Duration: 0 hours

Phone call with Kathy Isaacson of PG&E (phone 415-392-3875). She is the new project manager, taking over from Ann Conner. Another group within PG&E conducted an internal inspection of the asphalt at the site and repaired and sealed the asphalt. In order to avoid destroying the repairs, PG&E would like to delay implementation of the cap for another year. They realize that the repairs do not represent the long-term solution for a cap. With that understanding, I agreed that delaying implementation to avoid destroying the repairs makes sense. Ms. Isaacson will submit a letter with photos of the repairs. PG&E will also submit a proposal regarding destroying monitoring wells at the site. The monitoring wells may have a use for the Learner property.
