Importance: High

Hi Karel,

I hope this finds you well. I understand that, in correspondence on June 29, 2018 from Ms. Wong, an extension request of August 10 was made to prepare the Soil and Groundwater Investigation and Updated SCM Report for the ARCO #0374 located at 6407 Telegraph Avenue in Oakland, California. Correspondence indicated that samples were broken upon receipt by the laboratory and resampling was required. It has come to our attention that since Ms. Wong's departure from Arcadis the laboratory analytical results were either not received from the laboratory or saved with the project file appropriately. Arcadis has reached out to the laboratory to obtain the missing laboratory reports, but would like to request an extension to prepare the Soil and Groundwater Investigation and Updated SCM Report for submittal by end of day September 7, 2018.

We sincerely apologize for this continued delay and would greatly appreciate your cooperation as we work to rectify the situation. Should you have any questions or concerns, please do not hesitate to reach out to either myself or James Jacobsen directly.

Thank you,
