Contact Log (2740 98th Ave.)

5/28/96 Frank Hamudi - (408) 441-1881 - Discussed April 10 '96 addendum w/ Mr. Hamudi. Discussed rationale for why wells were proposed in ^{those} locations. He stated that STMW-4 located in presumed downgradient direction, STMW-5 was proposed in area to address former piping trench contamination, and STMW-6 proposed d.g. of existing waste oil OST. I requested that he overlap a to-scale drawing of piping location over site map & submit more detailed discussions for why wells proposed in these locations, & what their plans are for W-4.

5/28/96 Left message for K Ghofrani to relay my discussion w/ Mr. Hamudi.
