Re: Alaska Gas Station 6211 San Pablo Avenue, Oakland, CA 94608

Dear Ms. Hugo:

Neither the tanks nor the pipe lines ever leaked. We are regularaly submitting tank and pipe test report every year to your department.

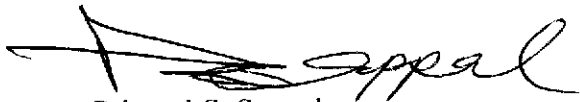

In 1993, one of the check valve was repaired. The mechanic did not properly tightened the bolts. As a result some gas sipped out.

We had submitted the soil samples to your department. The soil was excavated and a few weeks later the subject area was resurfaced.

We respectfully submit that the leak was very minor ; the soil was excavated and the excavated site was inspected by Mr. Brian P Oliva in 1993.

If you need any further information please donot hesitate to contact me.

Yours truly,

Pritpaul S. Sappal
