Subject: BP 771 (RO 200) - Soil and Groundwater Investigation Report

Hello Paresh,

Offsite property access to conduct the offsite soil and groundwater investigation associated with BP Station #771 located at 899 Rincon Ave., Livermore was not finalized until early October. This has pushed our scheduling of field work back. As a result, we will not be able to meet the deadline of December 8, 2010 for submittal of the Soil and Groundwater Investigation Report. Drilling activities are currently scheduled to be conducted during the week of December 27, 2010. We would like to request February 18, 2011 as the new deadline for report submittal. Please let me know if you have any questions or concerns. Thank you. Take care
