Re: Chevron Service Station No. 9-0290
1802 Webster Street
Alameda, CA

I have reviewed the attached report titled Well Destruction Report

I agree with the conclusions and recommendations presented in the referenced report. The information in this report is accurate to the best of my knowledge and all local Agency/Regional Board guidelines have been followed. This report was prepared by Conestoga-Rovers & Associates, upon whose assistance and advice I have relied.

This letter is submitted pursuant to the requirements of California Water Code Section 13267(b)(1) and the regulating implementation entitled Appendix A pertaining thereto.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge.

Sincerely,

A handwritten signature in blue ink that reads "Alexis Fischer".

Re: Well Destruction Report
Chevron Service Station 90290
1802 Webster Street
Alameda, California
Case No. RO0000195

Dear Mr. Detterman:

Conestoga-Rovers & Associates (CRA) is submitting this *Well Destruction Report* for the site referenced above (Figure 1) on behalf of Chevron Environmental Management Company (EMC). As the final step, prior to case closure, in accordance with the Alameda County Environmental Health (ACEH) letter dated November 21, 2013 and email dated February 6, 2014 (Attachment A), the remaining monitoring wells B-1 and B-5 through B-15 were destroyed as described below.

1.0 Well Destruction Activities

Permits

Well destruction was performed in general accordance with Alameda County Public Works Agency (ACPWA) water resources well permits W2014-0363 through W2014-0375, dated April 17, 2014. Encroachment permits EN14-0073 and EN14-0088 were also obtained from the City of Alameda for the destruction of offsite wells B-7 and B-15. Copies of all permits are included as Attachment B. A-1 is an underground storage tank (UST) back fill observation well and was inadvertently placed on the ACPWA well permit to be destroyed. The UST back fill observation well will stay in place, as it is associated with the current USTs and will be destroyed when the USTs are removed.

- 2 -

Site Health and Safety Plan

CRA prepared a site specific health and safety plan (HASP) to protect site workers and visitors during the well destruction activities. The HASP was kept onsite, and reviewed, signed, and followed by site workers and visitors.

Underground Utility Location

CRA marked the site for Underground Service Alert (USA) clearance and notified USA prior to beginning work. Private underground utility locator, NORCAL Geophysical Consultants Inc., of Cotati, California, was contracted to identify subsurface utilities and obstructions near the wells and to confirm markings by USA.

Well Destruction

On May 5 through May 7, 2014, CRA staff observed Vapor Tech Services (C-57 License No. 916085) destroy wells B-1 and B-5 through B-15 (Figure 2). As permitted by ACPWA, the wells were destroyed by pressure grouting. Pressure grouting was completed by injecting neat Portland Type I/II cement through a tremie pipe to the wells total depth. A pressure of 25 pounds per square inch was then applied to the well casing for at least 5 minutes. The well boxes were removed and backfilled with concrete to match existing surface grade. CRA's *Standard Field Procedures for Monitoring Well Destruction* is presented as Attachment C.

Well Completion Reports

CRA submitted the Well Completion Reports to the Department of Water Resources (DWR) under a separate cover. The DWR Well Completion Reports are confidential documents and are not included in this report. Copies are maintained in our files and can be provided upon written request.

Waste Removal

The only waste generated by the well destruction activities was construction debris from the well boxes. The construction debris was stored on site in Department of Transportation (DOT) approved 55-gallon drums. The construction debris will be transported to an appropriate disposal facility within the next 60 days.

Closing

All monitoring wells at the site have been destroyed which completes the no further action activities approved by ACEH (Attachment A). On behalf of EMC, CRA requests final case closure approval.

Please contact Mr. Nathan Lee at (925) 849-1003 if you have any questions or need any additional information.

Regards,
CONESTOGA-ROVERS & ASSOCIATES

Subject: Landowner and Public Participation Notification for Case Closure Consideration for Fuel Leak Case No. RO0000195 and GeoTracker Global ID T0600100307, Chevron #9-0290, 1802 Webster Street, Alameda, CA 94501

Dear Ms. Espino Devine:

Alameda County Environmental Health (ACEH) is reviewing the fuel case file for the above referenced site for potential case closure. As you are aware a site investigation and groundwater monitoring for underground storage tank leaks has been performed at the subject property to which you are named as the primary or active responsible party.

List of Landowners Form

Pursuant to Section 25297.15 (a) of the California Health and Safety Code, Alameda County Environmental Health (ACEH), the local agency, shall not consider cleanup or site closure proposals from the primary or active responsible party, issue a closure letter, or make a determination that no further action is required with respect to a site upon which there was an unauthorized release of hazardous substances from an underground storage tank subject to this chapter unless all current record owners of fee title to the site of the proposed action have been notified of the proposed action by the primary or active responsible party. ACEH is required to notify the primary or active responsible party of their requirement to certify in writing to the local agency that the notification requirement in the above-mentioned regulation has been satisfied and to provide the local agency with a complete mailing list of all record fee title owners.

To satisfy this requirement, please complete the enclosed *List of Landowners Form* (Attachment A) and mail it back to ACEH by the date identified below. Also your comments, if any, must be considered prior to the proposed closure. Please respond within 30 days from the date of this letter for your comments to be considered.

Public Participation

Public participation is a requirement for the Corrective Action Plan and case closure process. In order to notify potentially affected members of the public of the potential fuel leak case closure, ACEH has distributed the attached *Notification of Potential Case Closure* to addresses in the immediate vicinity. The *Notification of Potential Case Closure* requests that landowners or residents submit any comments or questions to ACEH regarding potential case closure by January 25, 2014. ACEH will consider all comments from the public prior to potential case closure.

Ms. Catalina Espino Devine

Request for Monitoring Well Destruction Scheduling and Waste Removal

Local Oversight Programs are required by the State's Low Threat Closure Policy (LTCP) to issue a uniform closure letter within 30 days from the end of the public comment period for case closures. Therefore, in order to meet this deadline ACEH requests that waste (as defined by the LTCP) is removed from the site, wells are destroyed, and the Well Decommissioning Report and appropriate documentation submitted within three weeks after the end date of the public comment period. In order to facilitate this tight timeframe, we advise you to schedule well destruction and waste removal activities during the comment period so that you can mobilize to the site quickly. Please contact the Alameda County Public Works Agency at 510-567-6791 or online, to obtain the required permits. After written ACEH concurrence (e-mail or other) that there have been no comments, and provided ACEH receives the required List of Landowners Form as is described above, you would be free to proceed with well decommissioning and waste removal activities. Should we receive any public comments, there would be sufficient time to cancel and/or reschedule the well decommissioning date and avoid incurring a cost from the drilling company. Please provide notification to ACEH by the date identified below, that you have contracted a licensed drilling contractor for the decommissioning of all remaining wells at the site and provide ACEH the date of the scheduled well decommissioning and waste removal activities.

TECHNICAL REPORT REQUEST

Please upload technical reports to the ACEH ftp site (Attention: Mark Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the specified file naming convention below, according to the following schedule:

- **November 25, 2013** – Public Comment Period Begins
- **December 27, 2013** - Return *List of Landowner Form*
File to be named: RO195_LNDOWNR_F_yyyy-mm-dd
- **December 27, 2013** - Confirmation of Well Decommissioning and Waste Removal Date
- **January 25, 2014** – Public Comment Period Ends
- **2 Weeks after Close of Public Comment Period** – Well Decommissioning and Waste Removal
- **3 Weeks After Close of Public Comment Period** – Submit the *Well Decommissioning Report*
File to be named: RO195_WELL_DCM_R_yyyy-mm-dd
- **4 Weeks After Close of Public Comment Period** – ACEH issues uniform closure letter if all required documents are submitted

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Online case files are available for review at the following website: <http://www.acgov.org/aceh/index.htm>.

Should you have any questions, please contact me at (510) 567-6876 or send me an electronic mail message at mark.detterman@acgov.org.

Sincerely,

Mark E. Detterman, PG, CEG
Senior Hazardous Materials Specialist

Attachment 1

Responsible Party(ies) Legal Requirements/Obligations

REPORT/DATA REQUESTS

These reports/data are being requested pursuant to Division 7 of the California Water Code (Water Quality), Chapter 6.7 of Division 20 of the California Health and Safety Code (Underground Storage of Hazardous Substances), and Chapter 16 of Division 3 of Title 23 of the California Code of Regulations (Underground Storage Tank Regulations).

ELECTRONIC SUBMITTAL OF REPORTS

ACEH's Environmental Cleanup Oversight Programs (Local Oversight Program [LOP] for unauthorized releases from petroleum Underground Storage Tanks [USTs], and Site Cleanup Program [SCP] for unauthorized releases of non-petroleum hazardous substances) require submission of reports in electronic format pursuant to Chapter 3 of Division 7, Sections 13195 and 13197.5 of the California Water Code, and Chapter 30, Articles 1 and 2, Sections 3890 to 3895 of Division 3 of Title 23 of the California Code of Regulations (23 CCR). Instructions for submission of electronic documents to the ACEH FTP site are provided on the attached "Electronic Report Upload Instructions."

Submission of reports to the ACEH FTP site is in addition to requirements for electronic submittal of information (ESI) to the State Water Resources Control Board's (SWRCB) Geotracker website. In April 2001, the SWRCB adopted 23 CCR, Division 3, Chapter 16, Article 12, Sections 2729 and 2729.1 (Electronic Submission of Laboratory Data for UST Reports). Article 12 required electronic submittal of analytical laboratory data submitted in a report to a regulatory agency (effective September 1, 2001), and surveyed locations (latitude, longitude and elevation) of groundwater monitoring wells (effective January 1, 2002) in Electronic Deliverable Format (EDF) to Geotracker. Article 12 was subsequently repealed in 2004 and replaced with Article 30 (Electronic Submittal of Information) which expanded the ESI requirements to include electronic submittal of any report or data required by a regulatory agency from a cleanup site. The expanded ESI submittal requirements for petroleum UST sites subject to the requirements of 23 CCR, Division, 3, Chapter 16, Article 11, became effective December 16, 2004. All other electronic submittals required pursuant to Chapter 30 became effective January 1, 2005. Please visit the SWRCB website for more information on these requirements: (http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/).

PERJURY STATEMENT

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6735, 7835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

UNDERGROUND STORAGE TANK CLEANUP FUND

Please note that delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

AGENCY OVERSIGHT

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

Alameda County Environmental Cleanup Oversight Programs (LOP and SCP)	REVISION DATE: July 25, 2012
	ISSUE DATE: July 5, 2005
	PREVIOUS REVISIONS: October 31, 2005; December 16, 2005; March 27, 2009; July 8, 2010
SECTION: Miscellaneous Administrative Topics & Procedures	SUBJECT: Electronic Report Upload (ftp) Instructions

The Alameda County Environmental Cleanup Oversight Programs (petroleum UST and SCP) require submission of all reports in electronic form to the county's FTP site. Paper copies of reports will no longer be accepted. The electronic copy replaces the paper copy and will be used for all public information requests, regulatory review, and compliance/enforcement activities.

REQUIREMENTS

- Please **do not** submit reports as attachments to electronic mail.
- Entire report including cover letter must be submitted to the ftp site as a **single Portable Document Format (PDF) with no password protection**.
- It is **preferable** that reports be converted to PDF format from their original format, (e.g., Microsoft Word) rather than scanned.
- **Signature pages and perjury statements must be included and have either original or electronic signature.**
- **Do not password protect the document.** Once indexed and inserted into the correct electronic case file, the document will be secured in compliance with the County's current security standards and a password. **Documents with password protection will not be accepted.**
- Each page in the PDF document should be rotated in the direction that will make it easiest to read on a computer monitor.
- Reports must be named and saved using the following naming convention:

RO#_Report Name_Year-Month-Date (e.g., RO#5555_WorkPlan_2005-06-14)

Submission Instructions

- 1) Obtain User Name and Password
 - a) Contact the Alameda County Environmental Health Department to obtain a User Name and Password to upload files to the ftp site.
 - i) Send an e-mail to deh.loptoxic@acgov.org
 - b) In the subject line of your request, be sure to include "**ftp PASSWORD REQUEST**" and in the body of your request, include the **Contact Information, Site Addresses, and the Case Numbers (RO# available in Geotracker) you will be posting for.**
- 2) Upload Files to the ftp Site
 - a) Using Internet Explorer (IE4+), go to <ftp://alcoftp1.acgov.org>
 - (i) Note: Netscape, Safari, and Firefox browsers will not open the FTP site as they are NOT being supported at this time.
 - b) Click on Page located on the Command bar on upper right side of window, and then scroll down to Open FTP Site in Windows Explorer.
 - c) Enter your User Name and Password. (Note: Both are Case Sensitive.)
 - d) Open "My Computer" on your computer and navigate to the file(s) you wish to upload to the ftp site.
 - e) With both "My Computer" and the ftp site open in separate windows, drag and drop the file(s) from "My Computer" to the ftp window.
- 3) Send E-mail Notifications to the Environmental Cleanup Oversight Programs
 - a) Send email to deh.loptoxic@acgov.org notify us that you have placed a report on our ftp site.
 - b) Copy your Caseworker on the e-mail. Your Caseworker's e-mail address is the entire first name then a period and entire last name @acgov.org. (e.g., firstname.lastname@acgov.org)
 - c) The subject line of the e-mail must start with the RO# followed by **Report Upload**. (e.g., Subject: RO1234 Report Upload) If site is a new case without an RO#, use the street address instead.
 - d) If your document meets the above requirements and you follow the submission instructions, you will receive a notification by email indicating that your document was successfully uploaded to the ftp site.

INVITATION TO COMMENT – POTENTIAL CASE CLOSURE

**Chevron #9-0290
1802 Webster Street, Alameda, CA 94501
FUEL LEAK CASE RO0000195
GEOTRACKER GLOBAL ID T0600100307**

November 21, 2013

The above referenced site is a fuel leak case that is under the regulatory oversight of the Alameda County Environmental Health (ACEH) Local Oversight Program for the investigation and cleanup of a release of petroleum hydrocarbons from an underground storage tank system. Site investigation and cleanup activities have been completed and the site has been evaluated in accordance with the State Water Resources Control Board Low-Threat Closure Policy. The site appears to meet all of the criteria in the Low-threat Closure Policy. Therefore, ACEH is considering closure of the fuel leak case.

This notice is being sent to the current landowner in compliance with Health and Safety Code Section 25295.40. It is also being sent to the current occupants and landowners of adjacent properties and known interested parties for this site.

The public is invited to review and comment on the potential closure of the fuel leak case. The entire case file can be viewed over the Internet on the ACEH website (<http://www.acgov.org/aceh/lop/ust.htm>) or the State of California Water Resources Control Board GeoTracker website (<http://geotracker.swrcb.ca.gov>). Please send written comments to Mark Detterman at the address below; all comments will be forwarded to the responsible parties. **Comments received by January 25, 2014 will be considered and responded to prior to a final determination on the proposed case closure.**

If you have comments or questions regarding this site, please contact the ACEH caseworker, Mark Detterman at 510-567-6876 or by email at mark.detterman@acgov.org. Please refer to ACEH case RO0000195 in any correspondence.

Detterman, Mark, Env. Health

From: Detterman, Mark, Env. Health
Sent: Thursday, February 06, 2014 3:02 PM
To: Waite, Brian A; Fischer, Alexis N
Cc: Roe, Dilan, Env. Health; 'Lee, Nathan'
Subject: Close of Public Comment Period, Completion of Landowner Form, and Well Destruction at Chevron 97127 (RO195)
Attachments: DIR_L_2013-11-21.pdf

Brian,

The public comment period for the subject site ended on January 25, 2014. One verbal comment was received by Alameda County Environmental Health (ACEH) from the trustee for the site on the southwest corner of the intersection of Webster Street and Buena Vista Avenue. A subsequent meeting was held at ACEH on December 11, 2013, general site details were discussed, and written comments were requested if any concerns remained. No subsequent written communications were received.

You should be aware that the *List of Landowner Form* requested in, and included in the attached directive letter, has not been returned. Case closure cannot be issued until the form is returned and signed by the appropriate site landowner. All responsible parties, including recent owners, are required by state regulation to be notified of the pending closure, and allowed to comment.

Provided that all landowners have been notified of the pending closure, Chevron is free to proceed with the destruction of all wells associated with the site (groundwater, vapor, etc), as requested in the attached November 21, 2013 letter from ACEH.

TECHNICAL REPORT REQUEST

Please upload technical reports to the ACEH ftp site (Attention: Mark Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the specified file naming convention below, according to the following schedule:

- **February 21, 2014** – Completed Landowner Form
File to be named RO195_LNDOWNR_F_yyyy-mm-dd
- **April 25, 2014** – Well Destruction Report (including Waste Disposal Documentation)
File to be named RO195_WELL_DCM_R_yyyy-mm-dd

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Specific Work Permit Conditions

1. Drilling Permit(s) can be voided/ cancelled only in writing. It is the applicant's responsibility to notify Alameda County Public Works Agency, Water Resources Section in writing for an extension or to cancel the drilling permit application. No drilling permit application(s) shall be extended beyond ninety (90) days from the original start date. Applicants may not cancel a drilling permit application after the completion date of the permit issued has passed.

2. Prior to any drilling activities, it shall be the applicant's responsibility to contact and coordinate an Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits or agreements required for that Federal, State, County or City, and follow all City or County Ordinances. No work shall begin until all the permits and requirements have been approved or obtained. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County an Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.

3. Compliance with the well-sealing specifications shall not exempt the well-sealing contractor from complying with appropriate State reporting-requirements related to well construction or destruction (Sections 13750 through 13755 (Division 7, Chapter 10, Article 3) of the California Water Code). Contractor must complete State DWR Form 188 and mail original to the Alameda County Public Works Agency, Water Resources Section, within 60 days. Include permit number and site map.

4. Applicant shall submit the copies of the approved encroachment permit to this office within 60 days.

5. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost and liability in connection with or resulting from the exercise of this Permit including, but not limited to, property damage, personal injury and wrongful death.

6. Applicant shall contact Steve Miller for an inspection time at (510) 670-5517 or email to stevem@acpwa.org at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

7. Permittee, permittee's contractors, consultants or agents shall be responsible to assure that all material or waters generated during drilling, boring destruction, and/or other activities associated with this Permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on or off-site storm sewers, dry wells, or waterways or be allowed to move off the property where work is being completed.

8. Remove the Christy box or similar structure.

Destroy well by grouting neat cement with a tremie pipe or pressure grouting (25 psi for 5min.) to the bottom of the well and by filling with neat cement to three (3-5) feet below surface grade. Allow the sealing material to spill over the top of the casing to fill any annular space between casing and soil.

After the seal has set, backfill the remaining hole with concrete or compacted material to match existing conditions.

9. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.

Re: Permit No. EN14-0073, Destroy (2) Wells in Sidewalk by Pressure Grout (Located NW Corner of Intersection of Webster Street & Buena Vista Avenue, Sidewalk West Side of Webster Street)

Job Address: 1802 Webster Street

Applicant: Charley Austin
2300 Clayton Road #920
Concord, CA 94520

APPROVAL NOTICE

Public Works staff has reviewed and approved the application for Permit No. EN14-0073. The following comments are the City's requirements for approval and shall be enforced, as necessary. The permittee and/or his contractor(s) shall abide by the following provisions:

Specific Comments

Civil

1. The pavement section within the dig out area shall be restored to match the adjacent pavement section depth and meet all the requirements of the City of Alameda Standard Plans and Specifications. See general comments for additional guidelines on pavement and excavation restoration.

Traffic

2. Work hours shall be limited to 9 am to 4 pm.
3. See general comments regarding pedestrians.

General Comments (inspector will enforce the comments that are applicable):

1. Public Notifications: All property owners within the immediate vicinity of the work area must be notified in writing at least 5 days prior to the start of construction. The notification letter must include a brief description of the work, the anticipated project completion date and a contact name and phone number for citizens to report their concerns while work is in progress.
2. Additional Permits: The Contractor shall be responsible for obtaining all additional permits such as excavation, concrete, electrical, plumbing, or other necessary permits prior to beginning construction for any work not contained within the scope of this permit.
3. "No Parking" Signs: Posting of "No-Parking" signs including side streets, as applicable, is required 48 hours in advance. "No-Parking" signs are available at the Planning and Building Department, Room 190, City Hall. A fee will be charged for the signs. Only City of Alameda issued "No-Parking" signs are permitted for use within the public right-of-way.
4. Designated Truck Routes: All truck deliveries to the proposed work site must remain on established truck routes.
5. USA: All utilities within the work area shall be located and marked by USA prior to commencing excavation, trenching, micro-tunneling, or boring operations.
6. Work Hours: Unless stated otherwise in the specific comments, work hours are limited to the hours of 8:30 a.m. to 4:30 p.m., Monday through Friday. Be advised that uninterrupted traffic circulation within the public right-of-way is mandatory during the commute hour of 7:30 a.m. to 9:00 a.m. and 3:00 p.m. to 4:30 p.m. Work done on Saturdays, requiring inspection, is prohibited unless approved by the City Engineer and an inspector is available. Requests to work Saturday require two-week minimum prior notice. Inspection fees for Saturday work will be at time and a half (1-1/2) with a four-hour minimum. Said fee will be in accordance with the latest public works fee overtime schedule. No construction activity shall be permitted on Sundays or State and Federal holidays.
7. Construction Staging: Storage of construction materials and equipment within the public right-of-way is not permitted.
8. URCWP (General/As Applicable): Construction materials (i.e. cement bags, paints, flammables, oils, fertilizers, pesticides, or any other materials that have potential for being discharged into the storm drain system by wind or as the result of a material spill) shall be kept in a contained and covered area on-site, as is practical, while construction is

in progress. When feasible, tarps shall be used on the ground to collect fallen debris or splatters that could contribute to stormwater pollution. All temporary construction piles may remain on-site no more than 48 hours (continuous) and shall be securely covered overnight with a tarp or other device to contain debris. All construction debris shall be gathered and properly disposed of off-site on a regular basis.

9. Noise Generating Construction Activity: Maintain construction noise, dust control and cleanup to City acceptable levels. Construction equipment shall be properly muffled. Unnecessary idling of excavation and/or grading equipment is prohibited. Stationary noise-generating construction equipment such as compressors shall be located as far as practical from occupied residential housing units. Contractor shall be responsible for responding to any local complaints about construction noise.
10. Daily Work Site Cleanup: Trash and debris shall be cleaned up daily. Work area and haul routes shall be swept daily (with water sweepers) to remove construction-related materials. All construction debris shall be gathered on a regular basis and placed in a dumpster which is emptied or removed weekly. Any temporary on-site construction piles shall be securely covered with a tarp or other device to contain debris. Construction and demolition debris, and recycling, disposal shall be in accordance to the Alameda Municipal Code, Chapter XXI.
11. Storm Water BMP: Construction equipment, tools, etc. shall not be cleaned or rinsed into a street, gutter or storm drain. Concrete trucks and concrete finishing operations shall not discharge wash water into the street gutters or drains. There shall be no debris in the gutters. A contained and covered area on-site shall be used for storage of cement bags, paints, flammables, oils, fertilizers, pesticides, or any other materials that have potential for being discharged to the storm drain system by wind or in the event of a material spill. When feasible, tarps shall be used on the ground to collect fallen debris or splatters that could contribute to storm water pollution. Construction best management practices (BMP) for control of storm water runoff (e.g. straw waddles at catch basin inlets) shall be used where applicable. Contact the Public Works Environmental Services Division, at (510) 749-7930 for information on best management practices.
12. Clean Water Program (MRP, Provision C.3.a): The project applicant is encouraged to implement one or more site design measure, such as those listed below, to protect the quality of local stormwater runoff:
 - a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.
 - b. Direct roof runoff onto vegetated areas.
 - c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.
 - d. Direct runoff from driveways and/or uncovered parking areas onto vegetated areas.
 - e. Construct sidewalks, walkways, and/or patios with permeable surfaces.
 - f. Construct driveways and/or uncovered parking areas with permeable surfaces

13. Pavement, Traffic Striping & Detectors: If the street pavement in the vicinity of the job site is damaged as a result of construction activity, then either pavement repair/reconstruction or an asphalt concrete overlay shall be required, as determined by the City Engineer or assigned representative. Additionally, traffic striping & marking, signal detectors, curb, gutter and other concrete improvements, damaged as a result of construction shall be replaced to the satisfaction of the City Engineer or assigned representative. Installation and maintenance of temporary striping and pavement markers is required while work is ongoing.
14. Traffic Control: If construction work encroaches within the right-of-way, the applicant must submit a traffic control plan that conforms to the following requirements:
- The traffic control plan shall follow the standards and guidelines provided by the most recent version of the CA MUTCD and Caltrans Standard Plans.
 - If a lane is to remain open, the lane width shall be at least:
 - 12 feet on truck routes, bus routes, and paratransit routes
 - 10 feet otherwise.
 - Base the taper lengths, delineator spacing, and sign spacing on a traffic speed equal to the posted speed limit plus 5 MPH.
 - Post an R4-7 sign at the entrances of every coned centerline delineation.
 - Notify Joseph Robinson at AC Transit (510-891-4908) if the work zone is in a bus stop, near a bus stop, or on a bus route. The work shall not interfere with AC Transit bus service in the area. Joseph Robinson shall be notified at least 2 weeks in advance of the work.
 - Notify Gail Payne at the City of Alameda Public Works Department (510-747-7948) if the work zone is in or near a City of Alameda Paratransit Shuttle stop.
 - Pedestrians shall be properly detoured at **appropriate crossing locations** whenever a sidewalk/crosswalk is closed. See the California MUTCD for guidance. Please keep in mind those pedestrians that may be disabled. Only one crossing at an intersection shall be closed at any time.
 - Applicant shall conform to all ADA standards.
 - If flaggers are used in the detour plan, they shall be shown in the drawings.
 - The applicant must obtain approval from the property owner of any driveways being blocked.
15. “Bell-Hole” Excavation (As Applicable): Where there are multiple “Bell-Hole” excavations within close proximity of each other complete breakout and restoration of all existing A.C. between excavations is required. The locations where this condition applies shall be determined in the field as work progresses. All work shall be done to the satisfaction of the City Engineer or designated agent.
16. CCTV Inspection (As Applicable): Where boring or micro-tunneling work is proposed, all adjacent utility lines shall be closed circuit television (CCTV) inspected prior to the commencement of work and after the completion of work. Pipe cleaning shall be

performed prior to CCTV inspection and all debris shall be removed from the pipeline. If the pipeline is damaged, it shall be replaced at the permittee's expense to the satisfaction of the City Engineer or his designated agent.

17. Open Trench Excavation: At no time shall there be more than 200 lineal feet of the trench opened along any single conduit alignment, including the section opened ahead of the pipe laying and the section behind the pipe laying which has not been completely backfilled and has a temporary cap. This also dictates the maximum length of right-of-way that may be posted with no parking signs at any one time.
18. Excavation Restoration: Excavation restoration in the roadway shall conform to City of Alameda Standard Plan 2930-22 (attached) and the following condition: At the direction of the City Engineer or assigned agent, pavement restoration may extend to a maximum 18" beyond the standard plan limits where existing adjacent pavement is raveled or alligatored. Pavement restoration shall include sawcut, removal of asphalt concrete, and replacement in kind in conjunction with the trench restoration/paving course. The limits of the area within the roadway to be repaved must be pre-approved by the City Inspector. All work shall be done to the satisfaction of the City Engineer or his assigned agent.
19. Hardscape Restoration: A concrete permit is required for the demolition and restoration of concrete curb, gutter and sidewalk within the public right-of-way. Concrete restoration of concrete curb, gutter, sidewalk and/or driveway within City right-of-way shall conform to City of Alameda Standard Plan 6297-24 (available upon request). Also, existing decorative concrete (e.g. tinted concrete, etc.) shall be replaced in kind and to the nearest expansion joint.
20. Site Restoration: Upon completion of the work all existing improvements within the project area (e.g. landscaping, irrigation, utilities, paths, area drainage, etc.) shall be completely restored to prior condition, or better, within five (5) working days of installation. Any damage within the public-right-of-way shall be replaced at the permittee's expense to the satisfaction of the City Engineer or his designated agent.
21. Construction Inspection: The permittee shall notify the Senior Inspector (510) 747-7930, 48-hours prior to beginning of any work within the City right-of-way. Work performed or covered without adequate notice will be subject to rejection.

This approval notice is from the Public Works Department only. Additional hold notices MIGHT be forthcoming from other plan check departments.

Should you require further clarification regarding these comments, contact Philip Lee at (510) 747-7942.

“NO PARKING”

CERTIFICATE OF POSTING

Planning & Building • 2263 Santa Clara Ave., Rm. 190

Alameda, CA 94501-4477

510.747.6800 • F: 510.865.4053 • TDD: 510.522.7538

Hours: M, W, Th – 7:30 am – 4:30 pm

T – 7:30 am – 4:00 pm

▶ POSTING INSTRUCTIONS FOR NO PARKING SIGNS

1. Metered spaces: Post sign on each parking meter
2. Non-Metered spaces: Post one sign per each space
3. Use only twine, masking tape, or cinch ties to attach signs to meters, poles, or trees.
4. DO NOT USE duct tape, nails, or staples to attach signs.
5. No Parking hours/dates may not be extended past approved times.
6. All signs must be removed within eight (8) hours of posted ending time of restricted parking.
7. Red Zones, Green Zones, and Disabled (Handicapped) Parking Zones may not be used as temporary No Parking zones.

Alameda Municipal Code Section 8-7.9 – Temporary Parking Prohibitions

a. Whenever the use of a street or portion thereof is authorized for the movement of structures or vehicles of unusual size, parades, or construction and repairs to streets, it shall be unlawful to park on that portion of the street where signs giving notice that parking is prohibited and subject to tow have been posted for a least twenty-four (24) hours prior to towing.

ATTACHMENT C

STANDARD FIELD PROCEDURES

STANDARD FIELD PROCEDURES FOR WELL AND VAPOR PROBE DESTRUCTION

This document presents standard field procedures for properly destroying groundwater monitoring wells. The objective of well destruction is to destroy wells in a manner that is protective of potential water resources. The two procedures most commonly used are pressure grouting and drilling out the well. These procedures are designed to comply with Federal, State and local regulatory guidelines. Specific field procedures are summarized below.

Well Pressure Grouting

Pressure grouting consists of injecting neat Portland cement through a tremie pipe under pressure to the bottom of the well. The cement is composed of about five gallons of water to a 94 pound sack of Portland I/II Cement. Once the well casing is full of grout, it is pressurized for five minutes by applying a pressure of 25 pounds per square inch (psi) with a grout pump. The well casing can also be pressurized by extending the well casing to the appropriate height and filling it with grout. In either case, the additional pressure allows the grout to be forced into the sand pack. After grouting the sand pack and casing, the well vault is removed and the area resurfaced or backfilled as required.

Well Drill Out

When well drill out is required, the well location is cleared for subsurface utilities and a hollow-stem auger (or other appropriate) drilling rig is used to drill out the well casing and filter pack materials. First, drill rods are placed down the well and used to guide the augers as they drill out the well. A guide auger is used in place of the drill rods if feasible. Once the well is drilled out, the boring is filled with Portland cement injected through the augers or a tremmie pipe under pressure to the bottom of the boring. The well vault is removed and the area resurfaced or backfilled as required.

Vapor Probe Destruction

Vapor probes are destroyed by manually removing the tubing from the ground. The probe construction material (sand pack and bentonite seal) are removed by either hand auger, air knife, or drill rig. The probe tubing and construction materials are stored in DOT approved containers for waste profiling and disposal. The open borings are backfilled with Portland Type I/II cement through a tremie pipe at the bottom of the boring. The probe vault is removed and the area resurfaced as required to match the existing surface conditions.

Waste Handling and Disposal

Soil cuttings from drilling activities are usually stockpiled onsite and covered by plastic sheeting. At least three individual soil samples are collected from the stockpiles and composited at the analytic laboratory. The composite sample is analyzed for the same constituents analyzed in the borehole samples in addition to any analytes required by the receiving disposal facility. Soil cuttings are transported by licensed waste haulers and disposed in secure, licensed facilities based on the composite analytic results.
