Tyson,

I left a voice mail on Monday January 14th with the Reese's. I have not heard back yet if they would like to proceed with the sampling. ACEH cannot provide an indemnification for contamination as ACEH did not cause the release, but is simply investigating. If the Reese's would like to know if this contamination might be in their well, or in their neighbor's wells, this is their opportunity to act. ACEH will not have the ability to request this of the RP in the future. This is their decision; we are only providing the opportunity.

Mark,

   The last we spoke regarding the Rasco site, you had mentioned that the County was unwilling to furnish a letter holding the property owner (20555 Garden Ave) harmless for any damages, or liability from the sampling of their well. I understand you were planning to call the property owner to discuss the possibility of entering their property without this letter and if this wasn't a possibility you would consider closure for the site. Please let me know what the current status is.

Regards,
