

CONTACT LOG (5921 Shepherd Canyon, Oakland)

10/29/99 Called Glen Young, SCZ, 510-268-0461 & left message inquiring as to whether the proposed work outlined in the April 27 '99 report was implemented, & if so, where is the report documenting this work?

10/29/99 Called & left message for Odili Ojukwu, (510) 238-7371, w/ the same message I left Glen Young above. Requested that he return my call.

11/02/99 Glen Young, SCZ, returned call & left message stating that the proposed work was implemented and the report completed, however, he wants to meet w/ Odili Ojukwu first to discuss report before submitting it to the County. He will meet w/ Odili Ojukwu on 11/02/99.

CONTACT LOG (5921 Shepherd Canyon, Oak.)

- 09/08/98 - Left message for Andrew Clark Clough, (510) 238-6361, to request sample analysis results, tank removal report, and any additional reports or info they may have on site subsequent to the tank removal. Need copies of manifests, etc.
- 09/10/98 - Andrew Clark Clough called & said he would look for additional files/info & get back to me when he gets the info.
- 09/29/98 - Andrew Clark Clough called to say that the City of Oakland has no files on this site. Copies of County files mailed on 09/29/98.
- 01/05/98 - Left message for Mr. Odili Ojuewa, City of Oakland (510) 238-7371. Since our meeting on Nov 23 '98, no Schedule of Work was submitted for the agreed upon work at the site. Mr. Ojuewa ^{had} stated that he would submit the SOW in Dec '98. I requested that he return my call.
- 02/21/99 - Left message for Mrg Mndoga, Seaboard Consultants, Inc, (510) 268-0461, in regards to my review of Feb 17, '99 workplan. Mentioned that boring shall be drilled down to 50' bgs in the gas tank pit where previous gas/Btox conc. were identified. Also, ~~was~~ inquired about screened interval for temporary well. Requested that Mrg Mndoga return my call.

CONTACT LOG (5921 Shepherd Canyon, Oakland)

02/23/99 Meg Mendoza, Subsurface Consultants, (510)268-0461, returned call and we discussed my comments on workplan. I told her I would write letter documenting my comments. Ms. Mendoza stated that they will be going out this week to site w/ geophysical surveying devices to try and locate other tanks that were alluded to in earlier documents. She will also try and confirm ~~other tanks~~ the location of the former gas tank location that identified the contaminants, so that they can place boring in that location.

03/01/99 Meg Mendoza, Subsurface Consultants, called to say that the drilling at site would begin on Friday, March 5 '99.

04/15/99 Glen Young, Subsurface Consultants, (510)268-0461, called to discuss the results of the recent soil & g.w. sampling at site. Also, discussed required additional work in response to sample results. I stated that based on the fact that 12ppb benzene was identified in the "grab" g.w. sample, one permanent well would be required w/in 10 feet of downgradient of the former VST. Subsequent work may involve addressing any risks to health & environment, and attenuation of plume, possibly through the collection of bio-indicator parameters. Discussed the Oakland Re-development threshold values & RBCA.

A report will be submitted by end of April 1999.

7/8/92

Keihan

Talked to Keiharu Esasawa 238-6327
City of Oakland

Will submit analytical results by this week
