Subject: RE: RO076 Former BP 4931Paresh:

Hello Hollis,

As discussed on the telephone today, it is acceptable to submit a work plan for installing additional soil vapor monitoring points (including in the kiosk/building) to determine any potential indoor air intrusion at the site, prior to submitting the requested corrective action plan. Please submit the work plan on the date the CAP is due and a revised CAP due date will be identified at a later date.

Sincerely,

Paresh C. Khatri

Subject: RO076 Former BP 4931Paresh:

Paresh:

The directive for the soil vapor sampling indicated we should submit a report for soil vapor and water in June and December, 2011. We are not scheduled to collect 3Q10 groundwater samples from this site until August. Do you want us to present all of the data in the GMR or do you want separate reports? For this round of soil vapor sampling (whether it's a standalone document or merged with the GMR) I was going to submit an installation report and data dump with figures and tables. Then submit a more substantive report after the second round of vapor sampling (if soil vapor and GW monitoring are conducted at approximately the same in the wet season we could submit those together).

Just let me know what you want to see this round and we'll get it to you.

Hollis
