**Subject:** RE: PG&E Notification for Electric Pole Replacement Project 31193311 Near FIDELITY ROOF COMPANY (T0600102117) in Oakland

Zantha,

In regards to the Fidelity Roofing site, no additional information has been generated since case closure in May 2013. The predominate groundwater flow direction was to the northwest, so I would consider there to be a relatively low likelihood of encountering contamination from the site at the pole replacement location. Depth to groundwater at well MW-5 was no shallower than approximately 9.2 feet below grade surface at that time, so your crew may not encounter groundwater.

In regards to the California Linen Supply site, you will need to communicate with Mark Johnson of the RWQCB as he has been working that site more recently than the County, and may know more current information. While ACDEH managed that case, there was a slightly higher probability of contamination from that site to impact your current work area.

Dear Mark Detterman:

Reference:

Case No. T0600102117, FIDELITY ROOF COMPANY, 1075 40<sup>th</sup> Street, Oakland CA 94608

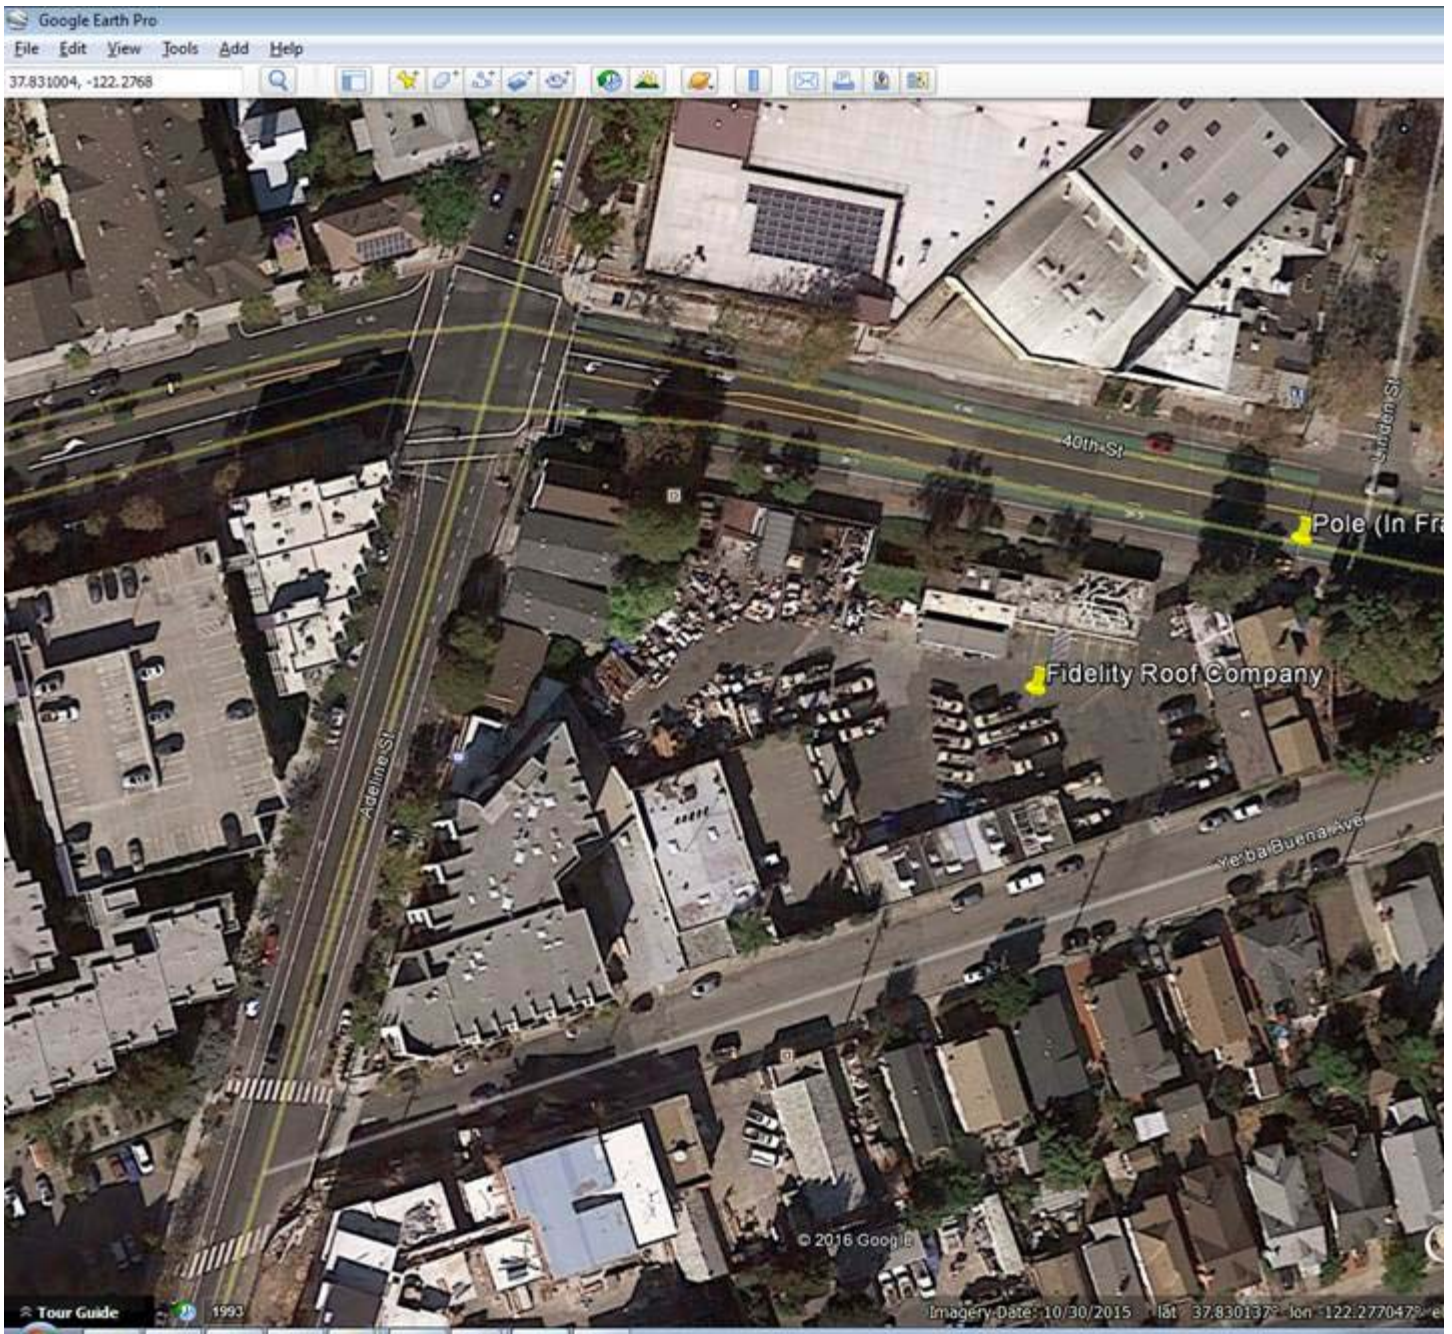

PG&E is issuing a courtesy notification to Alameda County Environmental Health, informing you of an upcoming electric pole replacement in the vicinity of FIDELITY ROOF COMPANY in Oakland (T0600102117) closed contamination site with

post closure Site Management Requirements. OAKLAND NATIONAL ENGRAVERS (T0600101659), DUNNE QUALITY PAINTS (T0600101693), SAN FRANCISCO FRENCH BREAD COMPANY (T0600101186), CALIFORNIA LINEN SUPPLY CO (T0600100249) and MAGNOLIA TERRACE (T10000001166) are all listed in the vicinity.

The project involves the replacement of one electric distribution pole. The replacement of the pole involves the removal of the existing pole and placement of a new pole in a 6-8 foot deep excavation. The approximate location of the project is below.

Based on information available on Geotracker, contamination was not encountered in MW5 (nearest our work area) during the final groundwater sampling event in November 2011. Can you please indicate if you have additional information for contamination in the project work area, or if you have any additional requirements for our planned work to commence? The project is currently scheduled to take place on October 12th, 2016, and should only take one day.

Please indicate if additional information is needed; and, if you have any issues or concerns. PG&E appreciates Alameda County's consideration and assistance in this matter.

Thank you,

Zantha Ricks – Sr. Environmental Field Specialist
