Summary Report

**Phase I Site Assessment
at
5630 San Pablo Avenue
Oakland, California 94608**

INTRODUCTION

A Phase I Site Assessment (ASTM Standard E-1527) was conducted by International Geologic at 5630 San Pablo Avenue, Oakland, California (Property). The purpose of this assessment was to evaluate the conditions of the Property with respect to activities, materials, or practices which are subject to environmental regulations, and to identify potential sources of contamination on-site and within a one-mile radius of the Property. **ASTM considers analysis for asbestos containing materials (ACM's) and lead based paint to be beyond the scope of work. No evaluation was made for the presence of these materials on the Property.**

This assessment consisted of:

- o Conducting a Property walk over.
- o Interviewing the current Property owner.
- o Reviewing historical sources of information for the Property and surrounding area dating back to 1903.
- o Summarizing the local geology and hydrogeology.
- o Reviewing Federal, State, and local agency records pertaining to the Property and surrounding area within a one-mile radius.
- o Reviewing information pertaining to a 2000 subsurface investigation conducted at the Property.

PROPERTY DESCRIPTION

Property Location

The Property is located at 5630 San Pablo Avenue at the southeast corner of San Pablo Avenue and Aileen Street in Oakland, California (see Property Vicinity Map, Figure 1). The Property adjoins Aileen Street and San Pablo Avenue to the north and west respectively. The immediate surrounding area is a mixture of commercial properties along San Pablo Avenue and residential properties extending to the east along Aileen Street.

Assessors Information

The Assessors Parcel Number for the Property is 15-1307-14 . The area of blocks and parcels that includes the Property, is designated by the Alameda County Assessor as "Map of the Gaskill Tract". The current Property owner is Mr. Jacky Li.

Property Configuration

The rectangular shaped Property contains about 4,800 ft² of area, and is nearly flat with an elevation of about 40 feet above mean sea level (USGS, 1993). The Property is currently developed with a 1,300 ft² storage building located at the east end of the lot. The Property is entirely paved and is fenced on the north, south and west sides. Access to the Property is from San Pablo Avenue. The site layout is depicted in a Property Site Plan presented in Figure 2.

LOCAL GEOLOGY/HYDROGEOLOGY

Geology

The area of Oakland which includes the Property is underlain predominantly by Late Pleistocene alluvial deposits (map unit Qham, Helley, et al, 1979). These are described as "Unconsolidated, moderately sorted, moderately permeable fine sand, silt, and clayey silt with occasional thin beds of coarse sand.". A subsurface investigation conducted on the Property in 2000 involved drilling 4 soil borings to a depths between 17 and 20 feet below the ground surface (bgs). Soils encountered during this subsurface work, were clay and sandy clay to a depth of approximately 13 feet bgs, then sand and gravel at depths between 13 and 20 feet bgs (AEI Consultants, August 8, 2000).

Hydrogeology

The depth to first encountered groundwater beneath the Property as measured during the above mentioned subsurface work in 2000, was approximately 16 feet bgs. Based on local geology and topography, the direction of groundwater flow beneath the Property and surrounding area would be approximately to the west. Groundwater beneath the area of the site is reportedly not used for municipal water supply or farm irrigation.

PAST AND PRESENT PROPERTY USAGE

Sanborn Fire Insurance Maps

Sanborn maps depicting the Property were obtained from Environmental Data Resources (EDR) and were reviewed at the Oakland Public Library. The Sanborn maps revealed the following information regarding past Property usage:

- 1903:** The Property is depicted as a vacant lot.
- 1911:** The Property is depicted as a vacant lot.
- 1930:** The Property is depicted to contain the present day building at the east end of the lot. The building is labeled "Battery Shop" and "Auto Service". Two underground storage tanks are shown to be located in front of the Property beneath the sidewalk on San Pablo Avenue.
- 1951:** The Property layout is similar to that depicted in the 1930 Sanborn Map. A structure near the center of the Property is labeled "Gas".
- 1967:** The Property layout is similar to that depicted in the 1951 Sanborn Map, except the main building is labeled as "Contractors Storage". The label on the structure near the center of the Property is not legible.
- 1969:** The Property layout is similar to that depicted in the 1951 Sanborn Map, except the main building is labeled as "Contractors Storage". The label on the structure near the center of the Property is not legible.

Building Permit Review

A review of past building permits for the Property available at the City of Oakland Building Department, revealed the following site information:

- 1952:** Permit to erect sign. Property owner indicated as "Mohawk Oil".
- 1959:** Permit to erect sign. Property owner indicated as "Mohawk Oil".
- 1966-1968:** Various City of Oakland Building Department Inter-Office Memos regarding "badly deteriorated gas station". Memos and letters between the Building Department and the City Fire Marshal, describe inspections and property clean up/maintenance orders for the "abandoned gas station" at 5630 San Pablo Avenue. A memo dated April 16, 1968 states that the buildings had been cleaned up, and that a permit to remove gasoline storage tanks was taken out on June 7, 1967 and had been finalized on June 8, 1967. A site plan included in the memos, indicates the presence of an automobile hoist located in the southeast portion of the yard area next to the building.

1973: Building permit to demo building, repair doors, and build a fence for owner Lonnie Robinson. Use of Property indicated as auto repair.

No open permits were found at the City of Oakland Building Department.

Aerial Photo Review

A review of aerial photographs of the Property acquired from Environmental Data Resources revealed the following Property information:

- 1939:** The Property appears to contain the same rectangular building that currently exists at the east side of the Property. A small structure or canopy is visible near the center of the Property.
- 1946:** The configuration of the Property appears similar to the 1939 aerial photograph.
- 1959:** The configuration of the Property appears similar to the 1946 aerial photograph.
- 1965:** The configuration of the Property appears similar to the 1959 aerial photograph.
- 1982:** No clear configuration discernable due to poor quality photograph.
- 1993:** No clear configuration discernable due to small scale photograph.

Property Usage Summary

Sanborn maps, building permit applications, aerial photographs and historical database records obtained from EDR, indicate the Property was vacant until at least as early as 1925, when a gas station existed there. By 1930, the present day building existed in the eastern portion of the Property. Records indicate the Property was used as a gasoline station and auto repair facility until approximately the mid-1960's when the Property was used for storage by a contractor. The underground storage tanks were reportedly removed from the Property in 1967. The Property was used for auto repair off and on during the 1970's until the mid-1990's, and according to the Alameda County Assessor, is still zoned as a Commercial Repair Garage. City of Oakland Building Department records indicate the presence of an automobile hoist located in the southeast portion of the yard next to the building. No records pertaining to the removal of the hoist was found for this assessment. The current Property owner, Mr. Jacky Li, purchased the Property in 2002, and has been using the building and yard area to store granite and marble counter tops and cabinet supplies.

PAST AND PRESENT ADJACENT PROPERTIES USAGE

The Property is bounded by city streets on the north and west sides with adjoining developed properties to the south and east. The following historical information was acquired from Sanborn maps and aerial photographs.

South

The adjoining property to the south at 5606 San Pablo Avenue is occupied by the Golden Gate Branch of the Oakland Public Library. The property has been the site of a library since at least as early as 1930.

East

The adjoining property to the east at 1091 Aileen Street is occupied by a small residential apartment building. The area of Aileen Street stretching to the east from the Property has been residential since the area was first developed in the 1920's.

Surrounding Area

The area east of the Property has been predominately residential since the early 1900's. Sites stretching north and south along San Pablo Avenue have been commercial.

PROPERTY WALK OVER

A walk over of the Property was performed by International Geologic on May 16, 2003, to observe the potential presence of hazardous materials on-site, note activities, materials, conditions or practices which are subject to environmental regulations, and to assess the potential for other environmental concerns. Photographs depicting features noted during the walk over are included in the "Photos" section attached to this report.

Storage Building

The building was being used for storage of stone counter tops, cabinets and accessories at the time of the site visit. No significant staining, odors or obvious signs of contamination were observed in the building. No containers of hazardous substances or petroleum were observed in the building. No evidence of above or below ground tanks or fill ports suggesting the presence of an underground tank was observed. The building was inspected for indications of discharge sources (*e.g.*, sumps, drains, or clarifiers). No discharge sources were observed.

Yard Area

The majority of the Property area is asphalt and concrete paved driveway and storage areas. The portions of the asphalt and concrete paved ground surface that were visible appeared in good condition, however a complete evaluation could not be made due to the large amount of stored counter tops present in the yard. A recently poured concrete slab was noted in the southeast portion of the yard area next to the building. According to the Property owner, Mr. Jacky Li, a new, above-ground automobile hoist was planned for this area, but was not installed. No hazardous substances were observed to be stored above ground on the yard, and no significant stains or unusual odors were noted. The yard was inspected for indications of discharge sources (*e.g.*, sumps, drains, or clarifiers). No discharge sources were observed.

Perimeter Areas

The north and west perimeter areas adjoin sidewalks for San Pablo Avenue and Aileen Street. The south side of the Property contains trees and vegetation along the property line between the Property and the library. No environmental liabilities were noted in the perimeter areas.

RECORDS REVIEW

Federal and State Records

Federal and State records were reviewed to determine whether releases of hazardous materials or petroleum product have occurred or been detected on-site, and to identify potential sources of contamination within a one-mile radius of the site. Details of the Federal and State records are included in a report in Attachment 1. The following summarizes the findings of the records review.

Federal ASTM Standard

- o No (0) sites within a one-mile radius of the Property were listed on the Environmental Protection Agency's (EPA) National Priority List (NPL). The NPL identifies sites for priority cleanup under the Superfund Program.
- o No (0) sites within a one-mile radius of the Property were listed on the EPA's Proposed NPL database.
- o No (0) sites within a 1/2-mile radius of the Property were listed on the EPA's Comprehensive Environmental Response, Compensation, and Liability Act (CERCLIS) inventory. CERCLIS is a data base used by the EPA to track activities conducted under its Superfund program and to monitor sites with potential for hazardous releases, or sites that may require clean-up.
- o No (0) sites within 1/4-mile of the Property were listed on the CERC-NFRAP database. NFRAP sites may be sites that following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or contamination was not serious enough to require Federal Superfund action or NPL consideration.
- o One (1) site within a one-mile radius of the Property was listed on the EPA's Corrective Action Report (CORRACTS) list. CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
- o No (0) sites within a half-mile radius of the Property were listed on the EPA's Resource Conservation and Recovery Information System (RCRIS-TSD). RCRIS-TSD is a data base tracking sites which generate, transport, store, treat or dispose of hazardous waste.
- o No (0) sites within 1/4-mile of the Property were listed the EPA's RCRIS "Large Quantity Generator" (LQG) list. The list includes information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.

- o Four (4) sites within 1/4-mile of the Property were listed on the EPA's RCRIS "Small Quantity Generator" (SQG) list. The list includes information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.
- o The Property is not listed on the EPA and Coast Guard's Emergency Response Notification System (ERNS). ERNS records information on reported releases of oil and hazardous substances.

State ASTM Standard

- o One (1) site within a one-mile radius of the Property was listed on the California Department of Toxic Substance Control (DTSC) CAL-SITES AWP (Annual Work Plan) List. CAL-SITES AWP is a data base maintained by The State of California which identifies known hazardous substance sites targeted for cleanup.
- o Four (4) sites within a one-mile radius of the Property were listed on the California DTSC CAL-SITES List. CAL-SITES is a data base maintained by The State of California identifying known and potential hazardous substance sites targeted for cleanup.
- o Forty-two (42) sites within a one-mile radius of the Property were listed on the California Hazardous Material Incident Reporting System List (CHMIRS). CHMIRS contains information on accidental releases or spills of hazardous substances.
- o One hundred thirty-two (132) sites within a one-mile radius of the Property were listed on the State of California Air Resources Board CORTESE database. CORTESE contains information on sites having experienced a reportable release of toxic substances.
- o Seven (7) sites within a one-mile radius of the Property were listed on the Notify 65 List. Notify 65 is maintained by the California State Water Resources Control Board, and contains facility notifications about any release which could impact drinking water.
- o No (0) sites within a one-mile radius of the Property were listed on the State of California Water Resources Control Board "Toxic Pits" list. "Toxic Pits" identifies sites suspected of containing hazardous substances where clean-up has not been completed.
- o No (0) sites within a 1/2-mile radius of the Property were listed on the State of California Solid Waste Information System (SWIS) database. SWIS contains information on active, inactive and closed landfills.
- o No (0) sites within a 1/2-mile radius of the Property were listed on the State Water Resources Control Board Waste Management Unit Database System (WMUDS) or the State of California Solid Waste Activity Tracking (SWAT) database. The State maintains these lists for program tracking and inventory of waste management units and contains information on groundwater monitoring and landfills.

- o Forty-three (43) sites within a 1/2-mile radius of the Property were listed on the State of California Leaking Underground Storage Tanks (LUST) list. The State of California Water Resources Control Board maintains this list of leaking underground storage tanks (UST's). **The Property appears on the LUST database.**
- o Three (3) sites within a one-mile radius of the Property were listed on the State of California Department of Health Services Bond Expenditure Plan database.
- o No (0) sites within a 1/4-mile radius of the Property were listed on the State of California Underground Storage Tanks (UST) list. The State of California Water Resources Control Board maintains this list of registered UST's.
- o Two (2) sites within a 1/2-mile radius of the Property were listed on the Voluntary Cleanup Program (VCP) database. The VCP database is maintained by the California Department of Toxic Substance Control, and contains low threat level properties with either confirmed or unconfirmed releases.
- o No (0) sites within a 1/4-mile radius of the Property were listed on the Indian UST database. This database lists underground storage tanks on Indian land in EPA Region 9.
- o Four (4) sites within a 1/4-mile radius of the Property were listed on the California EPA Facility Inventory Database (CA FID UST) database. FID UST contains active and inactive underground storage tank locations from the State Water Resources Control Board.
- o Four (4) sites within a 1/4-mile radius of the Property were listed on the State of California Underground Storage Tanks (Historical) (UST) list. The State of California Water Resources Control Board maintains this list of registered UST's.

Federal ASTM Supplemental

- o No (0) site within a one-mile radius of the Property was listed on the EPA's Resource Conservation and Recovery Information System "CONSENT" database. CONSENT tracks legal settlements that establish responsibility for local Superfund sites.
- o No (0) site within a one-mile radius of the Property was listed on the EPA's Records of Decision (ROD) database. ROD documents mandate a permanent remedy at an NPL site.
- o No (0) sites within a one-mile radius of the Property were listed on the EPA's De-listed NPL database. The De-listed NPL database tracks sites that the EPA no longer manages under its NPL program.
- o The Property is not listed on the EPA's Facility Index System (FINDS). Finds contains facility information and "pointers" to other sources that contain more information on the storage and transportation of hazardous materials or waste.

- o The Property is not listed on the Federal Hazardous Materials Incident Report System (HMIRS) database. The Department of Transportation maintains this list of hazardous material spill incidents.
- o The Property is not listed on the Nuclear Regulatory Commission's (NRC) Material Licensing Tracking System (MLTS) database. MLTS identifies sites that possess or use radioactive materials.
- o No (0) sites within a 1/4 mile radius of the Property were listed on the Department of Labor/ Mine Safety and Health Administration "MINES" list.
- o The Property is not listed on the EPA's National Priority List Liens list (NPL LIENS). NPL LIENS identifies Property for which a lien has been filed through which the USEPA has the authority to recover remedial action expenditures.
- o The Property is not listed on the EPA's PCB Activity Database (PADS). PADS identifies generators, transporters and other handlers of PCB's.
- o The Property is not listed on the Department of Defense (DOD) Database. The DOD data set identifies federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.
- o The Property is not listed on the EPA's Resource Conservation Recovery Act (RCRA) Administration Action Tracking System (RAATS) database. RAATS contains information on enforcement action pertaining to major violators under RCRA.
- o The Property is not listed on the EPA's Toxic Release Inventory System (TRIS). TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities.
- o The Property is not listed on the EPA's Toxic Substances Control Act (TSCA) database. TSCA identifies manufacturers and importers of chemical substances.
- o The Property is not listed on the EPA's Federal Insecticide, Fungicide, & Rodenticide Section 7 Tracking System (SSTS) list. The SSTS tracks reported types and amounts of pesticides being produced and distributed in the past year.
- o The Property is not listed on the EPA's Federal Insecticide, Fungicide, & Rodenticide (FTTS) list. FTTS tracks administrative cases and pesticide enforcement actions and compliance activities.

State or Local ASTM Supplemental

- o The Property was not listed on the State of California Above Ground Storage Tank (AST) database. The State of California Water Resources Control Board maintains this list of registered AST's.
- o Three (3) sites within a 1/4-mile radius of the Property were listed on the State of California Dry-cleaners (CLEANERS) database. The State of California Department of Toxic Substance Control maintains this list of dry cleaners that have EPA ID numbers.
- o The Property is not listed on the State of California Waste Discharge System database (WDS). WDS sites have been issued waste discharge requirements.
- o The Property is not listed on the State of California DEED database. The DEED database is maintained by the State of California Department of Toxic Substance Control, and tracks sites that have DEED restrictions related to subsurface contamination.
- o No (0) sites within 1/4 mile of the Property were listed on the State of California No Further Action Determination (NFA) database. The NFA database is maintained by the State of California Department of Toxic Substance Control, and contains properties at which DTSC has made a clear determination that the property does not pose a problem to the environment or to public health.
- o No (0) sites within 1/4 mile of the Property were listed on the State of California Unconfirmed Properties Referred to Another Agency (REF) database. The REF database is maintained by the State of California Department of Toxic Substance Control, and contains properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.
- o No (0) sites within 1/4 mile of the Property were listed on the State of California School Property Evaluation Program (SCH) database. The SCH database is maintained by the State of California Department of Toxic Substance Control, and contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.
- o No (0) sites within 1/4 mile of the Property were listed on the State of California Properties Needing Further Evaluation (NFE) database. The NFE database is maintained by the State of California Department of Toxic Substance Control, and contain properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

- o Seven (7) sites within a 1/2-mile radius of the Property were listed on the California Department of Health Services Non-Fuel Leaks (CA SLIC) database.
- o Thirteen (13) sites within a 1/4-mile radius of the Property were listed on the State of California Hazardous Waste Information System (HAZNET) list. The State of California Department of Toxic Substance Control maintains this list of hazardous waste generators and hazardous waste treatment, storage and disposal facilities.

EDR Proprietary Database

- o Thirty-nine (39) sites within a 1/4-mile radius of the Property were listed on the Gas Stations/Dry Cleaners list. EDR has searched select national collections of business directories and has collected listings of potential dry cleaner and gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning and gas station/filling station/service station establishments. The categories reviewed included, but were not limited to: gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, dry cleaner, cleaners, laundry, laundromat, cleaning/laundry, wash & dry, etc.
- o No (0) sites within a one-mile radius of the Property were listed on Real Property Scan's "ENVIROHAZ" Former Manufactured Gas (Coal Gas) Sites list.

Brownfield's Database

- o Two (2) sites within a 1/2-mile radius of the Property were listed on the Voluntary Cleanup Program (VCP). VCP contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Alameda County Health Care Services Agency Leaking UST Oversight Program

A records review was conducted at the Alameda County Health Care Services Agency (ACHCSA) to research hazardous materials usage/storage on the Property and to identify the possible existence of leaking underground storage tanks (UST's) beneath the Property. The ACHCSA keeps a file containing a 2000 subsurface investigation at the Property (see section on Property Environmental Work).

Regional Water Quality Control Board-San Francisco Bay Region

The California Regional Water Quality Control Board (RWQCB) was contacted on May 14, 2003, with a request to review files containing fuel leak information for the Property. The RWQCB maintains a list of sites within the San Francisco Bay region that have experienced an unauthorized release of hazardous substances into the soil and/or groundwater. According to Ms. Melinda Wong of the RWQCB, no such files exist for the Property.

California Department of Toxic Substance Control

The California Department of Toxic Substance Control (DTSC) was contacted on May 14, 2003, with a request to review files containing fuel leak information for the Property. The DTSC maintains a list of sites within the San Francisco Bay region that have experienced an unauthorized release of hazardous substances into the soil and/or groundwater. According to Ms. Lule Varella of the DTSC, no such files exist for the Property.

Oakland Office of Emergency Services

The Oakland Office of Emergency Services (OES) maintains a small file containing a February 2001 Hazardous Materials Inspection Report that indicated minor violations pertaining to the auto service business at the Property not labeling 55-gallon drums containing waste oil, parts cleaner and coolant.

SITE ENVIRONMENTAL WORK

Previous Phase I Environmental Assessment

AEI Consultants of Lafayette, California (AEI) conducted a Phase I Environmental Site Assessment of the Property in June 2000. A copy of the assessment could not be found for this assessment, however, other AEI documentation reviewed for this assessment (see below), revealed that USTs had been previously located in the northwest portion of the Property, and that a tank removal permit for the Property had been finalized in 1967. The AEI site inspection also reportedly revealed a possible former dispenser island and two suspected locations for the former USTs.

Soil and Groundwater Sampling

In July 2000, AEI supervised the drilling of four soil borings at the Property (AEI-1 through AEI-4). The borings were located in "the suspected areas of the former product dispensers and tank holds". Locations of the borings are shown on Figure 2. Shallow soils encountered during drilling consisted of clay and sandy clay, with sand and gravel encountered depths greater than 13 feet bgs. Total explored depth of the borings ranged from 17 to 20 feet bgs. Soil samples collected at 5-foot intervals from each boring were noted to have a strong hydrocarbon odor. Groundwater samples were collected at a depth of 16 feet bgs from borings AEI-2 and AEI-3.

Laboratory Results

Up to 1,300 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg) was detected in a soil sample collected at a depth of 8 feet bgs in the northwest portion of the Property (AEI-1), and up to 380 ppm TPH as diesel (TPHd) was detected in soil at 9 feet bgs near the western end of the Property (AEI-2). Up to 620 parts per billion (ppb) TPHg was detected in a groundwater sample collected from boring AEI-3 near the north side of the Property, and up to 380 ppb TPHd was detected in a groundwater sample collected from boring AEI-2. Sample locations and laboratory results are shown on Figure 2. AEI concluded that "the soil beneath the site has been significantly impacted with hydrocarbons" and that "Groundwater has also been impacted". AEI recommended additional site investigation to further characterize the magnitude and extent of impacted soil and

groundwater. AEI's *Phase II Subsurface Investigation* for the Property, dated August 8, 2000 is included in Attachment 2.

Regulatory Status and Work Plan

The Property is currently under the oversight of the ACHCSA. In a letter dated November 17, 2000, the ACHCSA outlined the subsurface work previously conducted, and requested a Work Plan that would describe work necessary to "assess the nature and vertical and lateral extent of the release of petroleum.". AEI submitted a Work Plan dated December 12, 2000 to the ACHCSA proposing to install 4 groundwater monitoring wells at the Property. The Work Plan was approved by the ACHCSA (with minor modifications and an additional well) in a letter dated February 16, 2001. The wells were never installed. The approximate locations of the proposed well locations are depicted on Figure 2. The Work Plan and ACHCSA letters are included in Attachment 2.

NEARBY SITE ENVIRONMENTAL WORK

The properties listed below appeared on the environmental database search or were identified through field reconnaissance, and were researched to determine the potential for soil and/or groundwater contamination at the site impacting the Property via groundwater. References to "up gradient" and "down gradient" mean that a given site is located at a higher or lower elevation on the inclined plane of the groundwater table as compared with the Property. In general, groundwater flows toward lower elevations on the plane.

Information regarding past and current environmental investigations related to releases of hazardous substances into the subsurface within approximately 1/8 mile from the Property are outlined below:

5532 San Pablo Avenue

This site is located approximately 180 feet to the south of the Property (San Pablo Avenue at 56th Street), and appears on the State LUST list. Sanborn Maps and aerial photographs from the 1930's through the 1950's indicate the site is the former location of a service station. A limited soil investigation was conducted at the site in August 2000 by ERAS Environmental of Castro Valley, California. The investigation consisted of drilling four soil borings to 12 feet bgs in the sidewalk along San Pablo Avenue in front of the site, which was concluded to be the former locations of two USTs. Soil samples were collected from the bottom of each boring and submitted to a laboratory for analysis. No detectable concentrations of TPHg was present in the four soil samples submitted. Very low concentrations of ethylbenzene and xylenes were detected in one sample. ERAS concluded that significant contamination is not present under the site, and no further work was recommended. This site is cross-gradient from the Property and does not pose a significant risk to soil or groundwater beneath the Property.

5714 San Pablo Avenue

This site is approximately 350 feet to the north of the Property, and appears on the State LUST list. A gasoline release was reported at this site in 1989, and is classified as "soil only", with groundwater

reportedly not affected. The case was closed by the ACHCSA in 1995. No other information was obtained for this assessment. This site is cross-gradient from the Property, and would not be expected to impact the soil or groundwater beneath the Property.

FINDINGS

Based on review of available current and historical information, interviews with informed persons and a walk through of the Property using guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E 1527-00 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, 2000) the following *recognized environmental conditions* exist at the Property:

1. The Property was used as a service station from about 1925 until the 1960's, and contained at least two underground gasoline storage tanks formerly located beneath the sidewalk along San Pablo Avenue. The tanks were reportedly removed in 1967, although actual tank closure records were not found for this assessment. Auto repair businesses occupied the Property until as late as the mid-1990's.
2. Soil and groundwater testing conducted at the Property in 2000, revealed residual concentrations of gasoline and diesel hydrocarbons, above regulatory action levels, in the soil and groundwater beneath the north and west portions of the yard area. Up to 1,300 ppm TPHg) was detected in a soil sample collected from the northwest portion of the Property, and up to 380 ppm TPHd was detected in the soil near the western end of the Property. Up to 620 ppb TPHg was detected in a groundwater sample collected from the north side of the Property, and up to 380 ppb TPHd was detected in a groundwater sample collected from the west end of the Property.
3. The Property is currently under the oversight of The Alameda County Health Care Services Agency (ACHCSA). The ACHCSA requested a Work Plan in 2000 that would describe work necessary to "assess the nature and vertical and lateral extent of the release of petroleum." AEI Consultants of Lafayette, California, submitted a Work Plan dated December 12, 2000 to the ACHCSA proposing to install 4 groundwater monitoring wells at the Property. The Work Plan was approved by the ACHCSA (with minor modifications and an additional well) in a letter dated February 16, 2001. The wells were never installed.
4. An automobile hoist was formerly located in the southeast portion of the yard area next to the building. This area currently is overlain by a recently poured slab of concrete, that was reportedly intended to be the site of a new hoist that was never installed. Records confirming the removal of the old hoist were not found for this assessment.

RECOMMENDATIONS

1. The ACHCSA should be contacted for further guidance regarding site characterization and clean-up requirements at the Property.
2. The former hoist area should be evaluated to determine whether a hoist cylinder still exists beneath the surface. If it does exist, the hoist cylinder should be removed, and the soil around and beneath the hoist laboratory analyzed for the presence of oil and hydraulic fluid.

CERTIFICATION

I certify that the work presented in this report was performed under my supervision. To the best of my knowledge, the data contained herein is true and accurate, and the work was performed in accordance with professional standards.

Steve Bittman 6/4/03

Steve Bittman Date
CA Registered Environmental Assessor No. 04991

LIMITATIONS

This report was prepared in accordance with guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E-1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, 2000) and with generally accepted standards of environmental practice in California. This limited assessment was conducted solely for the purpose of evaluating environmental conditions at 5630 San Pablo Avenue, Oakland, California, and is intended to reduce but not eliminate uncertainty regarding the existence of recognized environmental conditions at the property assessed. Evaluation of conditions at and near the site for the purpose of this investigation is made from a limited number of observation points. Environmental conditions may vary away from the observation points available. Further investigation, including additional subsurface exploration and laboratory testing of soil and groundwater samples collected at the site, can aid in evaluating subsurface environmental conditions and reduce the inherent uncertainties associated with this type of limited environmental assessment. Accuracy or completeness of public and proprietary records used to conduct limited assessments of this type is not implied. No soil engineering or geotechnical references are implied nor should be inferred. No evaluation was made for the presence of asbestos or lead based paint on the subject property.

Subject: Phase II Subsurface Investigation
5630 San Pablo Avenue
Oakland, California
Project No. 3799

Dear Mr. Rosenberg:

The following letter report describes the activities and results of the subsurface investigation performed by AEI Consultants at the above referenced property (Figure 1: Site Location Map). The investigation included the collection and analysis of soil and groundwater samples from four shallow soil borings at the property. The investigation was designed to assess whether the soil and / or groundwater beneath the site had been impacted by the former underground storage of petroleum hydrocarbons at the site.

I Background

The site is located in a mixed residential and commercial area of Oakland. A Phase I Environmental Site Assessment was performed on the property by AEI in June 2000. The assessment revealed that the site had been occupied by an auto service business. A Sanborn Fire Insurance map from 1952 indicated gasoline storage tanks on the northwest portion of the property. A letter reviewed at the Oakland Building Department indicated that a tank removal permit for the site was finalized in 1967. The site inspection revealed a possible former dispenser island and two suspected locations for the former underground storage tanks. Please refer to the Phase I report issued by AEI for detailed results of the assessment.

II Investigative Efforts

AEI performed a subsurface investigation at the property on July 6, 2000. A total of four soil borings (AEI-1 through AEI-4) were advanced. The borings were located in the suspected locations of the former product dispensers and tank holds. The locations of the soil borings are shown on Figure 2.

The near surface native soil encountered during the boring advancement consisted generally of clay and sandy clay. Sand and gravel was encountered below approximately 13 feet below ground surface (bgs). Refer to Attachment A for detailed logs of the borings. The site is located

Mr. Donald Rosenberg
August 8, 2000
Project No. 3799
Page 2

approximately 40 feet above mean sea level. Based on local topography, groundwater beneath the site is expected to flow to the west.

Soil Sample Collection

The borings were advanced with a direct push Geoprobe drilling rig to a depth of between 17 and 20 feet bgs. Soil samples were collected at approximately 5 foot intervals.

A strong hydrocarbon odor was observed during sample collection in each of the borings. The soil samples were screened in the field using a Photo-ionizing Detector (PID). The soil screening data and field observations are presented on the borings logs (Attachment A). Soil samples were collected in four foot long acrylic liners, from which a six inch sample was chosen. The soil samples were sealed with teflon tape and plastic caps and placed in a cooler with wet ice to await transportation to the laboratory.

Groundwater Sample Collection

Groundwater was encountered and collected from 16 feet bgs from soil borings AEI-2 and AEI-3. Groundwater was not able to be collected from borings AEI-1 and AEI-4. A groundwater sample was collected from the two borings using a drop tube inserted through the direct push rods. The groundwater samples were collected into 1-liter amber bottles and 40-mL VOA vials. The groundwater samples were capped so that there was no head space or visible air bubbles within the vials, then placed in a cooler with wet ice to await transportation to the laboratory.

Following sample collection, each boring was backfilled with neat cement grout.

Laboratory Analysis

On July 6, 2000, the soil samples were transported to McCampbell Analytical Inc. (DOHS Certification Number 1644) under chain of custody protocol for analysis. Analytical results and chain of custody documents are included as Attachment B.

A total of five soil samples and two groundwater samples were chosen for analysis. The soil and groundwater samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline, TPH as diesel, benzene, toluene, ethyl-benzene, and xylenes (BTEX) and MTBE. Any remaining soil samples were placed on hold at the laboratory.

III Findings

TPH as gasoline and TPH as diesel were both detected in all of the soil samples analyzed, up to 1,300 mg/kg and 200 mg/kg, respectively. Benzene was detected up to 1.5 mg/kg in the soil. No

Mr. Donald Rosenberg

August 8, 2000

Project No. 3799

Page 3

concentrations of MTBE were detected in the soil. Detailed results of the soil analytical testing are summarized in Table 1.

TPH as gasoline and TPH as diesel were detected in the groundwater up to 620 $\mu\text{g/L}$ and 380 $\mu\text{g/L}$, respectively. Benzene was detected in the groundwater at 12 $\mu\text{g/L}$. Please refer to Table 2 for details of the groundwater sample analysis.

IV Conclusions and Recommendations

This investigation has revealed that the soil beneath the site has been significantly impacted with hydrocarbons. Groundwater has also been impacted. Further site investigation would be necessary to characterize the extent and magnitude of impacted soil and groundwater. The results of this investigation should be forwarded to the Local Oversight Agency (Alameda County Health Care Services Agency) for guidance of further investigative efforts.

Mr. Donald Rosenberg
August 8, 2000
Project No. 3799
Page 4

V Report Limitation

This report presents a summary of work completed by AEI Consultants. The completed work includes observations and descriptions of site conditions encountered. Where appropriate, it includes analytical results for samples taken during the course of the work. The number and location of samples are chosen to provide the required information, but it cannot be assumed that they are representative of areas not sampled. All conclusions and/or recommendations are based on these analyses and observations, and the governing regulations. Conclusions beyond those stated and reported herein should not be inferred from this document.

These services were performed in accordance with generally accepted practices, in the environmental engineering and construction field, which existed at the time and location of the work.

If you have any questions regarding our investigation, please do not hesitate to contact me at (925) 283-6000.

Sincerely,

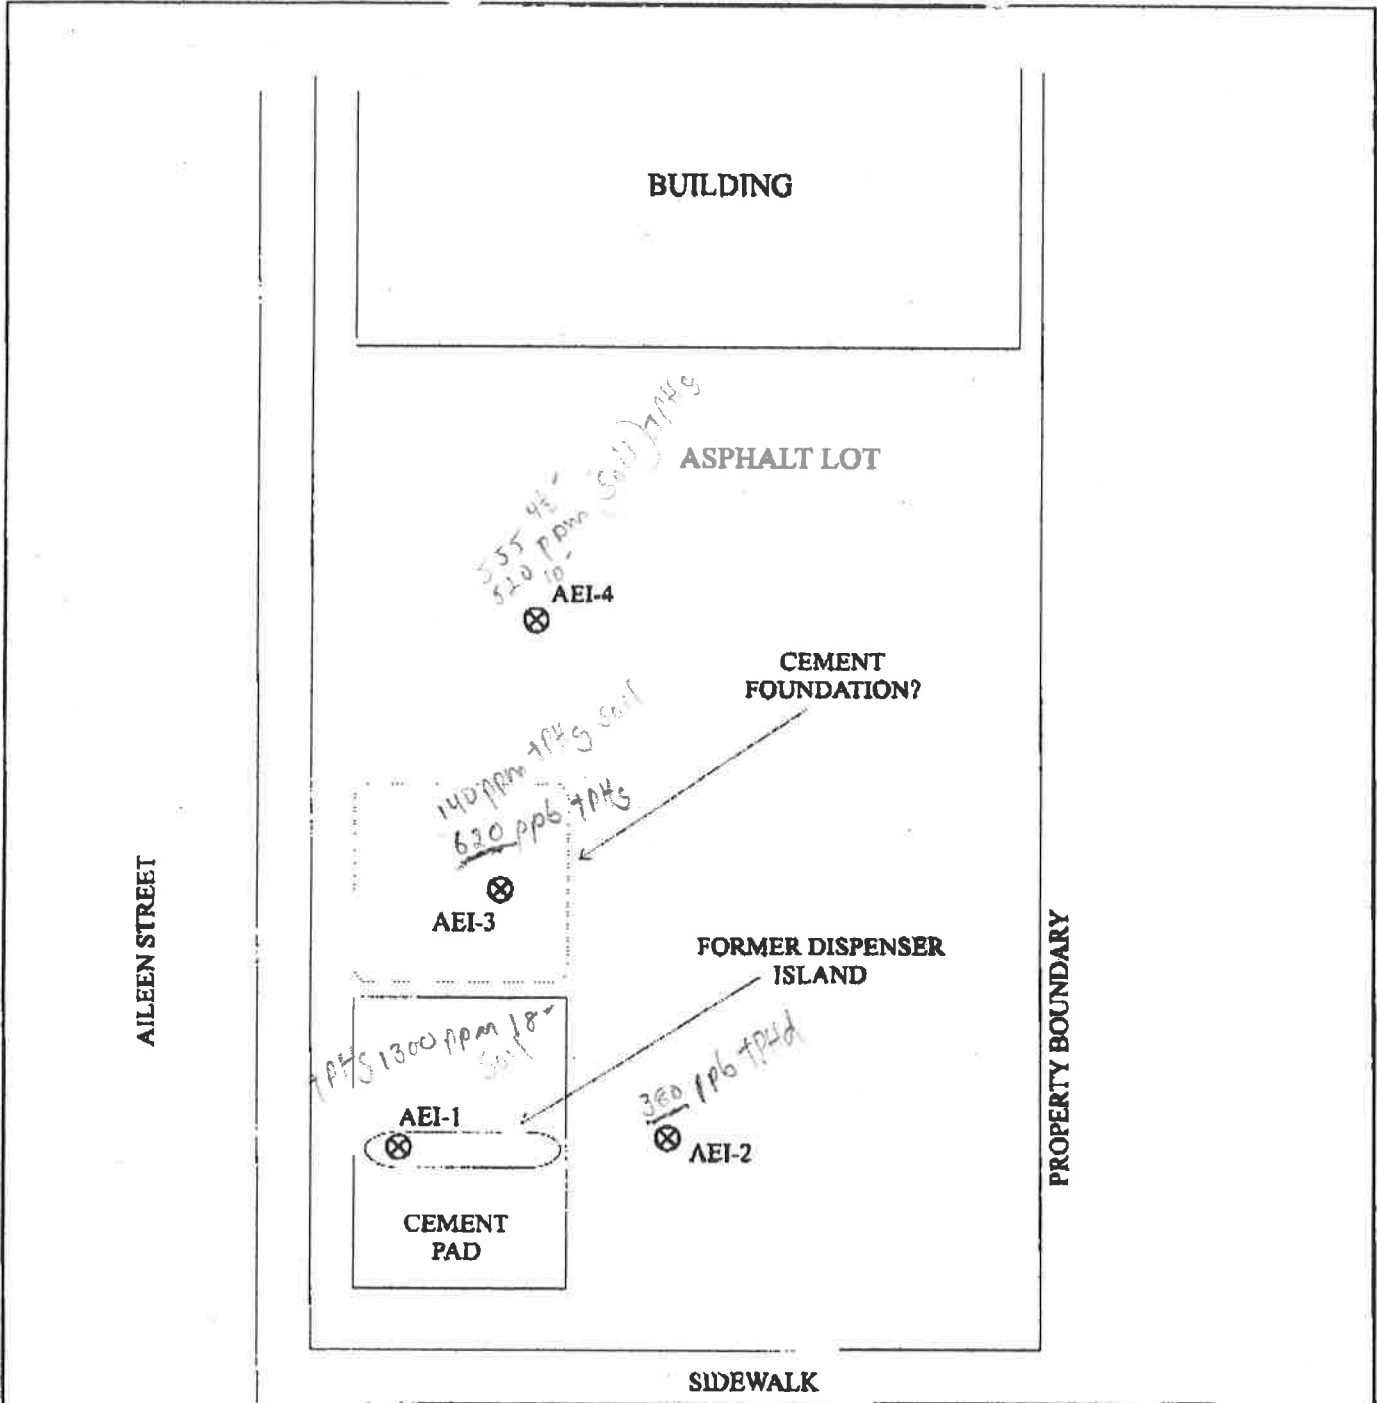

Peter McIntyre
Project Geologist

Dear Ms. Robinson:

Subject: 5630 San Pablo Ave., Oakland, CA 94608
Std 6703

A phase 2 subsurface investigation was performed as part of a real estate transaction. Soil samples collected on July 6, 2000 found Total Petroleum Hydrocarbons-Gasoline (TPH-G) up to 1,300 mg/kg, Total Petroleum Hydrocarbons- Diesel (TPH-D) up to 200 mg/kg, Benzene up to 1.5 mg/kg, Toluene up to 0.5 mg/kg, Ethylbenzene up to 4.6 mg/kg, and Xylenes up to 0.43 mg/kg (BTEX), and Methyl Tertiary-Butyl Ether (MTBE) up to <3 mg/kg. Groundwater samples collected on July 6, 2000 found Total Petroleum Hydrocarbons-Gasoline (TPH-G) up to 620 ug/l, Total Petroleum Hydrocarbons- Diesel (TPH-D) up to 380 ug/l, Benzene up to 12 ug/l, Toluene up to 1.2 ug/l, Ethylbenzene up to 12 ug/l, and Xylenes up to 2.9 ug/l (BTEX), and Methyl Tertiary-Butyl Ether (MTBE) up to <5.0 ug/l.

A soil and groundwater investigation which includes the collection and analysis of data necessary to assess the nature and vertical and lateral extent of the release of petroleum is required due to evidence that groundwater has been affected by the release of petroleum (CCR, Title 23, Div. 3, Chap. 16, Sec. 2724, 2725).

A work plan must be submitted for approval. If you have any questions, please call me at (510) 567-6746.

Sincerely,

Don Hwang

Dec 12, 2000

Subject: Work Plan
5630 San Pablo Avenue
Oakland, CA 94604
AEI Project No. 3799

Dear Mr. Hwang:

AEI Consultants (AEI) presents the following work plan on behalf of Rita M. Robinson. The work plan has been prepared in response to your request in a letter dated November 17, 2000 for a further investigation of the impacted groundwater at the above referenced property (refer to Figure 1 for site location). The work plan describes activities to assess the nature and vertical and lateral extent of the release of petroleum hydrocarbons to soil and groundwater.

Site Description and Background

The site is located in a mixed residential and commercial area of the City of Oakland. The site is located on the southeast corner of Aileen Street and San Pablo Avenue (Figure 1 – Site location map). The site was historically occupied by a gasoline service station. Underground storage tanks (USTs) and fuel dispensers were removed from the site in 1967.

AEI performed a Phase II subsurface investigation and sampled soil and groundwater on July 6, 2000 as part of a real estate transaction. Locations of soil borings are shown on Figure 2, Site Map and Borehole Locations. Results of this investigation are given in Table 1.

Table 1. Maximum Hydrocarbon Concentrations Detected in Soil and Groundwater

Sample	TPH-g	TPH-d	Benzene	Toluene	Ethylbenzene	Xylenes	MTBE
Soil*	<1300	<200	<1.5	<0.5	<4.6	<0.43	<3
Groundwater**	<620	<380	<12	<1.2	<12	<2.9	<5.0.

*Units for soil analyses – mg/kg

**Units for groundwater analyses – ug/L

Scope of Work

AEI proposes to advance four borings (SB-1 through SB-4) on the property at the locations specified on Figure 2. The boring locations were chosen to determine the lateral extent of the fuel hydrocarbons, especially as to whether migration has occurred across site boundaries.

The borings will be advanced with a hydraulic, direct push drilling rig to first encountered groundwater. According to existing borehole logs, the water table was encountered at a maximum depth of 19 feet. Adding approximately 3 feet to the depth to the water table to allow for groundwater sample collection corresponds to a proposed maximum well depth of approximately 22 feet below ground surface (bgs).

An AEI geologist using the Unified Soil Classification System will log the soil borings on-site. Up to three samples of undisturbed soil will be collected from each boring from above the water table. Soil will be continuously collected within 2" diameter acrylic liners. A six-inch section of the liners will be selected as the sample. The soil samples will be sealed with Teflon film and plastic end caps. Soil samples obtained during drilling will be screened in the field with a Photo Ionization Detector (PID).

Groundwater samples will be obtained from the four borings. Exposing a screened interval of the push rods within the water bearing deposits will facilitate collection of the groundwater samples. A drop tube will be inserted into the direct push rods and water will be pumped through the drop tube into sample containers. If groundwater samples cannot be collected through the rods, then the rods will be removed and screened PVC casing will be temporarily installed to allow for water generation. Following sample collection and the removal of sample collection equipment and/or casing, the borings will be converted to monitoring wells.

All soil and groundwater samples will be stored over water ice and transported, under chain of custody procedures to McCampbell Analytical, Inc. (DOHS Certification Number 1644) of Pacheco, California. Three soil samples, one groundwater sample from each boring, and one groundwater sample from each well will be analyzed for TPH as gasoline (EPA 5030/8015), benzene, toluene, ethylbenzene, xylenes (BTEX), and MTBE (EPA method 5030/8020).

No cuttings will be generated as a result of the drilling and all core materials will be submitted to the laboratory.

The 23-foot soil borings will be converted to groundwater monitoring wells by the following procedure.

1. A casing with an inside diameter of 2.5 inches with a disposable tip will be pushed to a depth of approximately 22 feet bgs;

2. Approximately 15 feet of Schedule 40 2-inch PVC casing and 5 feet of 0.020 factory slotted 2-inch well screen flush threaded bottom cap will be inserted into the pushed casing;
3. The pushed casing will be removed;
4. The annulus will be filled with clean medium Monterey sand to 2 feet above the screened interval;
5. The annulus will be filled with 2 feet of bentonite pellets;
6. The remaining annulus will be grouted to surface;
7. A flush locking well box will be installed and finished to match the existing asphalt or concrete pavement surface.

The 2-inch wells will be developed by surging in an attempt to clean the well screen and sand pack of any accumulated fines. Wells will be further developed by bailing while monitoring field parameters, temperature, conductivity, and pH. When ten well volumes have been bailed, when three consecutive readings of these parameters are constant, or when the well is bailed to dryness, the well will be considered developed. A sample of groundwater will then be taken.

A licensed California surveyor will survey the elevations of the top of casing of the four wells. Water levels will be measured with an electric well sounder.

Following the receipt of analytical results from the laboratory, AEI will prepare a technical report detailing the methods and results of the investigation. The report will consist of text giving the procedures used and problems encountered, figures of boring locations and well construction detail, and tables of analytical results and soil boring logs. Conclusions will be drawn concerning the depth to the water table, the hydraulic gradient and flow direction, the existence and extent of contaminant plumes, and the possible need for additional well locations or other investigative efforts.

Site Safety

Prior to commencement of field activities, a site safety meeting will be held at a designated area. Emergency procedures will be outlined at this meeting. Also, the hazards of the known or suspected chemicals of interest will be explained. Level D personal protection equipment is the anticipated maximum amount of protection needed. A site safety plan conforming to Part 1910.120(i)(2) of 29 CFR will be on site at all times during the project.

A working area will be established with barricades and warning tape to delineate the zone where hard hats and steel-toed shoes must be worn, and where unauthorized personnel will not be allowed. If, during drilling, fuel product odors are deemed to be substantial, half-face respirators with organic vapor cartridges will be worn.

A nearby hospital will be designated in the site safety plan as the emergency medical facility of first choice. A map with a course plotted to the hospital will be on-site.

Estimated Schedule

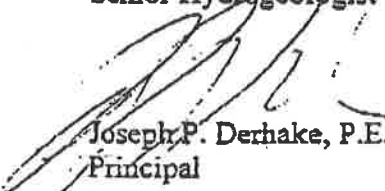

Work will be scheduled following final approval of a scope of work by the Alameda County Health Care Services Agency and finalization of a contractual agreement with the owners of the property. Drilling permits will be obtained and adequate notification will be given to the Alameda County Health Care Services Agency of the scheduled day of drilling to schedule a field inspection. Well development will occur on or around the day of drilling and the wells will be sampled shortly thereafter. Laboratory analytical results will be obtained within one week of sample collection. The final report will be prepared promptly for the client and the Alameda County Health Care Services Agency.

AEI requests your approval to proceed with this project. Please let me know if you need additional information and please do not hesitate to call me at (925) 283-6000 if you have any questions.

Sincerely,

Edward I. Wallick, Ph.D.

The workplan dated December 12, 2000 was reviewed. It is approved with the following amendments:

- 1) SB-4 is to be moved close to the property boundary by San Pablo Ave.
- 2) Another soil boring is to be installed upgradient and close to AEI-4.
- 3) Include analyses for Total Petroleum Hydrocarbons- Diesel (TPH-D) [EPA 5030/8015].

Provide a site map, which includes the amended location for SB-4 and the location for the additional soil boring. If you disagree with the amendments or have any questions, please call me at (510) 567-6746.

Sincerely,

A handwritten signature in black ink that reads "Don Hwang". The signature is written in a cursive, slightly slanted style.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

TARGET PROPERTY INFORMATION

ADDRESS

5630 SAN PABLO AVENUE
OAKLAND, CA 94608

COORDINATES

Latitude (North): 37.839500 - 37° 50' 22.2"
Longitude (West): 122.282500 - 122° 16' 57.0"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 563133.6
UTM Y (Meters): 4188044.8
Elevation: 42 ft. above sea level

USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property: 2437122-G3 OAKLAND WEST, CA
Source: USGS 7.5 min quad index

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following government records. For more information on this property see page 6 of the attached EDR Radius Map report:

<u>Site</u>	<u>Database(s)</u>	<u>EPA ID</u>
5630 SAN PABLO AVE 5630 SAN PABLO AVE OAKLAND, CA	LUST	N/A

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the ASTM E 1527-00 search radius around the target property for the following databases:

EDR PROPRIETARY HISTORICAL DATABASES

See the EDR Proprietary Historical Database Section for details

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL ASTM STANDARD

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/31/2003 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
PFIZER INC	4650 SHELLMOUND ST	1/2 - 1 SW	AO180	220

RCRIS: The Resource Conservation and Recovery Act database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The source of this database is the U.S. EPA.

A review of the RCRIS-SQG list, as provided by EDR, and dated 09/09/2002 has revealed that there are 4 RCRIS-SQG sites within approximately 0.25 miles of the target property.

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 132 Cortese sites within approximately 1 mile of the target property.

NOTIFY 65: Notify 65 records contain facility notifications about any release that could impact drinking water and thereby expose the public to a potential health risk. The data come from the State Water Resources Control Board's Proposition 65 database.

A review of the Notify 65 list, as provided by EDR, has revealed that there are 7 Notify 65 sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 13 HAZNET sites within

Alternate Name(s): CALIFORNIA STATE FOOD & DRUG LABORATORY
 Address(es): 5701 HOLLIS STREET
 EMERYVILLE, CA 94608

Background Info: Site was occupied by a hard chrome plating company from 1948 to 1962. Hazardous waste generated at the site included chromic and sulfuric acid solutions with heavy metals. Latham Engineering is reported to have managed the wastes. The facility used a waste chrome recovery system and a neutralization system. Storage and disposal methods are not known. In 1958, a reported spill occurred on the property where contamination entered the storm drain and resulted in low pH levels in the City's sewer effluent water. The quantity and extent of spill is not known.

Background Info : This site, which has been in operation since the early 1920s, is a Pacific Gas and Electric's Materials Distribution Center. The site has served as a warehouse, repair shop and storage yard for transformers, capacitors, and other electrical supplies. A tank farm for the storage of fuel and transformer is also present on the site. The facility covers approximately two city blocks of an area that is generally industrialized. Sampling conducted in 1983 and 1984 showed elevated levels of polychlorinated biphenyls (PCBs). These soils were excavated and disposed offsite in 1986. Confirmation sampling showed these areas had been cleaned. Additional sampling in 1986, showed elevated levels of PCBs in one area, but since it was capped no further action was recommended. In 1987, an oil-stained area was found to contain elevated levels of PCBs. Additional samples to determine the extent of the contamination were taken. Between April and June 1989, approximately 400 cubic yards of PCB contaminated soils were

PACIFIC GAS & ELECTRIC CO- EMERYVILLE (Continued)

S102008233

removed. Confirmation sampling taken in the excavated areas showed all PCBs had been removed. The Site was certified on June 30, 1989.

In 1995, while constructing a ramp an additional area of soil with PCB contamination was discovered. DTSC de-certified the site and entered into a Voluntary Cleanup Agreement with Chiron Corporation (property owner) for characterization and cleanup. In July 1996, a Removal Action Workplan was approved for excavation of contaminated soils. Since not all contaminated soil was removed, a deed restriction was also required. The implementation report was approved in November 1996. Chiron excavated approximately 10,000 cubic yards of soils containing PCBs which were hauled offsite for disposal. In August 1998, a deed restriction was recorded limiting the use of the property to commercial/industrial. The site was certified in November 1998.

Chiron plans on constructing of a new building at some time in the future on the deed restricted parcel. DTSC will review the Soil Management Plan and Health and Safety Plan, if the PCB impacted soil will be disturbed.

Special Program Code: Not reported
 Special Program : Not reported
 Comments Date : 01011995
 Comments : PCBs above cleanup goals were detected in soil during small excavation project. Discussions with Chiron (new property owner) indicate additional excavation and offsite disposal may be necessary. Site has been decertified and removed from the historical list of certified sites.
 VCA sent to Chiron to oversee sampling and removal of PCB containing soils. DTSC will issue new certification following completion of removal action.
 Site Screening Done: Mitre Model required. IRM (excavation of PCB-contaminated soil) is planned.
 A 5 year review was approved. The cap was found to be in good condition and the selected remedy remains protective of human health and the environment.
 Approximately 400 cubic yards of PCB contaminated Soils were removed. Confirmation sampling taken in the excavated areas showed all PCB had been removed.
 Cost Recovery complete. Final payment made by PG&E. Site was Certified in June 1989.
 RAW approved for excavation of contaminated soils above the cleanup level. Since not all soils will be removed, a deed restriction will be placed on the area where contaminants remain.
 Deed restriction recorded limiting use of the property to commercial/industrial.
 Removal Action Implementation Report Approved. Chiron excavated approximately 10,000 cubic yards of soils containing PCBs and hauled them offsite for disposal.
 Site Certified..

 Comments : This is the date the site was first listed AWP pursuant to Section 25356.
 SITE SCREENING DONE
 RECEIVED QUESTIONNAIRE
 HAULER: IT CORP.4575 PACHECO BLVD.MARTIN
 WASTE TYPE: PLATING WASTES
 Chromium (VI) has been measured as high as 880 ppm in groundwater and TCE has been measured as high as 80 ppm in groundwater. Soil contamination with Chromium as high as 5200 ppm has been measured. A review of a well inventory provided by the Alameda County Public Works Department revealed no groundwater use which would result in significant human exposure.
 RWQCB INVESTIGATING SITE
 NOTICE AND ORDER CAO - RWQCB.
 Site is a plating facility which previously disposed of chromium waste to shallow wells onsite. Hexavalent chromium has been detected in the subsurface soil and the groundwater. Site is paved and has restricted access.
 INSPECTION(STATE) GROUNDWATER CONTAMINATION: CHROMIC ACID
 INSPECTION(OTHER) E&E REP C(84)C400 ON SI. RWQCB ISSUED CAO 77-001 REQ CO QUIT CHROMIC ACID DISCH. RWQCB SUPRV REMEDIAL ACTIONS.
 ENFORCEMENT(OTHER) RWQCB TAKING LEAD ON SITE
 SFRWQCB says County preenforcement panel meeting held and the facility is on track to defining the problem. The site is being handled by the County but will be picked up by the Water Board when the problem is defined.

Address(es) : 4300 EASTSHORE HIGHWAY
EMERYVILLE, CA 94608
Background Info :
The site was construction of a new city street utilizing existing segments of Shellmound Street and a new overhead bridge structure in the City of Emeryville.
Not reported
The 40th Street overhead bridge construction required excavation of contaminated soils in 1995. Approximately 300 cubic yards of soils were excavated and disposed off-site. The remaining 5,700cubic yards were encapsulated withinan 18-inch thick clayblanket within the embankment and an additional 2 to 5 feet of clean fill was placed on top.
Not reported
Phase II of Shellmound project covered the construction of a surface street. Soil was contaminated with metals, PCBs petroleum hydrocarbons, and volatile and semi-volatile organics.

BARBARY COAST STEEL (Continued)

S102008194

About 8000 cubic yards of soil were excavated and treated on-site with dry reagents and an asphaltic emulsion mixture on-site. The treated soil was used as roadway. Approximately, 113,000 gallons of groundwater were collected, treated and disposed to the sanitary sewer. This removal took place in 1996. Not reported
 A deed restriction was recorded on June 28, 1996 limiting use of street and prohibits soil disturbance without an approved Soil Management Plan.

Comments Date : 06262001
 Comments : Five-Year review completed. The Site was a road construction project for the City of Emeryville, Shellmound Street (Site) also known as Bay/Shellmound/40th Street Project. The roadway serves as a cap for the treated contaminated soil. Inspections shown no major cracking, soil erosion, or structural damage.

Background Info : The Transo/Lacoste Site was the former location of the Transo Envelope Company (Transo) and the Lacoste Meat Company (Lacoste). Transo occupied 1600 64th Street and was an envelope manufacturing facility in the early 1900's. Lacoste occupied 6401 Bay Street and was a slaughter house and meat packing facility in the early 1900's. The City of Emeryville purchased both properties in 1990 as part of the Bay Street-Shellmound

Street Extension Project. Both facilities were located at the corner of 64th Street and Bay Street in Emeryville. The two buildings were demolished in February and March 1990 by the City of Emeryville Redevelopment Agency. The City redeveloped the Site as the EmeryBay II Apartments. Groundwater underneath the Site was discovered to be contaminated by lead, oil and grease in June 1991. Groundwater monitoring took place and a passive soil venting system was installed beneath the concrete parking garage slab of EmeryBay II.

TRANSO/LACOSTE SITE (Continued)

S102008152

Special Program Code: Not reported
Special Program : Not reported
Comments Date : 02211995
Comments : RA: Installation of a passive soil venting system.
Contamination of groundwater beneath the Site was discovered in June 1991. Lead (0.11 ppm) was detected in one of the monitoring wells. Total oil and grease (TOG) as high as 87 ppm was also detected in some of the wells. As part of the removal actions the RP abandoned four groundwater wells on the property and designed and installed a passive soil venting system beneath the concrete and parking garage of EmeryBay II.
Site screening. The Transo/Lacoste site is located in Emeryville & consists of 2 parcels: Parcel 4-2 located at 1600 64th Street, & Parcel 4-3 located at 6401 Bay St. Parcel 4-2 was formerly occupied by the Transo Envelope Company as its manufacturing facility from 1970 to 1989. Parcel 4-3 was owned by the Lacoste Meat Company & used as a slaughter house and meat packing plant from the early 1900s to 1989. Both parcels were acquired by the city of Emeryville in 1990 as part of the Bay St.-Shellmound Street extension project. Transo/Lacoste is surrounded by sites with documented soil & groundwater contamination: total petroleum hydrocarbons (TPH) as high as 5,250 ppm in soil and 240 ppm in groundwater has been found beneath the Emery Bay public market is still being characterized. Hazardous materials investigation was conducted at Transo/Lacoste to evaluate if soil & groundwater contamination is also present beneath the site. Ten soil borings were drilled & sampled, with six borings converted to groundwater monitoring wells. Sampling results from soil tests indicated presence of TPH as high as 3,600 ppm. Other contaminants detected include several volatile organic compounds (VOCs) and semi-volatile organic compounds. This initial sampling was conducted in December 1989. Semi-volatile organics included benzo-a-pyrene (2.3 ppm), chrysene (2.8 ppm), pyrene (6.4 ppm), fluoranthene (5.9 ppm) Acetone was detected as high as .2 ppm & toluene at 0.42 ppm in soil. Among the heavy metals, lead was found as high as 220 ppm and zinc as high as 820 ppm. Asbestos material has also been encountered when demolition of existing structures was completed. The asbestos were removed and disposed of as a hazardous material. Benzene was detected from groundwater samples at 0.004 ppm. Consultant is recommending continued groundwater monitoring and capping in-place before final development of the site is completed.
Questionnaire received (Arvey Paper/Transo Envelopes): No problem noted.
Surface soil sampling needed - risk calculations lacking - chemicals of concern and their exposure pathways not dismissed.
The Transo/Lacoste site is located in Emeryville and consists of 2 parcels: parcel 4-2 located at 1600 - 64th Street, and parcel 4-3 located at 6401 Bay Street. Both parcels were acquired by the City of Emeryville in 1990 as part of its redevelopment plan.

S102008152

A Hazardous Waste Management Plan (HWMP) was prepared and submitted to DTSC in lieu of a standard PEA report in fulfillment of AB3193 (Polanco Bill) requirements. In addition to the 2 parcels, a 1.5 acre piece of land was included in the HWMP report - this parcel is owned by the Martin Group - and the total area was then called Emerybay II. High concentrations of TPH (1,600 ppm) and total oil and rease (120,000 ppm) in soil were detected on site. Lead as high as 5,700 ppm was also detected in soil. No discussions of migration potential to S.F. Bay is included in the report. Chemicals of concern and their exposure pathways are also not discussed in the HWMP report.

 Comments Date : 01011992
 Comments :

DTSC needs to determine current site status.
 Site Screening Done: Two 5000-gallon diesel tanks and a waste oil tank removed by 11/20/86. Another 5000-gallon tank was removed in the '70s. Removal of 2600 cubic yards of soil. On site soil undergoing aerobic degradation. Recommend Preliminary Assessment due to need for information on ground water contamination.

Preliminary Assessment Done: Eight underground tanks removed. One diesel and one waste oil tank had leaked. Gas tank spill had occurred in the '70s. On-site aeration of 7000 cubic yards of soil. Shopping mall built on site. Additional contamination found in the southern part of the site. Hazardous waste contamination is migrating. Preliminary Assessment submitted to EPA. NFA under CERCLA2. This Site is under Alameda County Health Dept. oversight. Because groundwater TPH plume is flowing off-site onto the Shellmound Ventures Property, DTSC is reviewing clean-up proposals.

Self-Monitoring: Eight soil borings drilled to determine quantity and extent of diesel and other petroleum products in soil and groundwater. RWQCB is the lead agency. Self-Monitoring: Soil borings converted to monitoring wells. Sample Results: Five borings showed total fuel hydrocarbons greater than 1000 ppm (reported 08/11/86).

 Agency Address: 2000 CROW CANYON PL, STE 400
 SAN RAMON 94583
 Agency Contact: DAVE DEWITT Agency Phone: (925) 277-2384
 Design Flow: 0 Million Gal/Day Baseline Flow: 0 Million Gal/Day
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural
 or Solid Waste (Class I, II or III)
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste
 Discharge Requirements.
 Agency Type: Private
 Waste Type: Contaminated Ground Water - Hazardous/Influent or Solid Wastes that contain toxic,
 corrosive, ignitable or reactive substances and must be managed according to applicable
 DOHS standards.
 Threat to Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on
 receiving biota, can cause aesthetic impairment to a significant human population, or
 render unusable a potential domestic or municipal water supply. Awsthetic impairment
 would include nuisance from a waste treatment facility.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment
 system (except for septic systems with subsurface disposal), or any Class II or III
 disposal site, or facilities without treatment systems that are complex, such as marinas
 with petroleum products, solid wastes, and sewage pump out facilities.
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 NPDES Number: CAG912002 The 1st 2 characters designate the state. The remaining 7 are assigned by the

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D003	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
D004	ARSENIC
D005	BARIUM
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D011	SILVER
D022	CHLOROFORM
D028	1,2-DICHLOROETHANE
D035	METHYL ETHYL KETONE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

EPA Waste Codes Addendum

Code	Description
	ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
P098	POTASSIUM CYANIDE
P098	POTASSIUM CYANIDE K(CN)
P105	SODIUM AZIDE
P106	SODIUM CYANIDE
P106	SODIUM CYANIDE NA(CN)
U007	ACRYLAMIDE
U007	2-PROPENAMIDE
U103	DIMETHYL SULFATE
U103	SULFURIC ACID, DIMETHYL ESTER

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/29/03

Date Made Active at EDR: 03/04/03

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/04/03

Elapsed ASTM days: 28

Date of Last EDR Contact: 02/04/03

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/19/03

Date Made Active at EDR: 04/08/03

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 03/24/03

Elapsed ASTM days: 15

Date of Last EDR Contact: 03/24/03

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Date of Next Scheduled EDR Contact: 05/12/03

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/10/03
Date of Next Scheduled EDR Contact: 06/09/03

TRIS: Toxic Chemical Release Inventory System

Source: EPA
Telephone: 202-260-1531

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/00
Database Release Frequency: Annually

Date of Last EDR Contact: 03/25/03
Date of Next Scheduled EDR Contact: 06/23/03

TSCA: Toxic Substances Control Act

Source: EPA
Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/98
Database Release Frequency: Every 4 Years

Date of Last EDR Contact: 03/06/03
Date of Next Scheduled EDR Contact: 06/09/03

EDR PROPRIETARY HISTORICAL DATABASES

EDR Historical Gas Station and Dry Cleaners: EDR has searched select national collections of business directories and has collected listings of potential dry cleaner and gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning and gas station/filling station/service station establishments. The categories reviewed included, but were not limited to: *gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, dry cleaner, cleaners, laundry, laundromat, cleaning/laundry, wash & dry, etc.*

This information is meant to assist and complement environmental professionals in their conduct of environmental site assessments, and is not meant to be a substitute for a full historical investigation as defined in ASTM E1527. The information provided in this proprietary database may or may not be complete; i.e., the absence of a dry cleaner or gas station/filling station/service station site does not necessarily mean that such a site did not exist in the area covered by this report.

(A note on "dry cleaning" sites: it is not possible for EDR to differentiate between establishments that use PERC on-site as a cleaning solvent and sites that function simply as drop-off and pick-up locations or that are traditional wet cleaning/laundry facilities. Therefore, it is essential for environmental professionals to incorporate professional judgment in the evaluation of each site.)

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

Date of Next Scheduled EDR Contact: 06/02/03

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

5630 SAN PABLO AVENUE
5630 SAN PABLO AVENUE
OAKLAND, CA 94608

TARGET PROPERTY COORDINATES

Latitude (North):	37.839500 - 37° 50' 22.2"
Longitude (West):	122.282501 - 122° 16' 57.0"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	563133.6
UTM Y (Meters):	4188044.8
Elevation:	42 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map: 2437122-G3 OAKLAND WEST, CA
General Topographic Gradient: General West
Source: USGS 7.5 min quad index

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ALAMEDA, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map

--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Cenozoic	Category:	Stratified Sequence
System:	Quaternary		
Series:	Quaternary		
Code:	Q (decoded above as Era, System & Series)		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	13 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.20 Min: 0.06	Max: 8.40 Min: 6.10

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	13 inches	60 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.20 Min: 0.06	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
clay loam
loam
silt loam

Surficial Soil Types: silty clay loam
clay loam
loam
silt loam

Shallow Soil Types: clay
gravelly - sandy clay loam
clay loam
stratified

Deeper Soil Types: clay loam
stratified
silty clay loam
sandy clay loam
loam
silty clay
weathered bedrock

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

RADON**

AREA RADON INFORMATION

Federal EPA Radon Zone for ALAMEDA County: 2

Note: Zone 1 indoor average level > 4 pCi/L.

: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.

: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for ALAMEDA COUNTY, CA

Number of sites tested: 49

<u>Area</u>	<u>Average Activity</u>	<u>% <4 pCi/L</u>	<u>% 4-20 pCi/L</u>	<u>% >20 pCi/L</u>
Living Area - 1st Floor	0.776 pCi/L	100%	0%	0%
Living Area - 2nd Floor	-0.400 pCi/L	100%	0%	0%
Basement	1.338 pCi/L	100%	0%	0%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

STATE RECORDS

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations for District 2, 3, 5 and 6

Source: Department of Conservation

Telephone: 916-323-1779

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
