Hello Mark,

Thank you for your response, I will send a request to release the building permits with the condition that the developer maintains communication with ACEH and Oakland Fire during the grading and construction phases of the project.

Don,

Please release the grading and construction permits for the 1633 Harrison Street project with the provision that a soils management plan is provided to OFD. This action can be conducted concurrently with the release of the permits.

Thanks.

LeRoy Griffin

Hi all,

I didn't have an opportunity to respond yesterday; it was a bit hectic...

Regardless, please use this email to confirm that ACEH is in agreement that the pending redevelopment will not interfere with Chevron's proposed remedial actions and their obligations both on- and off-site. I've attached a copy of a letter ACEH issued back in May 2009 in regards to the affect of redevelopment on the onsite portion of remediation. At this point I've not seen anything to disagree with statements contained in the letter. Offsite investigations / monitoring are currently continuing.

Hope this helps,

Good afternoon Mark – As you know, Fugro is providing environmental consultation to OHA on this project. OHA has secured their grading permit for the Site and is in the process of procuring their other City permits (Street Obstruction and P Job (Improvement Permit)) to proceed with construction of the new building. Currently those permits are on hold pending input from Leroy Griffin as the City's environmental expert and representative of the CUPA. The City Permit Department by way of their CUPA (Leroy Griffin) has requested confirmation from the LOP that the proposed development plan will not interfere with Chevron's proposed Remedial Actions and obligations both onsite and offsite.

Would you be so kind as to respond with such concurrence in this email so that OHA can forward an email to Leroy?
