---

**Subject:** RO133 City of Paris Drilling  
**Entry Type:** Phone call  
**Company:** Taber Consultants

**Start:** Thu 5/5/2011 10:00 AM  
**End:** Thu 5/5/2011 10:20 AM  
**Duration:** 20 minutes

Ellen Pyatt calls to inform me that the drilling along Chestnut St. has encountered petroleum hydrocarbons at 5 feet in what appears to be a utility line. This location is close to the Zimmerman property and nearby to their former fuel UST. Taber will not advance the boring to the total depths proposed because they do not want to drag the product down. However, they will collect soil samples to run petroleum hydrocarbons on and see if it is from their site or possibly from the Zimmerman site.
