Thank you. I put you down for the week after MLK day so hopefully I will be able to let you know what I need for the fact sheet and what radius to send it out to by the end of that week.

In response to Elise's earlier e-mail about reduction in sampling for new wells that have been monitored for one year, it is fine to reduce to semi-annual monitoring. If the CAP is approved, sampling frequency will likely be increased for performance monitoring.

Ms. Jakub,

We received correspondence from Ed Firestone regarding the status of the redial action plan for the referenced site submitted by us in February 2009. Mr. Firestone mentioned in his correspondence that you would be reviewing the document in January and that you would like some assistance with preparing a "fact sheet" for neighboring properties. We completed a similar fact sheet for previous remediation at the site in January 2007 and would be happy to assist however possible. Please let me know what information is required to be included on the fact sheets and we will prepare and distribute them.

Please feel free to contact me at any time regarding this project.

Thank you,

Paul B. Dotson, PG
Senior Project Geologist
