Mr. Jerry Wickham
Alameda County Department of Environmental Health
1131 Harbor Bay Parkway, Suite 250
Alameda, California 94502-6577

Dear Mr. Wickham:

Re: Down-Gradient Site Characterization Work Plan Addendum
Chiu Property
800 Franklin Street, Oakland, California 94604
Agency Case No. RO0000196

On behalf of Mr. Tommy Chiu, Conestoga-Rovers & Associates (CRA) is submitting this *Down-Gradient Site Characterization Work Plan Addendum (Work Plan Addendum)*. Presented in this *Work Plan Addendum* are a summary of the first phase activities performed under the *Down-Gradient Site Characterization Work Plan (Work Plan)* dated October 12, 2010, analytical results, and recommendations for implementing the second phase activities of the *Work Plan*.

The first phase objectives of the *Work Plan* were to advance three hydropunch borings to groundwater depth, collect grab groundwater samples for laboratory analysis, and determine the most appropriate location for a down-gradient monitoring well based on the analytical results.

Drilling and Sampling Activities:
On March 11-12, 2011, CRA advanced three hydropunch borings (B-7, B-8, and B-9) to a depth of 27 feet below grade surface (ft bgs). Prior to drilling, depth to water was measured in monitoring wells MW-5 and MW-6 to determine the target groundwater depth. Once the target depth was reached for each boring, the drill rods were retracted 4 feet exposing a stainless steel screen from 23 to 27 ft bgs.

Grab groundwater samples were collected from each boring using a clean stainless steel bailer. The samples were decanted into 40-milliter (mL) glass volatile organic analysis (VOA) vials supplied by McCampbell Analytical, Inc. (McCampbell) of Pittsburg, California. Sample containers were labeled, sealed in a plastic bag, and placed on ice in a chilled cooler. The samples were submitted to McCampbell for laboratory analysis under chain of custody (COC) documentation. See Figure 1 for the boring and grab groundwater sample locations, along with the most recent semi-annual monitoring data. The COC is provided in Attachment A.

CONESTOGA-ROVERS & ASSOCIATES

April 25, 2011 Reference No. 581000

Sample Analysis and Results:
Grab groundwater samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by modified EPA Method SW8015Bm and benzene, toluene, ethylbenzene and total xylenes (BTEX) by EPA Method SW8021B. No TPHg or BTEX was detected in any of the samples, except for a minor detection of toluene (3.0 micrograms per liter) in sample B-9. Grab groundwater results, along with the most recent semi-annual monitoring data is presented on Table 1 and Figure 1. The analytical report is provided in Attachment A.

Conclusions and Recommendations:
Based on the grab groundwater analytical results and most recent semi-annual monitoring data, the hydrocarbon plume does not appear to extend to borings B-7, B-8, or B-9. CRA recommends installing one down-gradient monitoring well in the vicinity of boring B-9 to fully define the down-gradient edge of the plume. See Figure 2 for the proposed monitoring well location.

Once CRA receives approval from the Alameda County Environmental Health Agency, the second phase *Work Plan* activities will be initiated. CRA will prepare and submit a comprehensive investigation report approximately 6 weeks after all field work has been completed and laboratory results have been received.

If you have any questions or comments regarding this *Work Plan Addendum*, please call me at (510) 420-3369.

Yours truly,

CONESTOGA-ROVERS & ASSOCIATES

Bryan A. Fong

Abbreviations and Notes:

TOC Elevation = Top of well casing elevation measured in feet above mean sea level
msl = Above mean sea level
µg/L = Micrograms per liter
TPHg = Total petroleum hydrocarbons as gasoline by EPA Method SW8015C.
TPHd = Total petroleum hydrocarbons as diesel by EPA Method SW8015C with silica gel cleanup.
TPHmo = Total petroleum hydrocarbons as motor oil by EPA Method SW8015C with silica gel cleanup.
Benzene, toluene, ethylbenzene, and xylenes by EPA Method SW8021B (SW8260B).
MTBE = Methyl tertiary-butyl ether by EPA Method SW8021B by (8260B)
Chloroform by EPA Method SW8260B.
1,2-DCA = 1,2-Dichloroethane by EPA Method SW8260B.
Sheen = A sheen was observed on the water's surface.
Field = Observed in the field.
Lab = Observed in analytical laboratory.
(a) = unmodified or weakly modified gasoline is significant
(b) = diesel range compounds are significant; no recognizable pattern
(d) = gasoline range compounds are significant
(h) = lighter than water immiscible sheen/product is present
(i) = liquid sample that contains ~1 vol. % sediment
(j) = sample diluted due to high organic content/matrix interference
ND<5.0 = Not detected above detection limit.
-- = Not available, not analyzed, or not applicable
* = Surveyed September 7, 2006; updated to table May 24, 2010
** = Surveyed March 8, 2007; updated to table May 24, 2010
É = Unable to access well due to denial by current tenant

Conestoga-Rovers & Associates	Client Project ID: #581000; Chiu Property	Date Sampled: 03/11/11-03/12/11
		Date Received: 03/15/11
5900 Hollis St, Suite A	Client Contact: Bryan Fong	Date Reported: 03/22/11
Emeryville, CA 94608	Client P.O.:	Date Completed: 03/18/11

WorkOrder: 1103476

March 22, 2011

Dear Bryan:

Enclosed within are:

1) The results of the **3** analyzed samples from your project: **#581000; Chiu Property,**
2) A QC report for the above samples,
3) A copy of the chain of custody, and
4) An invoice for analytical services.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits.

If you have any questions or concerns, please feel free to give me a call. Thank you for choosing

McCampbell Analytical Laboratories for your analytical needs.

Best regards,

Angela Rydelius
Laboratory Manager
McCampbell Analytical, Inc.

NONE

BATCH 56905 SUMMARY

Lab ID	Date Sampled	Date Extracted	Date Analyzed	Lab ID	Date Sampled	Date Extracted	Date Analyzed
1103476-001A	03/11/11 9:10 PM	03/18/11	03/18/11 2:52 AM	1103476-002A	03/11/11 10:53 PM	03/17/11	03/17/11 6:58 PM
1103476-003A	03/12/11 1:10 PM	03/17/11	03/17/11 11:43 PM				

MS = Matrix Spike; MSD = Matrix Spike Duplicate; LCS = Laboratory Control Sample; LCSD = Laboratory Control Sample Duplicate; RPD = Relative Percent Deviation.

% Recovery = 100 * (MS-Sample) / (Amount Spiked); RPD = 100 * (MS - MSD) / ((MS + MSD) / 2).

MS / MSD spike recoveries and / or %RPD may fall outside of laboratory acceptance criteria due to one or more of the following reasons: a) the sample is inhomogenous AND contains significant concentrations of analyte relative to the amount spiked, or b) the spiked sample's matrix interferes with the spike recovery.

£ TPH(btex) = sum of BTEX areas from the FID.

cluttered chromatogram; sample peak coelutes with surrogate peak.

N/A = not enough sample to perform matrix spike and matrix spike duplicate.

NR = matrix interference and/or analyte concentration in sample exceeds spike amount for soil matrix or exceeds 2x spike amount for water matrix or sample diluted due to high matrix or analyte content, or inconsistency in sample containers.
