Subject: RO155- Mills College
Entry Type: Phone call

Start: Wed 12/18/2013 11:32 AM
End: Wed 12/18/2013 11:37 AM
Duration: 5 minutes

Returned voice mail from Lee Dooley of EquoLogic re fuel leak case RO155- Mills College. Mr. Dooley is attempting to execute the work plan but has advanced his borings to 20 feet bg and no water has entered the borings. He asked what to do. He cannot move to new locations as they would be outside the USA markings. Mr. Dooley reported GW is a nearby monitoring well is at 13 feet. I told him to leave the holes open as long as possible- he cannot secure them overnight. If no water then advance new borings adjacent to the existing ones and recover soil samples at the top of the saturated zone.
