Re: Greyhound Terminal
Location 8934
Monthly Monitoring

Dear Ms. Hugo:

On behalf of Greyhound Lines, Inc., Engineering-Science, Inc. (ES) is pleased to submit the November 1992 monthly monitoring report for the Greyhound Terminal in Oakland. Attached you will find Table 1 which lists the measured water levels and free-product thicknesses from on-site wells monitored during our site visit. Figure 1 shows the locations of the monitoring wells.

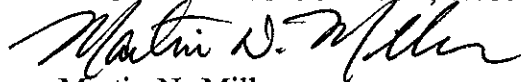

During our site visit on November 6, free-phase hydrocarbons were observed in ES-1, ES-2, ES-5, and BC-1. All other wells were found to be clear.

During the week of November 9 through 13, Greyhound installed the hydrocarbon recovery system to address the free product plume at the facility. The recovery system utilizes monitoring wells ES-1, ES-2, ES-5 and BC-1 to recover free product and groundwater at the site. An installation report is currently being prepared and will be submitted to your office.

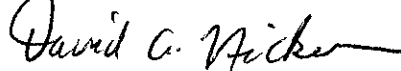

If you have any questions or require additional information, please feel free to contact us at (315) 451-9560.

Sincerely,

ENGINEERING-SCIENCE, INC.
