Jerry-

I just wanted to touch bases with you regarding the vapor well installation and sampling at former Texaco 211253 (RO189). The 5 dual nested vapor wells were installed last week and were scheduled to be sampled Tuesday-Thursday (3/5-3/7). However, due to the rainy weather predicted for Tuesday-Wednesday (at least) of this week, we are re-scheduling the vapor sampling for next week (3/12-3/14). Dates may be adjusted depending on how many days of rain we get to allow for 72-hours between the rain event and sampling. This may necessitate an extension of the report submittal due date. I will let you know once the wells have been sampled and I have received the final analytical reports.

Please let me know if you have any questions.
Thanks,

Brian Silva
