Hello Mehrdad,

I've delved further into the case file and found an inference to a potential UST removal at the subject site. This may explain why a previous case worker said the UST(s) were removed. However, I have not come across definitive documentation stating USTs have been removed.

As discussed in the meeting, I am to go through the case file and pull out language pertaining to various UST locations and present figures re the identification and location of soil bores. This remains in progress and is on my action item list.

Following my case file review, we will identify action items in a letter and request a work plan to address these items.

Regards,
Keith Nowell

Hello Keith,

I am following up on our last meeting on September 28, 2016. During the meeting we provided a document issued by the County about the underground tanks were removed in 2000 and discussed the phase I study we have submitted. You told us you will provide a list of open items in October but not later than early November. As of today we have not received your list.

Please send us the list of open items for us to complete.

Thank you and regards,

Mehrdad
