Subject: Fuel Leak Case No. RO0000139 and GeoTracker Global ID T0600100882,  
Mehdizadeh Property, 5175 Broadway, Oakland, CA 94611

Dear Mr. Mehdizadeh and Mr. Nadel

Alameda County Environmental Health (ACEH) has received your request for an additional meeting. The request was sent by email from Mr. Bob Clark-Riddell on August 13, 2012. ACEH staff recently met on July 6, 2012 with Mr. Ryan Leong, Mr. Robert Russell, and Mr. Clark-Riddell. The meeting included discussion of two outstanding work plans, one for the introduction of NONTOX, a bio-catalytic formulation, and a work plan for a soil-gas survey, and mitigation measures that might potentially be undertaken concurrent with remediation and construction phases as site development goes forward. At the meeting Mr. Clark-Riddell proposed preparing a revised work plan for performing the soil gas survey. ACEH received the revised work plan, dated July 16, 2012, on July 19, 2012. On August 3, 2012, Mr. Clark-Riddell followed up with a phone call requesting ACEH not to review the addendum work plan as it would be modified yet again. ACEH received the most recent revision of the soil gas sampling work plan dated August 6, 2012 on August 16, 2012. On It is not clear if the document ACEH is to review is the July 16, 2012 revised workplan, as specified by Mr. Clark-Riddell in his August 13 email, or the revised addendum work plan dated August 6. Please clarify.

We request that you address the following technical comments, perform the proposed work, and send us the technical reports requested below.

#### **TECHNICAL COMMENTS**

**1. Baseline Environmental Project Schedule** – Mr. Clark-Riddell has proposed a second meeting the purpose of which is to outline a tentative timeline and program for regulatory case closure. The email states you are considering a closure using the Low Threat Closure Policy, a policy anticipated to be implemented at a future date to be determined by the State. In order to facilitate scheduling a meeting, please submit a proposed Baseline Environmental Project Schedule (Project Schedule) document. The Project Schedule will include the environmental work that will be required to collect any required data, conduct any required remediation, monitor remediation and mitigation measures, commence site construction, and obtain site closure should

a non-Low Threat Closure be pursued, or the tasks as needed. The Project Schedule should be a focused schedule that includes only site development activities that are impacted by the environmental schedule (i.e., planning review/approval process, architectural design/approval process, issuance of building permit, site demolition, grading, construction activities, issuance of occupancy permits, etc.). The Project Schedule should include, but not be limited to, the following key environmental elements and milestones:

- Potential Additional Remedial Actions, Feasibility Studies, and /or Corrective Action Plans
- Monitoring Well Installation/Decommissioning/Replacement
- Short Term Mitigation Measures Incorporated into Site Redevelopment during any Potential Additional Remediation Phase
  - Remediation Phase Vapor Intrusion Membrane and Sub-Slab Ventilation System, and Operation and Maintenance Plan
  - Risk Management Plan for Site Earthwork Activities
  - Monitoring Plans (Vapor Intrusion/Groundwater)
- Public Participation Program (Fact Sheet Preparation/Distribution/Public Comment Period, Community Meetings, etc.)

Please use a critical path methodology/tool to construct a schedule with sufficient detail to support a realistic and achievable project schedule. The schedule is to include at a minimum:

- Defined work breakdown structure including summary tasks required to accomplish the project objectives and required deliverables
- Summary task decomposition into smaller more manageable components that can be scheduled, monitored, and controlled
- Sequencing of activities to identify and document relationships among the project activities using logical relationships
- Identification of critical paths, linkages, predecessor and successor activities, leads and lags, and key milestones
- Identification of entity responsible for executing work
- Estimated activity durations (ACEH review times are based on calendar days)

Please include a narrative identifying assumptions (i.e., analytical laboratory turnaround time, ACEH review time, number of review cycles, etc.), project constraints, and contingency plans. Also, include a discussion about proposed schedule compression techniques (i.e., cost and schedule tradeoffs, fast tracking, etc) to shorten the environmental project schedule without changing the project scope, in order to meet schedule constraints, imposed dates, or other site redevelopment schedule objectives.

Please submit an electronic copy of the focused Baseline Project Schedule and schedule updates in portable data format (pdf) as well as a paper copy (Attn: Keith Nowell) in accordance with the dates listed below. ACEH will review the schedule and provide comment with respect to inclusion

of key elements (e.g., submittal/approval of work plans, public participation documents, etc.) and proposed ACEH review times.

**2. Electronic Submittal of Information (ESI) Compliance** – A review of the SWRCB GeoTracker and ACEH FTP databases indicates the site is still out of compliance with Geotracker and ACEH upload requirements. Site data and documents are maintained in two separate electronic databases – the county's FTP site and the SWRCB's GeoTracker database. Both databases act as repositories for regulatory directives and reports, however, only GeoTracker has the functionality to store electronic compliance data including analytical laboratory data for soil, vapor and water samples, monitoring well depth-to-water measurements, and surveyed location and elevation data for permanent sampling locations. Although the SWRCB is responsible for the overall operation and maintenance of the GeoTracker System, ACEH, as lead regulatory agency, is responsible to ensure the GeoTracker database is complete and accurate for sites regulated under ACEH's Environmental Cleanup Oversight Programs (SWRCB March 2011 document entitled *Electronic Reporting Roles and Responsibilities*).

Because GeoTracker is often used as the sole source of information at sites where chemical releases have occurred, the accuracy, completeness, and timeliness of the information on the database is critical in the following realms in order to facilitate review and analysis of data and informed decision making that is protective of health, safety and the environment:

- The public domain during the public participation process as required by Title 23 of the California Code of Regulations (CCR), Chapter 16, Section 2728;
- The real-estate industry during property transactions;
- RPs, consultants, and the ACEH during the site investigation, corrective action, monitoring, and case closure process; and
- State and federal government during decision making related to closure recommendations and petitions, priorities and funding, and evaluation of the UST cleanup program effectiveness.

A review of the case file indicates that the SWRCB GeoTracker database is not complete, thus rendering the site to a non-compliant status pursuant to California Code of Regulations, Title 23, Division 3, Chapter 30, Articles 1 and 2, Sections 3890 to 3895. At present missing data and documents include, but may not be limited to:

- complete copies of reports, in pdf format, including the signed transmittal letter and professional certification (GEO\_REPORT files);
- analytical data for soil, water and vapor samples collected for the purpose of subsurface investigation or remediation, including influent/effluent water samples from remediation systems (EDF files);
- horizontal and vertical well location data (GEO\_XY and GEO\_Z files);
- depth to groundwater data (GEO\_WELL files);
- stand alone site maps displaying tank locations, streets bordering the facility, and sampling locations for all soil, water and vapor samples (GEO\_MAP files);
- stand alone boring logs (GEO\_BORE files).

Mr. Mehdizadeh and Mr. Feiner  
RO0000139  
August 22, 2012, Page 4

To expedite this goal, ACEH has compiled a comprehensive index of compliance documents and data for the site contained in both the county FTP site and the SWRCB GeoTracker website, and identified specific items requiring upload to the databases (Table 1). Additionally, in order to facilitate ease of review and document sorting capabilities, we have provided a file naming convention for the GeoTracker submittals that is consistent with the naming convention used for files on the county's FTP site. Please upload the requisite data and documents in accordance with the naming convention provided in Table 1, to the SWRCB GeoTracker website by the date specified below. Copies of historic reports contained on the ACEH FTP site can be uploaded to the GeoTracker database for this purpose. Also, please transmit all analytical laboratory results collected for the purpose of subsurface investigation or remediation in a comprehensive excel spreadsheet to ACEH via email ([keith.nowell@acgov.org](mailto:keith.nowell@acgov.org)) in order to facilitate electronic access and review of historic data.

Please perform the requested work and submit technical reports to Alameda County Environmental Health Environmental Health (Attention: Keith Nowell), according to the following schedule:

- **September 19, 2012** – Baseline Environmental Project Schedule  
File to be named: ADD\_R\_BASE\_SCH\_yyyy-mm-dd
- **September 19, 2012** – Electronic Submittal of Information

Upon receipt and review of the Environmental Project Schedule a meeting will be scheduled with ACEH.

Our file does not contain email addresses for the two Mehdizadeh's. Please provide the email addresses in order to expedite future communications.

If you have any questions, please call me at (510) 567-6764 or send me an electronic mail message at [keith.nowell@acgov.org](mailto:keith.nowell@acgov.org).

Sincerely,

Keith Nowell PG, CHG  
Hazardous Materials Specialist

## Responsible Party(ies) Legal Requirements/Obligations

### REPORT REQUESTS

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

### ELECTRONIC SUBMITTAL OF REPORTS

ACEH's Environmental Cleanup Oversight Programs (LOP and SLIC) require submission of reports in electronic form. The electronic copy replaces paper copies and is expected to be used for all public information requests, regulatory review, and compliance/enforcement activities. Instructions for submission of electronic documents to the Alameda County Environmental Cleanup Oversight Program FTP site are provided on the attached "Electronic Report Upload Instructions." Submission of reports to the Alameda County FTP site is an addition to existing requirements for electronic submittal of information to the State Water Resources Control Board (SWRCB) GeoTracker website. In September 2004, the SWRCB adopted regulations that require electronic submittal of information for all groundwater cleanup programs. For several years, responsible parties for cleanup of leaks from underground storage tanks (USTs) have been required to submit groundwater analytical data, surveyed locations of monitoring wells, and other data to the GeoTracker database over the Internet. Beginning July 1, 2005, these same reporting requirements were added to Spills, Leaks, Investigations, and Cleanup (SLIC) sites. Beginning July 1, 2005, electronic submittal of a complete copy of all reports for all sites is required in GeoTracker (in PDF format). Please visit the SWRCB website for more information on these requirements ([http://www.waterboards.ca.gov/water\\_issues/programs/ust/electronic\\_submittal/](http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/)).

### PERJURY STATEMENT

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

### PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

### UNDERGROUND STORAGE TANK CLEANUP FUND

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

### AGENCY OVERSIGHT

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

<b>Alameda County Environmental Cleanup Oversight Programs (LOP and SLIC)</b>	<b>REVISION DATE:</b> July 20, 2010
	<b>ISSUE DATE:</b> July 5, 2005
	<b>PREVIOUS REVISIONS:</b> October 31, 2005; December 16, 2005; March 27, 2009; July 8, 2010
<b>SECTION:</b> Miscellaneous Administrative Topics & Procedures	<b>SUBJECT:</b> Electronic Report Upload (ftp) Instructions

The Alameda County Environmental Cleanup Oversight Programs (LOP and SLIC) require submission of all reports in electronic form to the county's ftp site. Paper copies of reports will no longer be accepted. The electronic copy replaces the paper copy and will be used for all public information requests, regulatory review, and compliance/enforcement activities.

## REQUIREMENTS

- **Please do not submit reports as attachments to electronic mail.**
- Entire report including cover letter must be submitted to the ftp site as **a single portable document format (PDF) with no password protection.**
- It is **preferable** that reports be converted to PDF format from their original format, (e.g., Microsoft Word) rather than scanned.
- **Signature pages and perjury statements must be included and have either original or electronic signature.**
- **Do not password protect the document.** Once indexed and inserted into the correct electronic case file, the document will be secured in compliance with the County's current security standards and a password. **Documents with password protection will not be accepted.**
- Each page in the PDF document should be rotated in the direction that will make it easiest to read on a computer monitor.
- Reports must be named and saved using the following naming convention:

RO#\_Report Name\_Year-Month-Date (e.g., RO#5555\_WorkPlan\_2005-06-14)

## Submission Instructions

- 1) Obtain User Name and Password
  - a) Contact the Alameda County Environmental Health Department to obtain a User Name and Password to upload files to the ftp site.
    - i) Send an e-mail to [deh.loptoxic@acgov.org](mailto:deh.loptoxic@acgov.org)
  - b) In the subject line of your request, be sure to include **"ftp PASSWORD REQUEST"** and in the body of your request, include the **Contact Information, Site Addresses, and the Case Numbers (RO# available in Geotracker) you will be posting for.**
- 2) Upload Files to the ftp Site
  - a) Using Internet Explorer (IE4+), go to <ftp://alcoftp1.acgov.org>
    - (i) Note: Netscape, Safari, and Firefox browsers will not open the FTP site as they are NOT being supported at this time.
  - b) Click on Page located on the Command bar on upper right side of window, and then scroll down to Open FTP Site in Windows Explorer.
  - c) Enter your User Name and Password. (Note: Both are Case Sensitive.)
  - d) Open "My Computer" on your computer and navigate to the file(s) you wish to upload to the ftp site.
  - e) With both "My Computer" and the ftp site open in separate windows, drag and drop the file(s) from "My Computer" to the ftp window.
- 3) Send E-mail Notifications to the Environmental Cleanup Oversight Programs
  - a) Send email to [deh.loptoxic@acgov.org](mailto:deh.loptoxic@acgov.org) notify us that you have placed a report on our ftp site.
  - b) Copy your Caseworker on the e-mail. Your Caseworker's e-mail address is the entire first name then a period and entire last name @acgov.org. (e.g., firstname.lastname@acgov.org)
  - c) The subject line of the e-mail must start with the RO# followed by **Report Upload.** (e.g., Subject: RO1234 Report Upload) If site is a new case without an RO#, use the street address instead.
  - d) If your document meets the above requirements and you follow the submission instructions, you will receive a notification by email indicating that your document was successfully uploaded to the ftp site.
