ENVIRONMENTAL

Ms. Roe:

This letter is in response to Alameda County Environmental Health's email from July 13, 2014 asking for verification that all investigation derived waste has been removed from the site. On January 30, 2013 the four monitoring wells associated with the site were pressure grouted per county standards, so only metal well boxes and vault lids were accumulated. These were taken by Gregg Drilling and Testing, Inc. for metal recycling. The minor groundwater that was collected when installing tremie pipe down-well to remove casing water prior to pressure grouting was reused to mix grout. No other remediation equipment/supplies, structures, or waste of any kind remains on-site.
