Ian,

Based on your request, the schedule for report submittal for case RO188 is extended to May 22, 2013.

Regards,
Jerry Wickham

Good morning Jerry,

I just wanted to follow up regarding the message I left on your voicemail. ACC completed the field work for 2900 Ladd Avenue and is in the process of preparing the report for the work. I believe the report is due today, but we were not able to schedule the 48-hour DPE pilot test until last week and are still waiting to receive the findings for that test. We respectfully request an extension just to complete the report of our findings. We hope to wrap the report up shortly. Please contact me if you would like to discuss.

Thanks.

Ian,

Based on your request, the schedule for submittal of a Pilot Test Report is extended to April 22, 2013. The last directive letter dated August 20, 2012 did not request a Work Plan to implement the described scope of work. The work may be implemented as proposed. However, if the scope of work changes from that described in the CAP, then you are required to submit a Work Plan. You may also submit a Work Plan if you request ACEH input or approval of a specific detail or modification of the pilot test.

Subject: 2900 Ladd Avenue, Livermore, CA - Livermore Joint Unified School District (LJUSD)

Good afternoon Jerry,

It looks like we have been awarded the contract to conduct the well destruction, dual-phase extraction pilot test and potential 30-day dual phase extraction procedure (pending results of the pilot test) for 2900 Ladd Avenue, Livermore (GeoTracker Global ID: **T0600100844**). Since delivering our proposal, the LJUSD has been working hard to secure funding for the work and is in the process of drafting the Professional Services Agreement. Seeing as the deadline for completion of the well destruction and DPE pilot test is quickly approaching, we would like to respectfully request an extension for the work. I am under the impression that we do not need to prepare a formal work plan to conduct this particular work at this site, but I want to make sure I'm not mistaken. Could you please confirm whether or not you will require approval of a work plan prior to conducting the work?

Thank you.
