**SUBJECT: SOIL SAMPLING , TREATMENT & DISPOSAL
OF CONTAMINATED STOCKPILED SOIL
FROM THE PROPERTY**

Located at 2740 98th Avenue, in
Oakland, California

Dear Ms. Faraji:

This report summarizes the results of our on-site treatment of approximately 100 yards of contaminated soil excavated from former underground tank area at 2740 98th Avenue, in Oakland, California (Figure 1)

The excavated contaminated soil was stockpiled on a plastic liner at east side of the property (Figure 2). The stockpiled soil was sampled to characterize the soil prior to on-site bio-treatment. Three discrete soil samples were collected from the stockpile on

November 19, 1998. The soil samples were taken randomly at various depths in the stockpile and were labeled as SP-1, SP-2 and SP-3. The stockpiled soil samples were composited in the laboratory into one composite sample that was analyzed for Total Petroleum Hydrocarbons as gasoline and diesel (TPHg and TPHd); Benzene Toluene, Ethylbenzene, Total Xylenes (BTEX); Total Oil & Grease (TOG); Methyl Tertiary Butyl Ether (MTBE); Cadmium, Chromium, Lead, Nickel and Zinc (Cd, Cr, Pb, Ni, Zn). A summary of the analytical results prior to bio-treatment is presented in Table 1.

The stockpiled soil was mixed thoroughly with horse manure and spread. A dilute mixture of nutrient elements (Nitrogen and Phosphorous) was sprayed on the soil surface in order to maintain soil moisture and to stimulate bacterial growth. The stockpiled was covered with plastic except during mixing, fertilizer application and sampling.

On January 11, 2000, the stockpile was resampled to determine the level of the contamination. The verification samples and analysis showed that the treatment was successful in reducing the elevated level of hydrocarbons in the stockpile. The location of samples are shown on Figure 3. Table 2 summarizes the analytical results after bio-treatment.

The BFI Sanitary Landfill, Inc. was provided with results of the analyses of prior bio-treatment and after bio-treatment soil. BFI authorized disposal of the stockpiled soil at their landfill at 4001 north Vasco Road, Livermore, California. Accordingly, the treated soil was disposed at the landfill on January 29, 2000 and March 11, 2000.

File No. 7-93-556-SI

Copies of the laboratory testing during characterization, treatment, over-excavation, request for disposal of contaminated soil and receipts from the landfill where the soil was disposed of are attached.

If you have any questions or require additional information, please feel free to contact our office at (408) 297-1500.

BFI - Vasco Road Landfill

**SUBJECT; REQUEST FOR DISPOSAL OF CONTAMINATED
SOIL FROM THE PROPERTY**

Located at 2740 98th Avenue, in
Oakland, California

Dear Ms. Erlandson:

Enclosed is information regarding motor oil contaminated soil that we wish to dispose of at BFI landfill.

The soil stockpile is a results of the removal of underground waste oil storage tank from the property located at 2740 98th Avenue, in Oakland, California.

The soil stockpiled is approximately 100 yards, and it is currently stored on-site and treated by bio-remediation.

The stockpiled soil was mixed thoroughly and spread. A dilute mixture of nutrient elements (Nitrogen and Phosphorous) were sprayed to the soil surface on a weekly basis in order to maintain soil moisture and to stimulate bacterial growth. The pile was covered with plastic except during mixing, fertilizer application and sampling.

After treatment of the stockpiled soil, samples were dug out from within the stockpile, with the aide of a hand sampler, in a brass tube. Four discrete soil samples were taken from the stockpiled on January 13, 2000, which were composited into one sample by the laboratory. The ends of the tube were capped and sealed, and the tube was labeled and placed in an ice chest for delivery to Priority Environmental Labs, in Milpitas, accompanied by the proper chain-of-custody documentation.

Per BFI sampling protocol, the composite soil sample was analyzed for Motor Oil, BTEX, CAM 17, EPA Methods 8260 and 8270.

Please review this information as soon as possible. We would like to start transporting the soil as soon as possible.

Thank you for prompt response. Should you have any questions or require additional information, please feel free to contact our office at (408) 297-1500.

Sincerely,
