**Subject:** BP's ARCO Sta.#374/ACEH Case #RO78

Hello Paresh,

This email follows up our telephone conversation yesterday afternoon in which we discussed your 4/30/2008 letter re: Fuel Leak Case No. RO0000078 and GeoTracker Global ID T0600100106, ARCO #0374, 6407 Telegraph Avenue, Oakland, CA 94609.

In your technical report request you direct that the Source Area Characterization Work Plan (discussed in your Technical Comment No.1), and Feasibility Study/Corrective Action Plan (discussed in your Technical Comment No.2) both be submitted by 6/30/2008.

Personnel at BAI are in the process of preparing the Source Area Characterization Work Plan by the 6/30/2008 due date for your subsequent review and approval. However, as we discussed BAI respectfully requests extension of the due date for the FS/CAP until after the results are available from the Source Area Characterization investigation called for above. I recall that you seemed receptive to our proposal that the due date for the FS/CAP be extended to 30 days following our receipt of results from the Source Area Characterization. Should this proposed extension of the due date for the FS/CAP meet with your agreement, the favor of a written reply in the affirmative would be appreciated.

Should you wish to discuss this Site further, please contact me at your convenience. However, I will be unavailable next week, returning on 6/16/2008. In my absence, you may contact Rob Miller at 775-322-7969 or via email.

Respectfully,

Tom Venus, PE
