville and rwqcb
Cambria may or may not have the files but would not be willing to release documents without approval of their client

unpaid invoices question from Donna - could that have contributed to slow down of site processing?

URS to compile list of the reports they have, then ACEH to send request to RPs for copies of reports
