

1-26-2000 Left mess. with Paul Jones with Artesian Environmental to send me a copy of the lab results and field notes for the UGT removal in 1998

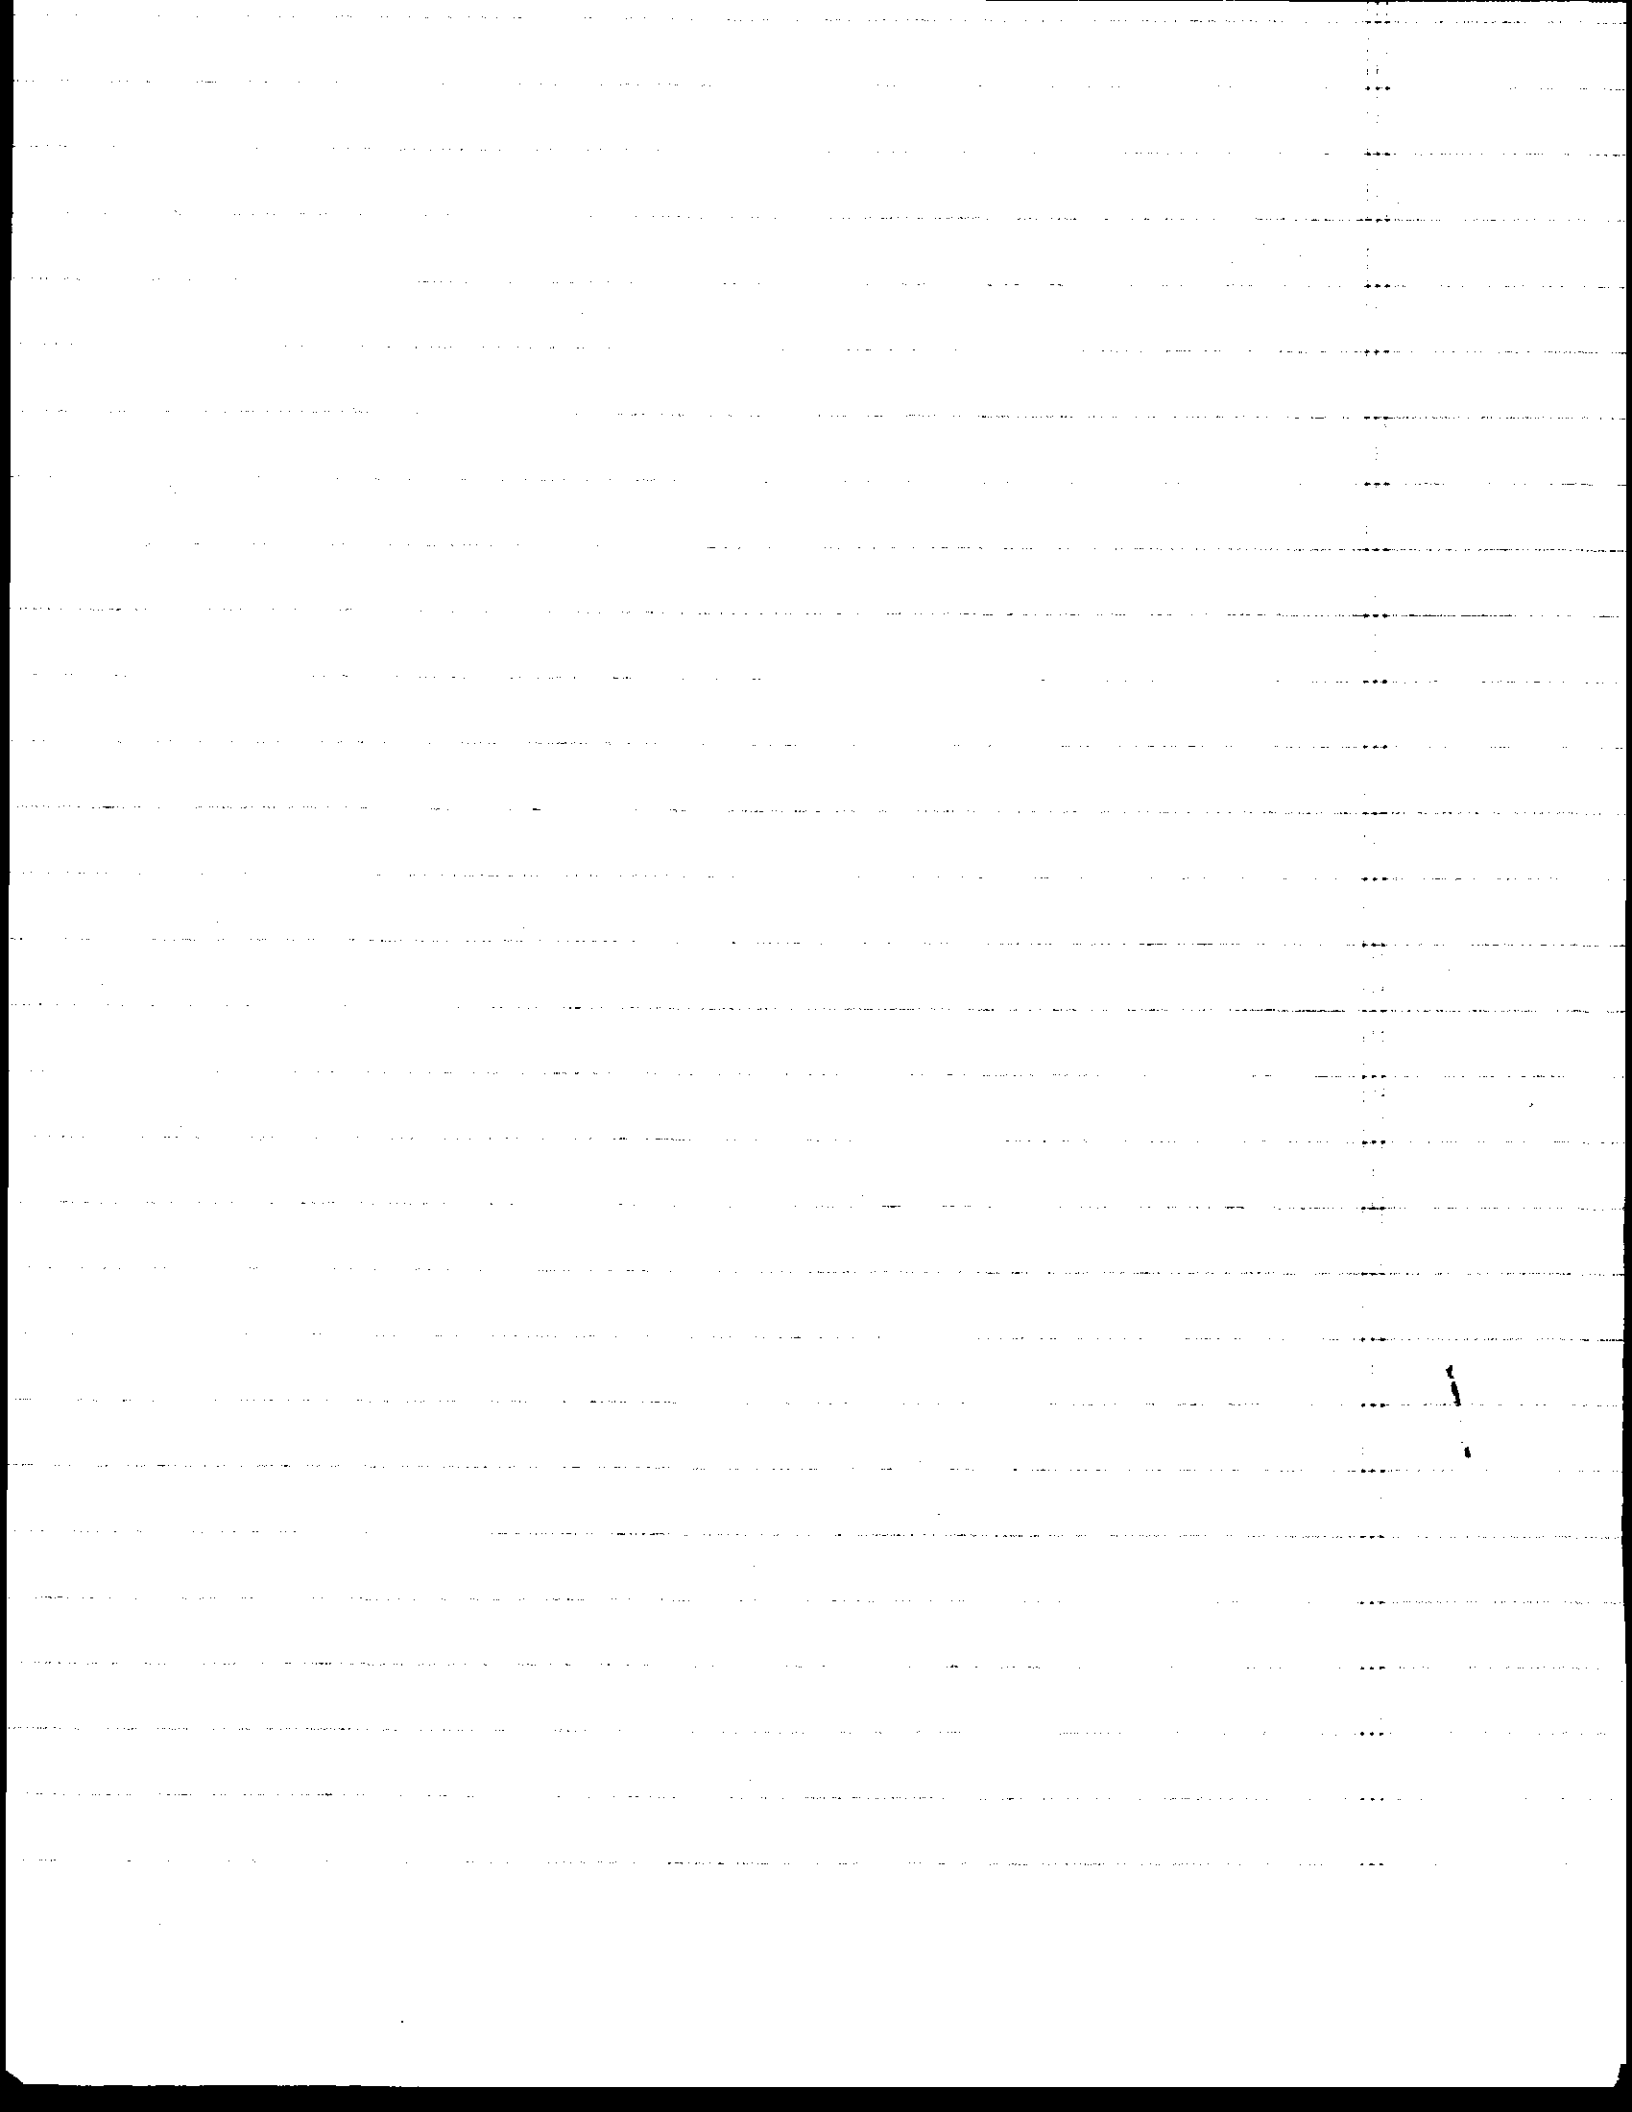

Met with Alan Wosny, former property owner who sold the property to Nady. Wosny purchased the property ^{in 1979} from Transwestern, A California Corp. that was owned by Coit. Nady was already a tenant in the building at the time Wosny purchased it. Nady moved into the site in ~ 11/78 (lease contract signed on 10-6-78) Nady was Wosny's only tenant when he owned the property from ~~1979~~ 1979-1986. Wosny sold the property to Nady in 1986.

There are still a couple of questions:

1) When did Dymo purchase Transwestern?
 1-27-2000 2) ~~When~~ Did Dymo own Transwestern when they last used the UGT?

Susan feels Coit should still be named as an R.P. since they haven't proved Transwestern didn't use the tanks during their ownership. In addition, Coit did not remove the product from the tanks; they could still be in operation.

3) Can a parent company be held responsible ~~if~~ for clean-up cost if the subsidiary causes the problem, but is no longer around.

Transwestern was a Calif Corp. according to Title papers in 8/78 when Wassy was in the process of buying the property

Alan purchased site on 2-27-79 from Coit who owned Transwestern. Nody moved into building when Coit still owned it in ~ 11/78 (contact signal on 10-6-78)

~~Alan removed~~ 8,000 gal UGT installed in 8/76.
1982 this UGT was removed because popped out of ground. Removed by Alan.
Trans

Marshall Shell and Transwestern were owned by Coit in 1978.
↑
Corp.

~~Transwestern~~

Transwestern was a CA corp. - owned the site in 1971 per city of Oak Point.

Nody was Wassy's only tenant when he owned property from 1979 - 1986. Sold to Nody in 1986.

1981 Nody was having silt lines removed and fires occur.

* Aced. What did Coit do with Transwestern sewer

* When did Dynas buy Trans Western, and become a shore sewer.
Oak has plans of UGT from 1957 ← Bailey Dept (2nd floor)
