Peter,

Groundwater monitoring may be suspended at this time for case R00194.

Regards,

Jerry,

Can we suspend groundwater monitoring at this site pending ACEH's closure review?

Regards,

Peter Schaefer

Based on my discussion with Peter this morning, we will look for a closure request in the next Monitoring Report and go from there.

I think both of us would like to close this one. I think there is very little we can do here, and do not think further monitoring will really benefit anything here, or bring any new perspectives.

Hi Denis,  
Hope you have enjoyed the summer so far and can enjoy the last few weeks as well.

When we talked about the 5251 Hopyard site last February, I believe we discussed this site as a candidate for MNA. The May 2011 Monitoring Report discusses re-evaluating the previous sulfate injection data.

After reviewing the monitoring report, it appears this site might be able to move to closure.

Do you or Peter have any comments on going for closure on this site now?

Thanks,  
Jerry Wickham
