Mark

I did check my field notes for MW-7 at Fidelity Roof Co. The boring log is correct, the well has 5 ft of screen (20-15 ft) and 15 ft of blank casing. I suspect that, in writing the report, we just copied the workplan and changed the tenses from future to past tenses, without changing the numbers. I didn't catch it when reviewing the report. Do you want me to revise the report?

Thanks
Jim
