Control Limits				

Please Note:

The LCS is a control sample of known, interferent-free matrix that is analyzed using the same reagents, preparation, and analytical methods employed for the samples. The matrix spike is an aliquot of sample fortified with known quantities of specific compounds and subjected to the entire analytical procedure. If the recovery of analytes from the matrix spike does not fall within specified control limits due to matrix interference, the LCS recovery is to be used to validate the batch.

RE: **FORWARD, INC.** Approval No. 668122
Contaminated Soil from Unocal S/S# 0746
3943 Broadway, Oakland, CA

Dear Mr. Galantine:

FORWARD, INC. is pleased to confirm the disposal of 30.20 tons of soil from the referenced site. The material was received at our Manteca, California facility for disposal on March 3, 1998. The waste was placed in a Class II Class 2 waste management unit.

Approval for this material was based on the information provided in the waste profile and associated materials submitted by Gettler-Ryan, Inc., dated February 23, 1998 on behalf of the Tosco Marketing Company. Acceptance of the waste is subject to the "Terms and Conditions" agreed to and signed by Gettler-Ryan (agent for Tosco Marketing Company).

Thank you for the opportunity to be of service. Should you have any questions regarding this matter, please do not hesitate to contact myself or Customer Service at (800) 204-4242.

Sincerely,

FORWARD, INC.

Brad J. Bonner
Sales Manager
