Mr. Onson and Mr. Singh,

In order to keep the subject site progressing toward resolution, and as discussed in the attached directive letter (comment 3), ACEH requests an updated water supply well installation schedule. This was due to ACEH by September 30th. Resolution of this question / date is a critical milestone for the subject site due to the need for a viable water supply for site redevelopment.

Please be aware that Chevron has recently requested an extension for the submittal of a pilot test work plan from October 5 to October 29th due to internal technical discussions. In order to keep the two parallel aspects of the site progressing at a similar pace, and ensure mutual progress at the site, ACEH requests that the water supply well installation schedule be provided to ACEH and all parties by October 30th.

Should you have questions, please do not hesitate to contact me.
Thank you,

Mark Detterman
