**SUBJECT: STOCKPILED SOIL SAMPLING , TREATMENT
AND DISPOSAL OF CONTAMINATED
STOCKPILED SOIL FROM THE PROPERTY**

Located at 20570 Stanton Avenue, in
Castro Valley, California

Dear Mr. Kapoor:

This report summarizes the results of our on-site treatment of approximately 300 yards of contaminated soil excavated from former underground tanks areas at 20570 Stanton Avenue, in Castro Valley, California (Figure 1)

The excavated contaminated soil was stockpiled on a plastic liner at north side of the property (Figure 2). The stockpiled soil was sampled to characterize the soil prior to on-site bio-treatment. Five discrete soil samples were collected from the stockpile on

February 24, 2000. The soil samples were taken randomly at various depths in the stockpile and were labeled as STP-1 through STP-5. The stockpiled soil samples were analyzed for Total Petroleum Hydrocarbons as gasoline (TPHg); Benzene Toluene, Ethylbenzene, Total Xylenes (BTEX); Methyl Tertiary Butyl Ether (MTBE) and Total Lead (Pb). A summary of the analytical results prior to bio-treatment is presented in Table 1.

The stockpiled soil was mixed thoroughly with horse manure and spread. A dilute mixture of nutrient elements (Nitrogen and Phosphorous) was sprayed on the soil surface in order to maintain soil moisture and to stimulate bacterial growth. The stockpiled was covered with plastic except during mixing, fertilizer application and sampling.

On June 26, 2000, the stockpile was resampled to determine the level of the contamination. The verification samples and analysis showed that the treatment was successful in reducing the elevated level of hydrocarbons in the stockpile. The location of samples are shown on Figure 3. Table 2 summarizes the analytical results after bio-treatment.

The Republic Services Vasco Road Landfill (former BFI Sanitary Landfill, Inc.) was provided with results of the analyses of prior bio-treatment and after bio-treatment of stockpiled soil. After review of the laboratory test results, Republic Services Vasco Road Landfill authorized the disposal of the stockpiled soil at their landfill at 4001 north Vasco Road, Livermore, California. Accordingly, the treated soil was disposed at the landfill on July 21, 25 and 26, 2000.

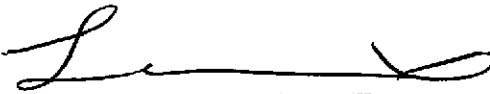

Copies of the laboratory testing during characterization, treatment, request for disposal of contaminated soil and receipts from the landfill where the soil was disposed of are attached.

If you have any questions or require additional information, please feel free to contact our office at (408) 297-1500.

Sincerely,

On February 29, 2000, samples were received under documented chain of custody. Results for the following analyses are attached:

<u>Matrix</u>	<u>Test</u>	<u>Method</u>
Solid	BTEX+MTBE	EPA 8020
	Lead	EPA 6010B
	TPH as Gasoline	EPA 8015 MOD. (Purgeable)

Chemical analysis of these samples has been completed. Summaries of the data are contained on the following pages. USEPA protocols for sample storage and preservation were followed.

Entech Analytical Labs, Inc. is certified by the State of California (#2346). If you have any questions regarding procedures or results, please call me at 408-735-1550.

Date Collected: 6/26/00
Date Received: 6/28/00
P.O. Number:

On June 28, 2000, samples were received under documented chain of custody. Results for the following analyses are attached:

<u>Matrix</u>	<u>Test</u>	<u>Method</u>
Solid	Composite Gas/BTEX/MTBE	Composite EPA 8015 MOD. (Purgeable) EPA 8020 EPA 6010B
	Lead	

Case Narrative: Report re-issued 08/17/00 to separate liquid results from solid results per client's request. Chemical analysis of these samples has been completed. Summaries of the data are contained on the following pages. USEPA protocols for sample storage and preservation were followed.

Entech Analytical Labs, Inc. is certified by the State of California (#2346). If you have any questions regarding procedures or results, please call me at 408-735-1550.

Sincerely,

Michelle L. Anderson

Mr. Eric Horton

BFI - Vasco Road Landfill
4001 North Vasco Road
Livermore, California 94550

**SUBJECT; REQUEST FOR DISPOSAL OF CONTAMINATED
SOIL FROM THE PROPERTY**

Located at 20570 Stanton Avenue, in
Castro Valley, California

Dear Mr. Horton:

Enclosed is information regarding petroleum contaminated soil that we wish to dispose of at BFI landfill.

The soil stockpile is a results of the removal of underground two 10,000 gallon gasoline storage tanks from the property located at 20570 Stanton Avenue, in Castro Valley, California.

The soil stockpiled is approximately 300 yards, and it is currently stored on-site and treated by bio-remediation.

The stockpiled soil was mixed thoroughly and spread. A dilute mixture of nutrient elements (Nitrogen and Phosphorous) were sprayed to the soil surface on a weekly basis in order to maintain soil moisture and to stimulate bacterial growth. The pile was covered with plastic except during mixing, fertilizer application and sampling.

After treatment of the stockpiled soil, samples were dug out from within the stockpile, with the aide of a hand sampler, in a brass tube. Twelve discrete soil samples were taken from the stockpiled on June 26, 2000, which were composited into three samples by the laboratory. The ends of the tube were capped and sealed, and the tube was labeled and placed in an ice chest for delivery to Entech Analytical Labs, in Sunnyvale, accompanied by the proper chain-of-custody documentation.

Per BFI sampling protocol, the composite soil samples were analyzed for TPH as gasoline (EPA Method 8015); BTEX/MTBE (EPA Method 8020) and Total Lead (EPA Method AA/ICAP).

Please review this information as soon as possible. We would like to start transporting the soil as soon as possible.

Thank you for prompt response. Should you have any questions or require additional information, please feel free to contact our office at (408) 297-1500.

Sincerely,

ENVIRO SOIL TECH CONSULTANTS

Generator Location	20570 Stanton Ave	Castro Valley	CA
SWIC Number	02630		
Bill-To	Stop 'N Save, Inc.		
Approval Date	7/12/00		
Expiration Date	7/12/01		
Waste Description	Soil		
Management	ADC		

The above is a recommendation of the Vasco Road Landfill. It must be understood that management of the waste for disposal must be in compliance with the facility's permit and applicable federal, state and local regulations. The approval is based upon a review of the information provided by the generator and is contingent upon the receipt at the disposal facility of a waste material essentially equivalent in chemical composition and physical properties to that as defined above.

A MINIMUM OF ONE SIGNED AND COMPLETED COPY OF THIS FORM MUST ACCOMPANY EACH LOAD. ONE COPY WILL BE RETAINED BY THE VASCO ROAD LANDFILL.

Management	ADC		

The above is a recommendation of the Vasco Road Landfill. It must be understood that management of the waste for disposal must be in compliance with the facility's permit and applicable federal, state and local regulations. The approval is based upon a review of the information provided by the generator and is contingent upon the receipt at the disposal facility of a waste material essentially equivalent in chemical composition and physical properties to that as defined above.

A MINIMUM OF ONE SIGNED AND COMPLETED COPY OF THIS FORM MUST ACCOMPANY EACH LOAD. ONE COPY WILL BE RETAINED BY THE VASCO ROAD LANDFILL.
